Cable assembly *WINSTA*® RD rated current 16 A

For signal and power transmission: The *WINSTA*® RD cable assembly A coding. Our pluggable installation connectors with spring pressure connection technology work entirely without screw connections. They allow flexible, error-free installation in numerous applications. For greater protection in electrical installations, the pluggable installation connector is provided with mechanical protection against mismatching. The pluggable installation connector

is protected against ingress by solid objects in accordance with protection type IP20 (When mated: IP2xC (These compact connectors are not designed for use in open, easily accessible areas!)). WINSTA® RD: Solutions from this product line fit into drill holes and conduits with diameters up to 20 mm. This product meets all the relevant safety requirements of fire class E; as a result it can be used in domains where fire safety is relevant. The cable assembly is halogen-free. This eliminates the addition of environmental pollutants during production. It also increases the fire class, since halogen-free materials are flame-resistant.

Fast, secure pluggable connections – cable assemblies from WAGO

A socket and a plug are provided. The WINSTA® Pluggable Connection System allows pluggable electrical installation. This significantly reduces the need for servicing and lowers costs. Choose quality and durability – with protection type IP20 from WAGO makes the installation of electrical components noticeably easier.

- pluggable installation connectors with protection against mismatching
- products perfectly tailored to your requirements guarantee safe use
- for any mains application
- ready to install and use immediately
- convenient installation and commissioning
