Type **Downlights | Adjustable**

Contents of this product **1x Downlight 18~30 Watt  
with external driver**

Technical datasheet **Digitally available  
on our webshop**

*View instructions and  
technical data also on  
our website*

**TRONIX**

## Before first use

Before getting started with this product, it is advisable to check the order completeness and any damage. If this is the case, please contact Tronix Lighting.

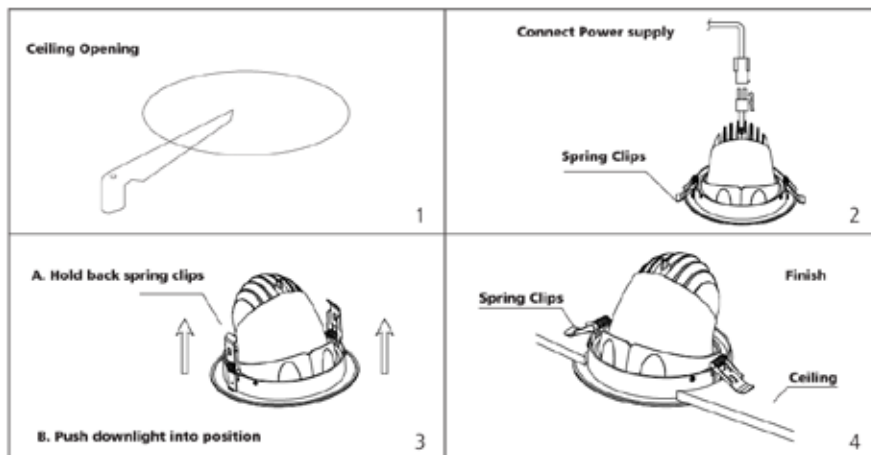

## Description

This COB downlight features a unique design with reflector and strong high power COB LED chips. Thanks to the ADC12 aluminum fixture, the spotlight is not only very beautiful but also has excellent insulation. In addition, the light is optionally dimmable and can be optimally controlled thanks to the wide tilt within the fixture.

In short, a beautiful spotlight perfect for use in the office, living spaces, schools, hotels and other public locations.

## Installation

1. Remove the product from the package, turn off the power and drill a suitable mounting hole in the ceiling based on the hole size of the product;
2. Attach the wiring to the spotlight;
3. Push the clamping springs against the spotlight and push the spotlight through the mounting hole;
4. Then clamp the spotlight into the ceiling using previously mentioned clamping springs. Check the installation and position of the spotlight again. The spotlight should always be placed at an appropriate distance so that one does not look directly into the light source for long periods of time. When everything is in order, the power can be reactivated.

## Safety

Safety is a top priority at Tronix Lighting. Therefore, we heartily recommend that you follow the following steps closely:

- Keep this manual carefully for future reference;
- Choose a qualified electrician while installing, maintaining or inspecting this product;
- Never look directly into a light source to avoid possible eye damage;
- Ensure that the respective power group is always on non-active when the product is connected;
- Use only recommended combinations (LED drivers, controllers or dimmers) to avoid injury or damage to the product;
- The light source of this spotlight is not replaceable. Because of this, you must replace the entire fixture towards the end of its lifespan and it is not recommended to open it;
- Place this spotlight indoors only at a standard room temperature (~25°C).

## Technical problems and repair

Should a product not work properly after installation, or if the product exhibits problems over time, it is advisable to check the following elements:

- Check the wiring and installation of your product;
- Check for the presence of interfering elements such as dust, water or other electronics;
- If possible, try disconnecting the product and testing it in another location to rule out a problem at the location;
- Should you be dealing with a WIFI-based product, check and reset your router's settings.

Should the product still not work after testing, it is recommended to send it in for inspection and/or repair. To do so, please contact Tronix Lighting using nearby details and proof of purchase (packing slip).
