Specificaties

## Altivar ATS490 softstarter, 88 A, 208 tot 690 V AC, stuurspanning 110 tot 230 V AC, Bypass, STO

ATS490D88Y

EAN Code: 3606486948828

**Prijs: 1.924,50 EUR**

### Hoofd

|------------------------------|----|

Schneider Electric wil tegen 2050 de Net Zero-status hebben bereikt via partnerschappen in de toeleveringsketen, materialen met een lagere impact en circulariteit via onze doorlopende campagne "Use Better, Use Longer, Use Again" om de levensduur van producten en de recycleerbaarheid te verlengen.

Mounting and Clearance

**Mounting Position**

---

The soft starter is designed to be mounted inside cabinets vertically at  $\pm 10^\circ$  for cooling purposes. Respect the minimum clearances so that the cooling air can circulate from the bottom to the top of the soft starter. The minimum clearances apply to any device close to the soft starter such as circuit breakers, fuses and contactors. Do not install the soft starter above heating elements.

mm  
in

Connections and Schema

Wiring

Wiring the Power Part

Use class C cables for the power connections.

1/L1, 3/L2, 5/L3 : Mains supply inputs

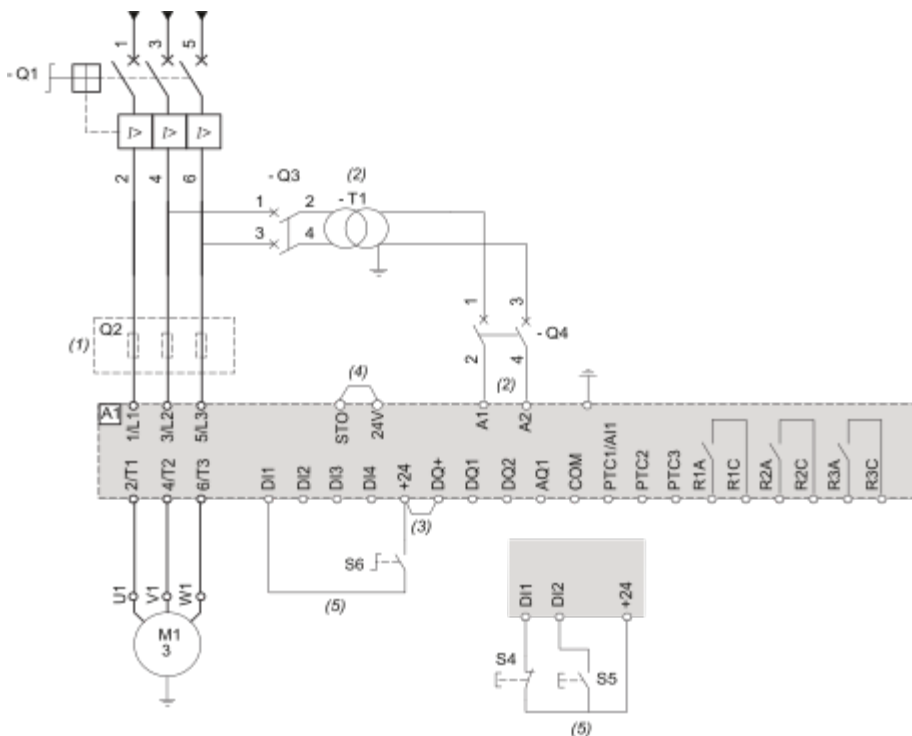

2/T1, 4/T2, 6/T3 : Outputs to motor

(1) : Mains side

(2) : Motor side (bottom)

(3) : Ground connection

**Connection In Line, No Line Contactor, Type 1 or 2 Coordination, 2-wire or 3-wire control**

- (1) : Installation of additional fast-acting fuses is mandatory to upgrade to type 2 coordination according to IEC 60947–4–2.
- (2) : The transformer must supply 110...230 Vac +10% - 15%, 50/60Hz.
- (3) : 24Vdc supply on DQ+ if usage of DQ outputs.
- (4) : STO Safe Torque Off
- (5) : 3–wire control and 2–wire control.

