TRONIX

Before first use

Before getting started with this product, it is advisable to check the order completeness and any damage. If this is the case, please contact Tronix Lighting.

Description

This sturdy wall light is made of a UV-resistant and corrosion-resistant plastic. This makes it ideally suited for tunnels, parking garages or galleries, for example. In addition, this wall light features different color temperatures for optimal use.

Features

- ADC12 aluminum housing with good heat dissipation;
- PC 94-V0 anti-UV plastic housing;
- 94-V2 corrosion-resistant diffuser;
- IP65 waterproof;
- CCT-2 switch: adjustable in 2700K and 3000K by dip-switch in the fixture.

Installation

1. Turn off the power and remove the product and accompanying parts from the packaging. Then detach the shade and prepare the wall by drilling holes;
2. Disassemble the lamp. Use the switch inside the lamp to select the desired color temperature;
3. Attach the lamp to the wall and install the wiring. Put the lamp back together when the back is properly assembled;
4. Check the installation of the wall lamp. Activate the power when it is okay to complete the installation.

Safety

Safety is a top priority at Tronix Lighting. Therefore, we heartily recommend that you follow the following steps closely:

- Keep this manual carefully for future reference;
- Choose a qualified electrician while installing, maintaining or inspecting this product;
- Never look directly into a light source to avoid possible eye damage;
- Ensure that the respective power group is always on non-active when the product is connected;
- Use only recommended combinations (LED drivers, controllers or dimmers) to avoid injury or damage to the product;
- The light source of this light is not replaceable. Because of this, you must replace the entire fixture towards the end of its lifespan and it is not recommended to open it.

Technical problems and repair

Should a product not work properly after installation, or if the product exhibits problems over time, it is advisable to check the following elements:

- Check the wiring and installation of your product;
- Check for the presence of interfering elements such as dust, water or other electronics;
- If possible, try disconnecting the product and testing it in another location to rule out a problem at the location;
- Should you be dealing with a WIFI-based product, check and reset your router's settings.

Should the product still not work after testing, it is recommended to send it in for inspection and/or repair. To do so, please contact Tronix Lighting using nearby details and proof of purchase (packing slip).
