PRODUCT DATASHEET

Type: ET-eFLOW-500-W
Art. Nr.: 46753

9120129935104

Short description

Wall convector with thermostat, white, 40x40cm, 500W, plug

Product Description

The eFLOW convector is an electric direct heating system for fast and efficient heating of living spaces such as basements, toilets, bedrooms, bathrooms and hobby rooms. Thanks to its splash-proof design in accordance with protection class IP24, the device is also suitable for use in bathrooms. The specially shaped air outlet grille ensures even air distribution to the front and creates natural room convection. The integrated electronic thermostat with LCD display enables precise temperature control and offers four operating modes: comfort, reduction, frost protection and off. The weekly programme allows the heating output to be individually adapted to the daily routine, while the temperature drop detection function further optimises usage and ensures compliance with the Ecodesign Directive. For maximum safety, the convector is equipped with overheating protection. The device is operated via a 1.5 m long plug cable and offers an operating voltage of 230 V, a power output of 500 to 2000 W and a temperature control range of 5 to 35 °C. It complies with protection class I, is CE-compliant and is supplied in matt white (RAL 9016).

ETIM 10 Characteristics

Model	Standard	**Heating capacity**	500 Watt
Mounting method	On wall	**Supply voltage**	230|230 Volt
Material front	Steel	**Frequency supply voltage**	50|50 Hertz
Grid model	Fins	**Connection cable length**	1.5 Metre
Material heating element	Aluminium	**Number of switch positions**	4
Air exhaust	Front side	**Temperature adjustment**	5|35 Degrees celsius
With fan	✖	**Differential gap, temperature**	0.1 Degrees celsius
Electrical connection	Connection cable with plug	**Width**	400 Millimetre
Position control panel	Top side	**Height**	400 Millimetre
Suitable for wireless remote control	✖	**Depth**	85 Millimetre
With remote control	✖	**Weight**	3.4 Kilogram
Power control	Electronic		
Colour	White		
Degree of protection (IP)	IP24		
Protection class according to IEC 61140	I		
With overheating protection	✔		
Programmable	✔		
Frost protection circuit	✔		
Digital indication	✔		
With presence detector	✖		
Suitable for bus connection	✖		
With time switch clock	✔		
Adaptive (self-learning)	✖		
Consumption indication	✖
