1 General

About this document

The language of the original operating instructions is English. All other languages of these instructions are translations of the original operating instructions.

These installation and operating instructions are an integral part of the product. They must be kept readily available at the place where the product is installed. Strict adherence to these instructions is a precondition for the proper use and correct operation of the product.

The installation and operating instructions correspond to the relevant version of the product and the underlying safety regulations and standards valid at the time of going to print.

EC declaration of conformity:

A copy of the EC declaration of conformity is a component of these operating instructions.

If a technical modification is made on the designs named there without our agreement or the declarations made in the installation and operating instructions on the safety of the product/personnel are not observed, this declaration loses its validity.

2 Safety

These operating instructions contain basic information which must be adhered to during installation, operation and maintenance. For this reason, these operating instructions must, without fail be read by the service technician and the responsible specialist/operator before installation and commissioning.

It is not only the general safety instructions listed under the main point "safety" that must be adhered to but also the special safety instructions with danger symbols included under the following main points.

2.1 Indication of instructions in the operating instructions

Symbols

General danger symbol

Danger due to electrical voltage

NOTE

Signal words

DANGER!

Acutely dangerous situation.

Non-observance results in death or the most serious of injuries.

WARNING!

The user can suffer (serious) injuries. 'Warning' implies that (serious) injury to persons is probable if this information is disregarded.

CAUTION!

There is a risk of damage to the product/unit. 'Caution' implies that damage to the product is likely if this information is disregarded.

NOTE: Useful information on handling the product. It draws attention to possible problems.

	<p>Notes applied directly on the product must be strictly complied with and kept in legible condition. These include:</p> <ul style="list-style-type: none"> • Direction of rotation arrow • Identifiers for connections • Name plate • Warning sticker
2.2 Personnel qualifications	<p>The installation, operating and maintenance personnel must have the appropriate qualifications for this work. Area of responsibility, terms of reference and monitoring of the personnel are to be ensured by the operator. If the personnel are not in possession of the necessary knowledge, they are to be trained and instructed. If need be, this can be accomplished by the manufacturer of the product at the request of the operator.</p>
2.3 Danger in the event of non-observance of the safety instructions	<p>Non-observance of the safety instructions can result in risk of injury to persons and damage to the environment and the product/unit. Non-observance of the safety instructions results in the loss of any claims to damages.</p> <p>In detail, non-observance can, for example, result in the following risks:</p> <ul style="list-style-type: none"> • Danger to persons from electrical, mechanical and bacteriological influences • Damage to the environment due to leakage of hazardous materials • Property damage • Failure of important product/unit functions • Failure of required maintenance and repair procedures.
2.4 Safety consciousness on the job	<p>The safety instructions included in these installation and operating instructions, the existing national regulations for accident prevention together with any internal working, operating and safety regulations of the operator are to be complied with.</p>
2.5 Safety instructions for the operator	<p>This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.</p> <p>Children should be supervised to ensure that they do not play with the appliance.</p> <ul style="list-style-type: none"> • If hot or cold components on the product/the unit lead to hazards, local measures must be taken to guard them against touching. • Guards protecting against touching moving components (such as the coupling) must not be removed whilst the product is in operation. • Leakages (e.g. from a shaft seal) of hazardous fluids (e.g. explosive, toxic or hot) must be conveyed away so that no danger to persons or to the environment arises. National statutory provisions are to be complied with. • Highly flammable materials are always to be kept at a safe distance from the product. • Danger from electrical current must be eliminated. Local directives or general directives [e.g. IEC, VDE etc.] and local energy supply companies must be adhered to.
2.6 Safety instructions for installation and maintenance work	<p>The operator must ensure that all installation and maintenance work is carried out by authorised and qualified personnel, who are sufficiently informed from their own detailed study of the operating instructions.</p> <p>Work to the product/unit must only be carried out when at a standstill. It is mandatory that the procedure described in the installation and operating instructions for shutting down the product/unit be complied with.</p>

