Distribution box WINSTA® with protection type IP20

The distribution box from the *WINSTA®* product line with protection against mismating guarantees you the maximum flexibility in electrical installation. An extensive range of accessories complements the WINSTA® product line from WAGO. For greater protection in electrical installations, the distribution box is provided with mechanical protection against mismating. The distribution box is protected in accordance with protection type IP20 (When mated: IP2xC (These compact connectors are not designed for use in open, easily accessible areas!)). This means that users' fingers will never come into contact with electrified contact elements. The *WINSTA®* distribution box with A coding in white or black is usually used for general mains applications in power distribution.

WINSTA® solutions for your electrical installation - protected against mismating and maintenance-free

WINSTA® is the pluggable connection system that is optimally tailored to the strict requirements of electrical installation. It ensures fast, secure and, above all, error-free installation of components and cables. Choose quality and durability – with protection against mismating from WAGO makes the electrical installation of electrical components noticeably easier.

- · distribution boxes with protection against mismating
- clear slot identification for easy commissioning
- saves time, since no wiring is required at the construction site
- with A coding for use in a large number of general mains applications
- quick replacement of defective units during ongoing operation
