Modular DC voltage power supply for extensive videophone systems

10-805-01

4 year warranty

This DC voltage power supply for DIN-rail mounting is suitable for extensive videophone systems. It is always used in combination with power supply 10-801.

Technical data

Modular DC voltage power supply for extensive videophone systems.

- Function:
  - output current clamp 29: I(+) = 2.5 A
  - (+)-terminal is protected against short-circuit
  - connected power supply with high efficiency
  - control and indication of the working modes of the installation
- Input voltage: 230 Vac
- Maximum MCB rating: 16 A (limited by national installation rules)
- Output voltage: 26 Vdc
- Overload protection: missing_value
- DIN dimensions: 8U
- Dimensions (HxWxD): 90 mm x 140 mm x 70 mm
- Weight: 407 gr
- Marking: CE
