### Product Description

The ETHERMA SMARTBOX is an intelligent, wired radio receiver for convenient control of all electric heating appliances. As a central component of the ETHERMA SMART SYSTEM, it is mounted directly on the heater and impresses with its easy-to-install surface-mounted design and generous connection area for simple installation. Thanks to WLAN (2.4 GHz) and control via the ETHERMA SMARTCUBE and the SMART app, the system enables precise temperature control, time programming and individual settings - conveniently from anywhere. Two cable entry options facilitate adaptation to local conditions. The cloud connection is data protection-compliant via servers in Germany. With 230 V supply voltage, a switching current of 8A and IP44 protection, the SMARTBOX is ideally equipped for modern, energy-efficient heating comfort. Available in white or black.
