Installation Notes

Installation

Inserting separators for group formation directly into MCS MIDI Classic Male Headers.
 Group formation using separators means that pole count is reduced by at least one pole.
 Female connectors with integrated end plates and 5/5.08 mm pin spacing are available for group formation without loss of poles. Formation of groups without the loss of any poles is possible without using separators for 7.5/7.62 mm pin spacing.

Subject to changes. Please also observe the further product documentation!