		<p>Immediately on conclusion of the work, all safety and protective devices must be put back in position and/or recommissioned.</p>
2.7	Unauthorised modification and manufacture of spare parts	<p>Unauthorised modification and manufacture of spare parts will impair the safety of the product/personnel and will make void the manufacturer's declarations regarding safety.</p> <p>Modifications to the product are only permissible after consultation with the manufacturer. Original spare parts and accessories authorised by the manufacturer ensure safety. The use of other parts will absolve us of liability for consequential events.</p>
2.8	Improper use	<p>The operating safety of the supplied product is only guaranteed for conventional use in accordance with Section 4 of the operating instructions. The limit values must on no account fall under or exceed those specified in the catalogue/data sheet.</p>
3	Transport and interim storage	<p>When the product is delivered, check it for any damage in transit. If any defect is found, inform the delivery company (forwarding agent). The equipment must be transported by means of authorised load devices.</p> <p>On arrival, inspect the product immediately for any transport damage. If damage is found, the necessary procedure involving the forwarding agent must be taken within the specified period.</p> <p>Before installation, the product must be kept dry, frost-free and protected from mechanical damage.</p> <p>CAUTION! Risk of property damage! Improper transport and interim storage can cause damage to the product.</p> <ul style="list-style-type: none">• The product must not be exposed to temperatures outside the range between -10°C and +40°C.
3.1	Transport for installation/removal purposes	<p>WARNING! Danger of personal injury! Improper transport can lead to personal injury.</p> <ul style="list-style-type: none">• The stability of the load must be ensured.• The handling should be done by skilled staff and with authorised equipment.
4	Intended use	<p>Purpose</p> <p>The basic function of SiClean is to protect heating systems against sludge formation through continuous removal of suspended matter.</p> <p>Fields of application</p> <p>It may be used for:</p> <ul style="list-style-type: none">• Hot-water heating systems• Heating/air-conditioning systems <p>Restrictions</p> <p>Typical installation locations are technical rooms within the building with other domestic installations. It is not intended to install the system directly in rooms used for residential or working purposes.</p> <p>Outdoor installation is not permitted for this series.</p> <p>CAUTION! Risk of material damage! Impermissible substances in the fluid can destroy the pump. Abrasive solids (e.g. sand) increase pump wear. Pumps without an Ex-rating are not suitable for use in potentially explosive areas.</p> <ul style="list-style-type: none">• The correct use of the pump/system also includes following these instructions.• Any other use is considered to be incorrect use.

5 Product information

5.1 Type key

The type key consists of the following elements:

Example: SiClean 2	
SiClean	Standard version, manually operated, with inline circulation pump in glandless technology
2	Size of the set

5.2 Technical data

Property	Value	Remarks
Maximum permissible operating pressure	10 bar	-
Maximum permissible fluid temperature	0 °C to +95 °C	-
Ambient temperature min./max.	0 °C to +40 °C	-
Approved fluids	Heating water according to VDI 2035	Other fluids on request
Electrical connection	1~230 V ± 10%, 50 Hz	-

When ordering spare parts, make sure to state all the information given on the pump and motor rating plates.

5.3 Scope of delivery

- SiClean (to be assembled)
- Switchbox
- Installation and operating instructions SiClean
- Installation and operating instructions circulation pump

6 Description and function

6.1 General description

The Wilo-SiClean is a compact unit delivered ready to be assembled. To be attached to wall, or to floor depending on model. Connections have to be made for suction and discharge and also for the power mains.

6.2 Description of the product

Mechanical and hydraulic installation components (Fig. 1)

The SiClean is a complete system delivered as a kit, easy to assemble. It consists of a circulation pump (pos. 2), a separator (pos. 3), a drain valve (pos. 6) and a dynamic balancing valve (pos. 9).

The system is equipped with an automatic air vent (pos. 7) in the upper part to the outlet of the separator.

This installation and operating instructions describe the complete installation of the SiClean.

Circulation pump (pos. 2)

The circulation pump is specific for each SiClean model. For more information on the circulation pump, refer to its installation and operating instructions.

