# Do your home-cabling the professional way

Wouldn't it be nice to know that all your cables and cords are in order, both the ones inside the walls and those visible in the room?

Our range of installation material has been renowned in the professional business for years, but we put pride in providing the best products for everyone. So now you can use the same material as the professionals, which makes it easy for you to stay in control of your installations. Some of the home cabling you can do yourself, other operations demand an authorized electrician. In both cases, professional material will speed up the process and improve the final result.

## New! Rapstrap

A releasable and re-usable flexible tie for thousands of uses. Read more on page 12.

P139803

P140002

# Top quality through and through

Making your home safe, comfortable and tidy is so much more fun and easy with the appropriate materials. Our range of installation material includes professional quality products for any installation in your home. So whether you're about to mount a gigantic TV on the wall or merely want to hide the cables, just head off to the nearest retail store and get what you need from the green packages.

P139972

P138973

### Ultra mini-trunking

A quick and easy way to hide your cables.

P138193

### TC nail clips

For round or flat cables. Various sizes, colours and dimensions.

P124762

### TCS screw clips

Can be fitted without drilling in most materials. Use indoors or outdoors.

P124761

### Fastis steel clamps

Elegant clamps for aesthetically demanding applications.

P138986

### TKK steel clamps

Handy clamps easily fastened with the TKK tool.

P138182

### Flush-mounted boxes

Easy to use junction boxes, equipped with three or seven rigid stubs.

P138987

### Surface-mounted boxes

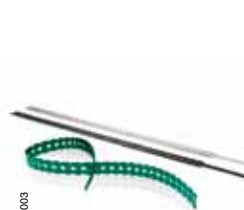

Boxes with or without terminal blocks. Use indoors or outdoors.

P138988

### Connectors and terminals

Connect the way you like, for various cable sizes and applications.

P140003

### Rapstrap flexible ties

Releasable and re-usable. For thousands of uses.

P124737

### Cable wings

Easy fixing of cables, tools, skis or anything else you can think of.

## Ultra mini-trunking

# Some things should just pass unnoticed

No matter how impressive your TV set is, it won't do the trick if tangled cables and cords draw your attention.

Now there is a quick way of getting rid of unappealing cables that need to be there, but should not be seen. The Ultra mini-trunking is your perfect companion when it comes to nice and tidy fixing of cables and cords. All sizes have pre-punched holes for easy mounting. The smallest sizes also have a self-adhesive fixing tape on the back as an option.

The Ultra mini-trunking is available in white, cadmium and lead-free PVC with a good surface finish. Smart accessories like T- and L-shaped joints, as well as outer and inner corner pieces, help you to take full control and get an attractive result.

P138973

The Ultra mini-trunking range includes a variety of dimensions. Some sizes have a self-adhesive fixing tape.

P138974

The mini-trunking is discrete, blending into the interior design.

## Clips and clamps

# It's all about keeping order

Whether you need tiny nail clips for your home network system or powerful screw clips and clamps for your outdoor installations, you will always find the best alternative in our comprehensive range.

### TC nail clips

For minimizing the risk of injuries all our TC nail clips are equipped with a safety nail that will bend before breaking. The clips are available in a variety of colours and dimensions, with a nail of hardened and electroplated steel. The clips are quickly hammered directly into wood or masonry, but for more low-density materials like plasterboards and brick, we advise using a TCP clip plug.

### TCS screw clips

The ultimate choice for demanding applications. All screw clips are made of durable UV-stabilized polypropylene with robust screws in electroplated steel to resist corrosion. The sharp point and high thread of the screw make it suitable for all kinds of materials, such as wood, plasterboards and low-density concrete. In concrete, just drill a hole and mount the screw.

TC nail clip and TCS screw clip for round or flat cables.

Combined use of clips and Mureva K60 surface-mounted box.

P124761

Fastis TFK, for an attractive look.

### Fastis TFK Steel Clamp

Fastis is an elegant, one-piece clamp perfectly fit for any stylish installation. Fastis is available plastic-coated or electroplated with one or two integrated nails. For the one-nailed clamp, use our handy mounting tool. The two-nailed version is just hammered in.

Fastis tool

P139197

Make the cables blend in with the interior.

### TKK Steel Clamp

The discrete TKK clamp holds the cable firmly without drawing any unnecessary attention. This makes the TKK especially suitable for aesthetically demanding applications. Can be used in almost any kind of wall material, but for plasterboards and low-density materials the TKK should be fastened using a TCP clip plug.

TKK tool

P3073

TKK, modest but strong. For round or flat cables.

### TK Plastic Clamp

This sturdy clamp is made of durable polypropylene which makes it very resistant to impacts, heat, cold and acid. The range covers various sizes and each one suits several cable dimensions. Delivered without screw to make it possible to choose the right screw type for each application.

P139196

Flexible plastic clamp for cables or conduits.

TKK

Fastis

## Boxes and terminals

# Structure and order from the inside out

Some of them may not be visible to the eye once the construction phase is completed. But knowing you have optimized the installation preparations is satisfying. For you and for the installer.