| Designation | Component   | Description  |
|-------------|---|--|
| Q1          | Circuit breaker   | Short circuit protection device for the motor  |
| Q2          | Fast acting fuses   | Short circuit protection device of the soft starter to be used only when type 2 coordination |
| Q3          | Circuit breaker   | Short circuit protection device for the primary of the transformer                           |
| Q4          | Circuit breaker   | Short circuit protection device for the secondary of the transformer                         |
| S4          | Normally close contact push- button                           | STOP command for 3-wire control  |
| S5          | Normally open contact push- button                            | RUN command for 3-wire control   |
| S6          | Selector switch, 2 positions, stay–put, normally open contact | RUN/STOP command for 2-wire control  |

**Connection In Line, With Line Contactor, Type 1 or 2 Coordination, 2-wire or 3-wire control**

Line contactor controlled by Power ON and Power OFF push-buttons or on detected error  
 Use relay output R1 set to [Operating State Fault] (factory setting)

- (1) : Installation of additional fast-acting fuses is mandatory to upgrade to type 2 coordination according to IEC 60947-4-2.
- (2) : Take into account the electrical characteristics of the relays.
- (3) : The transformer must supply 110...230 Vac +10% - 15%, 50/60Hz.
- (4) : 3-wire control and 2-wire control.
- (5) : Select the appropriate voltage surge suppressor.
- (6) : STO Safe Torque Off

|-------------|------------------------------------|--|
| Q1          | Circuit breaker                    | Short circuit protection device for the motor  |
| Q2          | Circuit breaker                    | Short circuit protection device for the primary of the transformer                           |
| Q3          | Fast acting fuses                  | Short circuit protection device of the soft starter to be used only when type 2 coordination |
| Q4          | Circuit breaker                    | Short circuit protection device for the secondary of the transformer                         |
| Q5          | Circuit breaker                    | Short circuit protection device for the control part of the soft starter                     |
| KM1         | Contacteur                         | Line contactor   |
| S1          | Emergency Stop push-button         | Emergency Stop to de-energized KM1 line contactor  |
| S2          | Normally close push-button         | Power OFF  |
| S3          | Normally open push-button          | Power ON   |
| S4          | Normally close contact push-button | STOP command for 3-wire control  |

|    |   |                                     |
|----|---|-------------------------------------|
| S5 | Normally open contact push-button                             | RUN command for 3-wire control      |
| S6 | Selector switch, 2 positions, stay-put, normally open contact | RUN/STOP command for 2-wire control |

**Connection In Line, With Line Contactor, Type 1 or 2 Coordination, 2-wire control**

Line contactor controlled based on RUN & STOP or on detected error.

Use relay output R1 set to [Mains Contactor]

- (1) : Installation of additional fast-acting fuses is mandatory to upgrade to type 2 coordination according to IEC 60947-4-2.
- (2) : Take into account the electrical characteristics of the relays.
- (3) : The transformer must supply 110...230 Vac +10% - 15%, 50/60Hz.
- (4) : 2-wire control and 3-wire control.
- (5) : Select the appropriate voltage surge suppressor.
- (6) : STO Safe Torque Off.