Separator (pos. 3)

The separator is a non-moving part with magnetic elements around a particle separation cylinder.

Switchbox (pos. 1)

For the control of the circulation pump. The attached installation and operating instructions provide further information on the switchbox.

SiClean inlet and outlet connection dimensions

Please find hereafter connection dimensions according to the respective SiClean model.

SiClean...	Inlet	Outlet	Sludge disposal
SiClean 0,5	1/2"	1/2"	3/4"
SiClean 1	3/4"	3/4"	3/4"5
SiClean 2	3/4"	3/4"	3/4"
SiClean 3	1"	1"	1 1/2"
SiClean 4	1 1/4"	1 1/4"	1 1/2"
SiClean 5	1 1/4"	1 1/4"	1 1/2"

6.3 Function of the SiClean system

The SiClean efficiently removes sludge from heating systems by means of natural physical phenomena.

Water from the system enters the separator through the lower pipe. The constant thrust of the circulation pump drives the water slowly first down, then up in the separator. Particles in suspension fall by their own weight into the bottom of the settling chamber. Under the action of polar magnetic field, the ferromagnetic particles accumulate on the inside wall of the separator.

The separator has a "pressure relieving" effect in the fluid flow, and promotes ventilation through the automatic air vent.

Stopping the circulation pump, opening and closing the valves and removing the magnet bars (to eliminate the magnetic field). When the system is drained, the internal housing of the separator is cleaned automatically by a countercurrent flow.

7 Installation and electrical connection

Safety

DANGER! Risk of fatal injury!

Incorrect installation and improper electrical connections can result in fatal injury.

- Have the electrical connections established by approved electricians only, in compliance with the applicable regulations.
- Observe the accident prevention regulations!

CAUTION! Risk of material damage!

Danger of damage due to incorrect handling.

- Have the product installed by qualified personnel only.

NOTE

So as not to perturb the operation of the heating or air-conditioning network, it is essential to maintain a constant pressure in the network. Provide an automatic water supply because of the loss of water due to sludge disposal.

To maintain pressure and ensure water feed you can install a pressure-maintaining system Wilo-WEH/WEV.

7.1 Installation

- Install the SiClean in a room which is easily accessible, well ventilated, frost-proof and protected against rain.
- Ensure that the dimension of the technical room door is adequate to enter the system.
- Adequate space must be provided for maintenance work. The installation should be freely accessible from at least two sides.
- The installation surface must be even and horizontal.

7.2 Assembly

All parts of the system are joined by threaded connections. Use the provided sealing glue to seal the couplings (follow the directions for its use).

CAUTION! Damage to the pump!

Danger of damage due to incorrect handling.

- Do not forget the gaskets for the circulation pump and the hoses.
- Check the flow direction of the balancing valve (pos. 9) and the circulation pump (pos. 2).

NOTE

The inlet/outlet taps (models 0,5/1/2) or the outlet taps (models 3/4/5) pass through the separator, the connections may be made on either the left or the right side. Use the plugs provided to blank the unused ports.

7.3 Hydraulic connection

Whatever the configuration of the installation (new or old), the system must be by-pass connected on the network return (Fig. 2). The diameters of the pipes to which the SiClean is connected must be at least as large as those of the system itself. The suction nozzle must be on the bottom part of the main pipe, the discharge nozzle on the upper part (Fig. 2). The distance between the two nozzles must be at least equal to the height of the separator, to avoid turbulence in the pipes.

- Connect the suction, discharge, and sludge disposal using the diameters stated in the table above. These pipes must be installed free from stresses.
- To isolate the system and allow adjustments and servicing, interpose valves on the suction and discharge lines.
- The sludge evacuation pipe must have a full disconnection to outfall at atmospheric pressure. The diameter of this pipe must be at least as large as that of the flush valve (pos. 6).

7.4 Electrical connection

Safety

DANGER! Risk of fatal injury!

Improper electrical connections can lead to fatal electrical shocks.