When planning a new construction in your home, make sure you place outlets and switches in the most convenient locations. Whether you make the installation yourself or hire a professional electrician, our range of flush-mounted and surface-mounted boxes will help you get a great result.

All are flexible and easily mounted, helping you or the installer distribute and lead cables safely and efficiently. For maximum flexibility, the flush-mounted boxes are equipped with up to seven rigid stubs. And the discrete and sleek design of the surface-mounted boxes match any interior.

P139192

Optimized design and functionality even inside the walls.

P139568

The range also includes a number of accessories, such as twist-on connectors and push-in terminals.

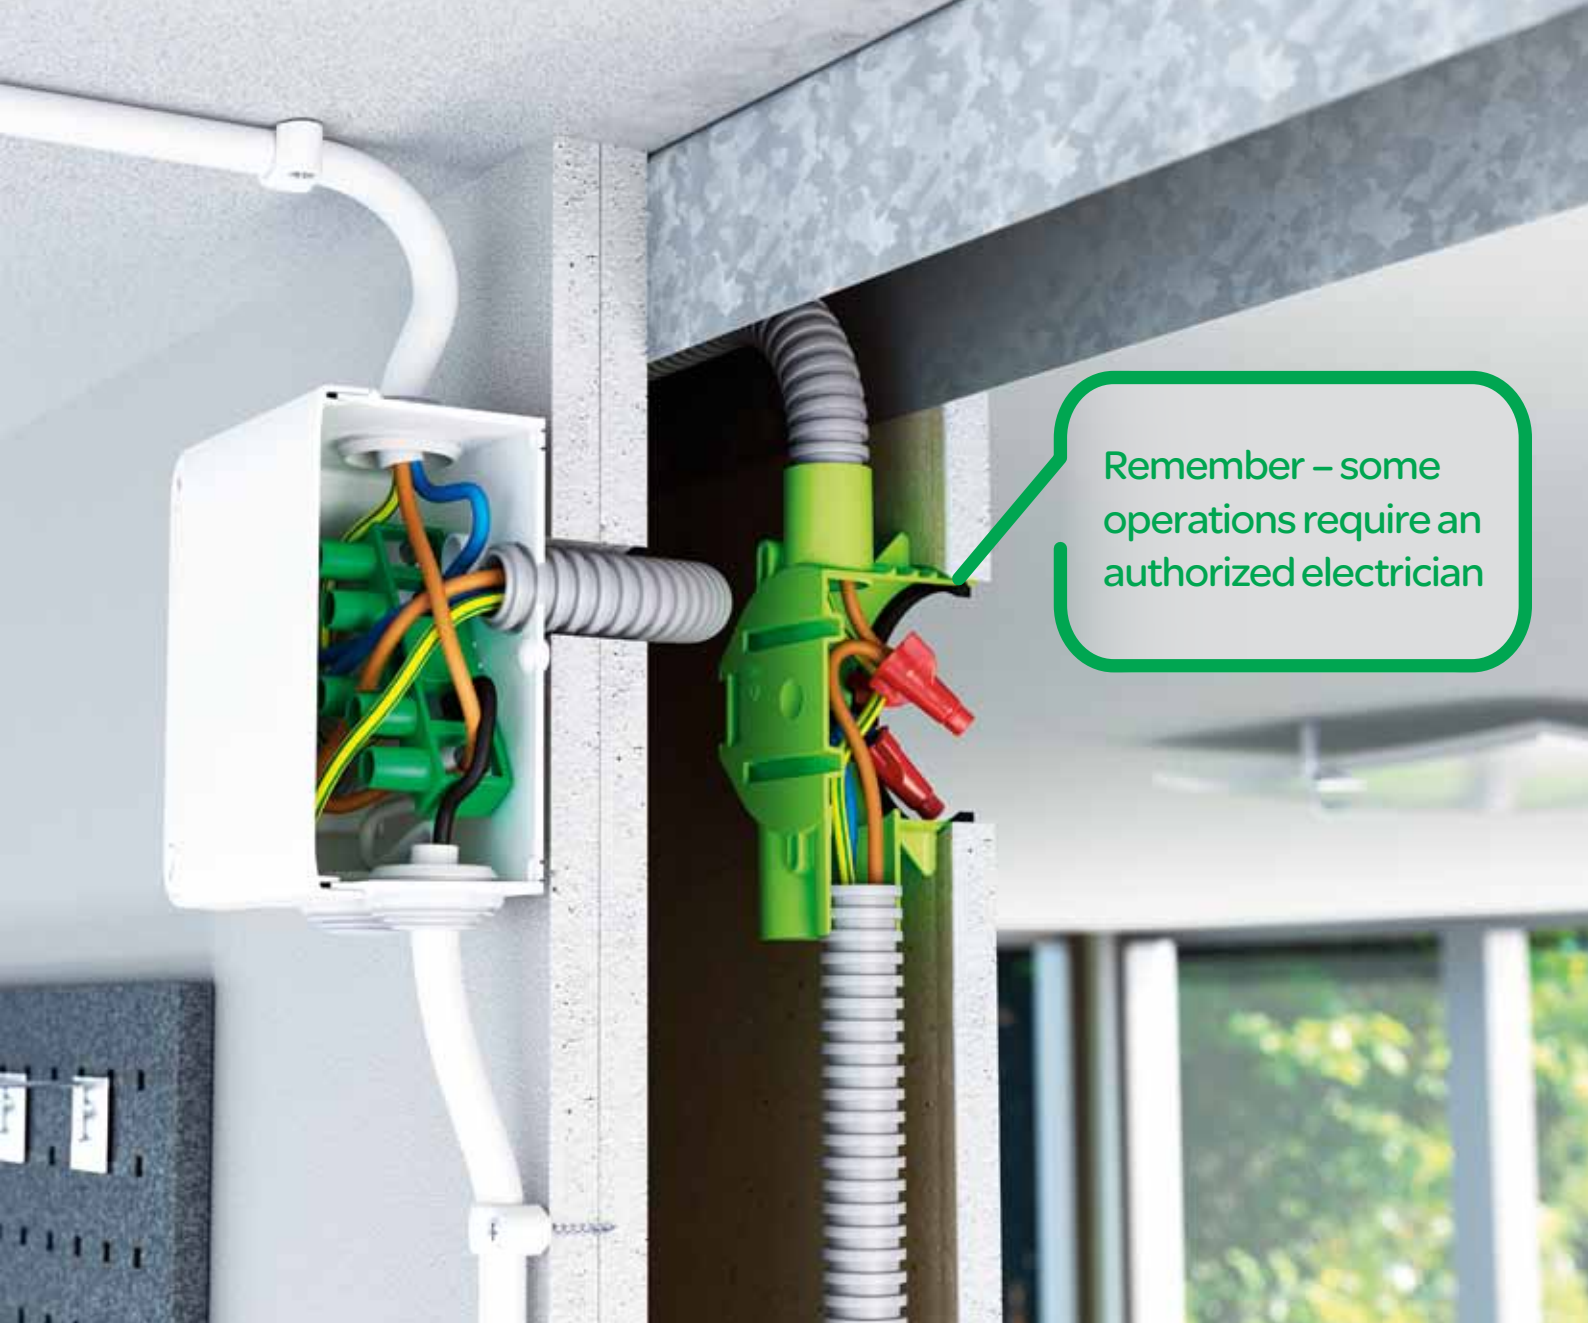

P117950

Smart design allows a dense yet structured interior.

P124307

Our boxes are subject to numerous tests, one of which is fire resistance.

Remember - some operations require an authorized electrician

P139191

New! Rapstrap

# Innovative and one of a kind

Sure regular cable ties are handy. They are applicable for a lot of things and they usually stay put. But once you've used them, they are ready for the garbage bin.

Try the flexible and soft Rapstrap instead! Just tie, cut and use again. Or loop into a multitude of different configurations.

P140003

P140224

