# TRONIX

## Before first use

Before getting started with this product, it is advisable to check the order completeness and any damage. If this is the case, please contact Tronix Lighting.

## Description

This sturdy track spot features a strong, dimmable LED chip. This not only gives you plenty of light, but also a lighting experience that can be fully customized.

### Features

- Smooth heat dissipation thanks to loose placement of lamp and driver;
- Easily combine with our range of 3 phase rails and accessories, all available in matching colors for the perfect custom solution.

## Installation

1. Turn off the power and remove the product and associated parts from the packaging.
2. Determine the location for installation and assemble the rail and selected accessories;
3. Insert the track spotlight into the rail and determine the phase to connect it to the mains;
4. Check the complete installation. Should this be in order, you can reactivate the power.

## Safety

Safety is a top priority at Tronix Lighting. Therefore, we heartily recommend that you follow the following steps closely:

- Keep this manual carefully for future reference;
- Choose a qualified electrician while installing, maintaining or inspecting this product;
- Never look directly into a light source to avoid possible eye damage;
- Ensure that the respective power group is always on non-active when the product is connected;
- Use only recommended combinations (LED drivers, controllers or dimmers) to avoid injury or damage to the product.

## Technical problems and repair

Should a product not work properly after installation, or if the product exhibits problems over time, it is advisable to check the following elements:

- Check the wiring and installation of your product;
- Check for the presence of interfering elements such as dust, water or other electronics;
- If possible, try disconnecting the product and testing it in another location to rule out a problem at the location;
- Should you be dealing with a WIFI-based product, check and reset your router's settings.

Should the product still not work after testing, it is recommended to send it in for inspection and/or repair. To do so, please contact Tronix Lighting using nearby details and proof of purchase (packing slip).