- Have the electrical connection established by an electrician approved by the local electricity supplier only, in accordance with local regulations.
- Observe the installation and operating instructions for the accessories!

To make the electrical connection, the corresponding installation and operating instructions and attached electrical circuit diagrams must be observed. General points to be considered are listed below:

- The type of current and voltage of the mains connection must comply with the details on the rating plate and the circuit diagram of the switch box.
- The electrical connecting cable must be adequately dimensioned according to the total power of the system (see rating plate).
- Connect the switch box and the circulation pump with the supplied cable (pos. 16), and refer to the installation instructions of the circulation pump.
- As a protection measure, the system must be earthed according to the regulations (i.e according to the local regulations and circumstances).

8 Commissioning

We recommend that the initial commissioning of SiClean is performed by the nearest Wilo customer service agent or ask your central customer service department.

8.1 General preparation and checking

The balancing valve (pos. 9) controls the differential pressure and adjusts the opening cross-section to maintain the flow at the preset value. The values given in the table below are set in the factory.

SiClean...	Cartidge colour	Cartidge setting
SiClean 0,5	Grey	5
SiClean 1	Red	5
SiClean 2	Black	8
SiClean 3	White	3
SiClean 4	White	4
SiClean 5	Red	7

- Before switching on the system for the first time, check if the wiring has been performed correctly onsite, particularly the earthing.
- Check if the pipe connections are stress-free.

8.2 Filling, ventilation

CAUTION! Damage to the pump!

Dry running will destroy the circulation pump.

- Make sure that the pump does not run dry.
- Close the quarter-turn flush valve (pos. 6) and the air vent valve (pos. 11).
- Open the ventilation shut-off valve (pos. 8).
- Open the valves on the system inlet (pos. 15 and 18) for filling with water.
- After it has been completely filled, open the system outlet valve (pos. 17).
- Fill up the system.
- Check the tightness of the threaded connections.

8.3 Starting the installation

- After all preparations and checks according to section 8.1 "General preparation and checking" on page 20 have been made, switch on the main switch.

CAUTION! Damage to the pump!

Danger of damage due to incorrect handling.

- Do not let the pump operate with a closed pressure valve on delivery side for more than one minute.
The operating flow is adjusted automatically by the dynamic balancing valve (pos. 9).
- Place the polar magnetic elements (pos. 4) along the guide supports on the separator housing.

9 Maintenance

The separator of the SiClean is static. It has no moving parts, thus it does not require special servicing.

We recommend strict compliance with the installation and operating instructions of the pump and the switchbox.

9.1 Emptying

In addition, we recommend flushing the system once a day for the first 15 days after commissioning, once or twice a week thereafter.

DANGER! Risk of burns when body parts come into contact with the pump!

Depending on the pump or system operating conditions (fluid temperature), the entire system can become very hot.

- Keep a safe distance during operation!

- In the case of high water temperatures and system pressures, allow the pump/system to cool down before working on it.
- Always wear protective clothing and gloves when working.
To flush the system, proceed as follows:
 - Stop the circulation pump.
 - Close the shut-off valves (pos. 15 and 17) upstream and downstream of the system.
 - Move the polar magnetic elements (pos. 4) away from the separator housing (pos. 3).
 - Open the flush valve (pos. 6).
 - Open the air vent valve (pos. 11) (allows rapid flushing of the device).
 - After the content completely escaped, close the air vent valve (pos. 11).
 - Open valve (pos. 17) for a few seconds (pressure cleaning of the system).
 - Close the flush valve (pos. 6).
 - Replace the polar magnetic elements (pos. 4) along the separator housing (pos. 3).
 - Make sure that the ventilation shut-off valve (pos. 8) is open.
 - Open the valve (pos. 15) upstream of the device.
 - When the device is completely filled, open the valve (pos. 17) downstream of the device.
 - Fill up the system.
 - Start the circulation pump.

10 Faults, causes and remedies

Safety

Maintenance and repair may only be carried out by qualified personnel!

