2.2 National export control list / U.S. EAR

Indicate the list (incl. revision date or number) checked for entry matches.

Regulation (EU) 2021/821

3 Classification and U.S. content calculation

3.1 Possible entry matches

Search the export control list for potential hardware / software / technology entry matches by index / full text / synonyms; similar products / similar functions /; parts / components / elements. List the catchwords and corresponding entry matches.

"Light switch"; "Socket outlet"; "Thermostat"; "Rocker"; "Toilet"; "Tele outlet"; "Ceiling rose"; "Conduit"; "Mounting"; "Junction"; "Interconnector"; "Inlet" - No match for all these catch words.

Source:

https://www.bis.gov/search?search_api_fulltext_op=and&search_query=Light+switch&search_type_filter=All

3.2 National classification

Check whether relevant conditions of the possible entry matches are met taking into account the General Notes (NTN / GTN / GSN), Notes (category level). Notes / N.B.s (item level) and Technical Notes

- List all entry matches where mandatory conditions are not met and the conditions that are not met.
- List all entry matches where the mandatory conditions are met; take the exceptions into account.
- Enter 'ECN = N' in the document heading if b) above is empty.
- Enter the most restrictive entry matches for hardware / software / technology in the document heading.
- Provide a short explanation of the result as per d) above.
- Provide additional information such as general licenses or potential export restrictions for product spare parts.

Neither do the potential catchword matches apply to the product description 1.1. above nor does the correlation list indicate potential ECNs for the relevant HS codes.

ECN = N

3.3 U.S. de-minimis calculation

- Check the product parts, components and elements for U.S. content.
- Check whether the U.S. content is eligible under de-minimis . Indicate valid one-time reports of software / technology.
- Calculate the U.S. content percentage value by dividing the landed cost of the U.S. content by the corresponding portion of the product sales price as per item 1.2 above.
- Enter 'not subject to the EAR' in the document heading if the figures calculated under c) do not 10% respectively 25%.
- Enter 'EAR99' in the document heading if d) is not true and the non-controlled U.S. content exceeds 10% or 25%.
- Enter the most restrictive entry matches for hardware / software / technology in the document heading.
- Provide a short explanation of the result as per f) above.
- Provide additional information such as license exceptions or potential export restrictions for product spare parts.

The US content of the mentioned products doesn't exceed 10%

Conclusion: ECCN=N (not subject to the EAR)