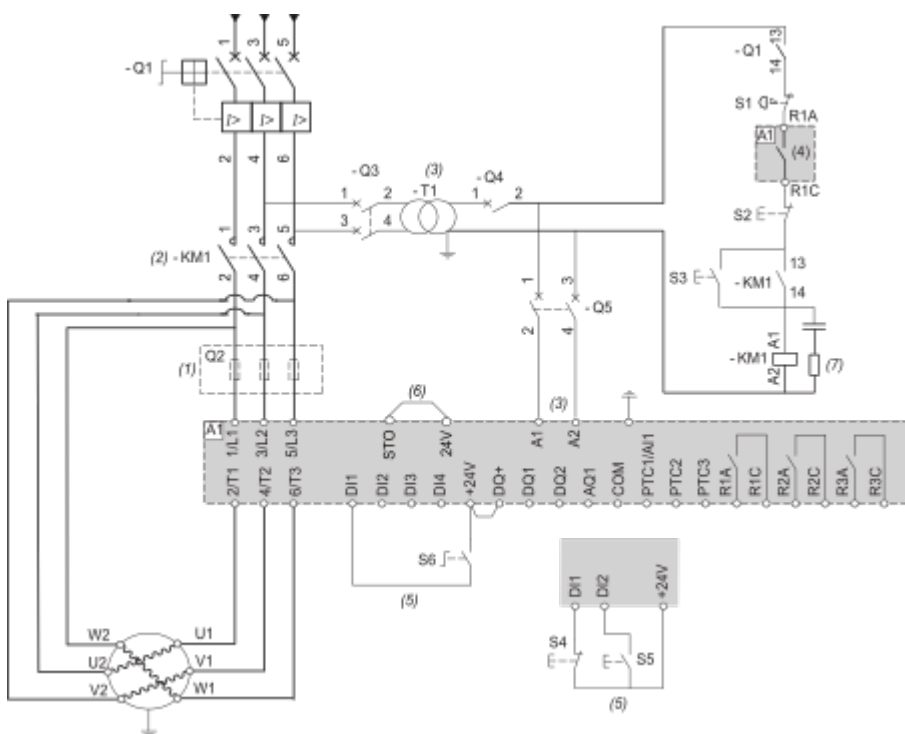

| Designation | Component         | Description   |
|-------------|-------------------|---|
| Q1          | Circuit breaker   | Short circuit protection device for the motor   |
| Q2          | Circuit breaker   | Short circuit protection device for the primary of the transformer  |
| Q3          | Fast acting fuses | Short circuit protection device of the soft starter to be used only when type 2 coordination according to IEC 60947-4-2 is required |
| Q4          | Circuit breaker   | Short circuit protection device for the secondary of the transformer  |
| Q5          | Circuit breaker   | Short circuit protection device for the control part of the soft starter  |

|     |   |   |
|-----|---|---|
| KM1 | Contacteur  | Line contactor                                    |
| S1  | Emergency Stop push-button                                    | Emergency Stop to de-energized KM1 line contactor |
| S4  | Normally close contact push-button                            | STOP command for 3-wire control                   |
| S5  | Normally open contact push-button                             | RUN command for 3-wire control                    |
| S6  | Selector switch, 2 positions, stay-put, normally open contact | RUN/STOP. command for 2-wire control              |

**Connection Inside the Delta, Type 1 and 2 Coordination, 2-wire or 3-wire**

Line contactor controlled based on RUN and STOP command or detected error

Use relay output R1 set to [Operating State Fault] (factory setting).

- (1) : Installation of additional fast-acting fuses is mandatory to upgrade to type 2 coordination according to IEC 60947-4-2.
- (2) : KM1 is mandatory to avoid uncontrolled voltage on the motor.
- (3) : The transformer must supply 110...230 Vac +10% — 15%, 50/60Hz.
- (4) : Take into account the electrical characteristics of the relays, especially when connecting to high rating contactor.
- (5) : 3-wire control, 2-wire control.
- (6) : STO Safe Torque Off.
- (7) : Select the appropriate voltage surge suppressor.

Control Block Wiring Diagram

R1A, R1C, R2A, R2C, R3A, R3C : Programmable NO relays

DI1, DI2, DI3, DI4 : Digital inputs

AQ1 : Analogue output

PTC1/AI1, PTC2, PTC3 : Motor thermal sensor connection

DQ1, DQ2, DQ+ : Digital outputs

STO : Safety function STO input

(1) : STO Safe Torque Off

(2) : 2 wire PTC/PT100/PT1000/KTY

(3) : Optional, in case of +24 External Supply usage

PT100, PT1000 Thermal Probe 3 Wires :

(4) : 3 wire PT100/PT1000