It is recommended to have the pump serviced and checked by the Wilo Customer Service.

DANGER! Risk of fatal injury!

There is risk of fatal injury due to electrical shock when working on electrical equipment.

- Work on electrical equipment may only be done by electricians approved by the local electricity supplier.
- Before working on electrical equipment, switch it off and secure it against being switched on again.
- Follow the installation and operating instructions for the pump, level control device and other accessories.

DANGER! Risk of burns when body parts come into contact with the pump!

Depending on the pump or system operating conditions (fluid temperature), the entire system can become very hot.

- Keep a safe distance during operation!
- In the case of high water temperatures and system pressures, allow the pump/system to cool down before working on it.
- Always wear protective clothing and gloves when working.

Fault	Cause	Remedy
The circulation pump is noisy	Air in system	Vent the circulation pump. Refer to installation and operating instructions of the circulation pump.
	Suction pressure too low	Increase the pressure in the network
	Foreign bodies in impeller	Clean the impeller. Refer to circulation pump manual.
The circulation pump fails to start	Shaft blocked due to fouling after prolonged shutdown	Refer to circulation pump manual
	No power supply to the circulation pump	
	Capacitor faulty	
	Foreign bodies in impeller	

If the fault cannot be remedied, please contact the trade or your nearest Wilo-After-Sales Service or agent.

11 Spare parts

Spare parts must be ordered via a local specialist retailer and/or Wilo Customer Service.

To avoid queries and incorrect orders, all data on the ratingplate should be submitted with each order.

CAUTION! Risk of material damage!

Trouble-free pump operation can only be guaranteed when original spare parts are used.

- Only use original Wilo spare parts.
- Each component is identified in the table below. Information to be provided when ordering spare parts:
 - Spare part number
 - Name/description of the spare part
 - All data on the pump and motor rating plate

12 Disposal

Proper disposal and recycling of this product prevents damage to the environment and risks to personal health.

Proper disposal requires the drainage and cleaning and the dismantling of the pump unit.

Lubricants must be collected. The pump components are to be separated according to material (metal, plastic, electronics).

1. Use public or private disposal organisations when disposing the entire product or parts of it.
2. For more information on proper disposal, please contact your local council or waste disposal office or the supplier from whom you obtained the product.

NOTE

The product or parts of it must not be disposed of along with household waste.

