

Installatiehandleiding communicatiemodule / koppeling router, haard en DRU control app

Check whether the situation is suitable for operating the fire(s) with the DRU Control App. Observe following points:
 The fire must be equipped with a Honeywell control with receiver DFGT version V04 or later (Fig. 1)
 There must be a free Ethernet port on your modem / router with WiFi.
 You must be in possession of a tablet or phone with IOS or Android (version 3.0 or later)

Check the contents of the package. It should consist of:
 Communication Module (Version V05/H03 or later), power adapter, USB cable and Ethernet cable.

Ensure the communication module is within the range of the remote control (see User Guide)
 Connect the Ethernet cable between the communication module and the modem / router.
 Connect the adapter to the communication module and a 230V power outlet.
 Make sure your phone / tablet is connected to the same wifi router as the communication module

Make sure the power LED on the communication module is lit (bottom LED, see Fig 4)
 (if it is not lit then there is no power, plug adapter 230, see Fig 4A)
 Check that the lights on the rear of the communication module next to the Ethernet connector flashes (Fig. 4B)
 (if the green light is off, there is no Ethernet connection, check ethernet cable)
 (If the orange light is off, there is no IP address available. Enable DHCP from the router.)

The top LED on the communication module shows if the communication module is connected to the fire (see Figure 4C)
 The middle LED flashes as the app communicates with the communication module (see Figure 4C)

Now the fire, communication module and the tablet / phone are set up to communicate with each other.
 Unplug the DFGT (Fig 5A) for 10 seconds, then replace it.
 You now have 5 minutes to add the fire(s) to the App. Open the App, go to "Settings", "Add fire".
 The communications module will now show in the lower part of the screen. Click the plus sign next to the module to add the fire.

The App is now ready for use.
 Before commissioning the fire always read the installation and user manual.

If after following the above steps, the App does not work,
 please contact Dru Customer Service (0161 728 8700)