### Several ties from a single Rapstrap

Rapstrap is a “green” product. No part of Rapstrap is useless and no waste. Just thread through a cell at the end of the strip, cut off the remaining front section and use again.

**Thousands of uses.  
Only one Rapstrap.**

Scan the code to find out more!

### Releasable and re-usable

The unique design allows Rapstrap to be easily released and re-used as long as you have kept the ribbed tongue end. Just re-insert the tongue in the same cell and remove.

### Thousands of uses

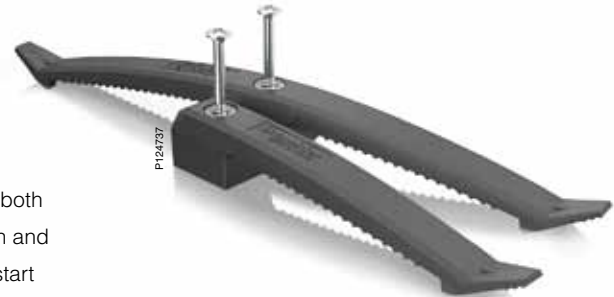

Made of elastically polyurethane, Rapstrap can stretch up to 50%. Yet it ties securely without harming any sensitive surfaces. An easy way to quickly manage delicate cables, plants, or anything else you want tied up. For longer lengths, just join two Rapstraps together.

## Cable Wing

# The multi-talented cable wing

Originally, the obvious intention was to use the cable wing for fastening cables. But then we recognised the versatility of this invention – and the uses seem endless. Only your imagination sets the limits.

The cable wing is made of highly UV-resistant polyamide and can be used both indoors and outdoors for uncountable applications. Single or double design and smart shape make the cable wing versatile and flexible. So go ahead and start exploring how you can make the best use of the multi-talented wing.

Under a table, out of reach of children and pets.

In the storage room, until snow returns.

In the workshop, for keeping tools close at hand.

Thorsman installation material