Further information on recycling can be found at www.wilo-recycling.com

<p>CS Prohlášení o shodě ES Prohlašujeme tímto, že tento agregát v dodaném provedení odpovídá následujícím příslušným ustanovením: Směrnice ES pro strojní zařízení 2006/42/ES Směrnice o elektromagnetické kompatibilitě 2004/108/ES použité harmonizační normy, zejména: viz předchozí strana</p>	<p>PL Deklaracja Zgodności WE Niniejszym deklarujemy z pełną odpowiedzialnością, że dostarczony wyrob jest zgodny z następującymi dokumentami: dyrektywą maszynową WE 2006/42/WE dyrektywą dot. kompatybilności elektromagnetycznej 2004/108/WE stosowanymi normami zharmonizowanymi, a w szczególności: patrz poprzednia strona</p>	<p>RU Декларация о соответствии Европейским нормам Настоящим документом заявляем, что данный агрегат в его объеме поставки соответствует следующим нормативным документам: Директивы ЕС в отношении машин 2006/42/ЕГ Электромагнитная устойчивость 2004/108/ЕГ Используемые согласованные стандарты и нормы, в частности : см. предыдущую страницу</p>
<p>EL Δήλωση συμμόρφωσης της ΕΕ Δηλώνουμε ότι το προϊόν αυτό σ' αυτή την κατάσταση παράδοσης ικανοποιεί τις ακόλουθες διατάξεις: Οδηγίες EK για μηχανήματα 2006/42/EK Ηλεκτρομαγνητική συμβατότητα EK-2004/108/EK Εναρμονισμένα χρησιμοποιούμενα πρότυπα, ιδιαίτερα: Βλέπε προηγούμενη σελίδα</p>	<p>TR CE Uygunluk Teyid Belgesi Bu cihazın teslim edildiği şekilde aşağıdaki standartlara uygun olduğu teyid ederiz: AB-Makina Standartları 2006/42/EG Elektromanyetik Uyumluluk 2004/108/EG kismen kullanılan standartlar için: bkz. bir önceki sayfa</p>	<p>RO EC-Declarație de conformitate Prin prezenta declarăm că acest produs așa cum este livrat, corespunde cu următoarele prevederi aplicabile: Directive CE pentru mașini 2006/42/EG Compatibilitatea electromagnetică – directiva 2004/108/EG standarde armonizate aplicate, îndeosebi: vezi pagina precedentă</p>
<p>ET EÜ vastavusdeklaratsioon Käesolevaga tõendame, et see toode vastab järgmistele asjakohastele direktiividele: Masinadirektiiv 2006/42/EÜ Elektromagnetilise ühilduvuse direktiiv 2004/108/EÜ kohaldatud harmoneeritud standardid, eriti: vt eelmist lk</p>	<p>LV EC – atbilstības deklarācija Ar šo mēs apliecinām, ka šis izstrādājums atbilst sekojošiem noteikumiem: Mašīnu direktīva 2006/42/EK Elektromagnētiskās savietojamības direktīva 2004/108/EK piemēroti harmoniēti standarti, tai skaitā: skatit iepriekšējo lappusi</p>	<p>LT EB atitikties deklaracija Šiuo pažymima, kad šis gaminys atitinka šias normas ir direktyvas: Mašinų direktyvą 2006/42/EB Elektromagnetinio suderinamumo direktyvą 2004/108/EB pritaikytus vienengus standartus, o būtent: žr. ankstesniame puslapyje</p>
<p>SK ES vyhlásenie o zhode Týmto vyhlasujeme, že konštrukcie tejto konštrukčnej súrrie v dodanom vyhotovení vyhovujú nasledujúcim príslušným ustanoveniam: stroje – smernica 2006/42/ES Elektromagnetická zhoda – smernica 2004/108/ES používané harmonizované normy, najmä: pozri predchádzajúcu stranu</p>	<p>SL ES – izjava o skladnosti Izjavljamo, da dobavljene vrste izvedbe te serije ustrezajo sledečim zadevnim določilom: Direktiva o strojih 2006/42/ES Direktiva o elektromagnetični združljivosti 2004/108/ES uporabljeni harmonizirani standardi, predvsem: glejte prejšnjo stran</p>	<p>BG ЕО-Декларация за съответствие Декларираме, че продуктът отговаря на следните изисквания: Машинна директива 2006/42/EO Електромагнитна съместимост – директива 2004/108/EO Хармонизирани стандарти: вж. предната страница</p>
<p>MT Dikjarazzjoni ta' konformità KE B'dan il-mezz, niddikaraw li l-prodotti tas-serje jissodisfaw id-dispozizzjonijiet relevanti li ġejjin: Makkinjaru – Direttiva 2006/42/KE Kompatibbiltà elettromagnetica - Direttiva 2004/108/KE b'mod partikolari: ara l-paġna ta' qabel</p>	<p>HR EZ izjava o usklađenosti Ovim izjavljujemo da vrste konstrukcije serije u isporučenoj verziji odgovaraju sljedećim važećim propisima: EZ smernica o strojevima 2006/42/EZ Elektromagnetska kompatibilnost - smernica 2004/108/EZ primjenjene harmonizirane norme, posebno: vidjeti prethodnu stranicu</p>	<p>SR EZ izjava o usklađenosti Ovim izjavljujemo da vrste konstrukcije serije u isporučenoj verziji odgovaraju sledećim važećim propisima: EZ direktiva za mašine 2006/42/EZ Elektromagnetska kompatibilnost - direktiva 2004/108/EZ primjenjeni harmonizovani standardi, a posebno: vidi prethodnu stranu</p>
