

# Product data sheet Spirotech

## Product name

**SpiroCombi -DN250 -Flange -HiFlow**

## Product properties

A steel (microbubble) deaerator and dirt separator for high flow rate (3 m/s) with a DN50 - DN300 PN16 flange connection

- Applicable for high flow rate systems (3 m/s)
- Applicable with 50/50 Ethylene Glycol / Water (Volume)
- Combined separation system - removes circulating air and microbubbles effectively
- Improve cost control and energy efficiency
- Very small particles, from 5  $\mu\text{m}$  (= 0.005 mm), are separated and removed
- Dirt can be discharged while the system is in operation
- No shut-off valves or bypass required
- Constant low pressure drop
- PN16 flange connections
- Connection diameters from DN50 - DN300, larger connection diameters on request
- Exceptional guarantee

## Article number

**HC250F**

## Product image

## Product dimensions

# Product data sheet Spirotech

## ETIM product data

Housing material	Steel	Construction length	890 mm
With drain valve	Yes	Article compression class	PN 10
Housing material quality	St 37 (1.0254)	Surface protection	Lacquered
Backwash filter	No	Suitable for open system	No
Medium temperature (continuous)	0 - 110 °C	Suitable for closed system	Yes
Max. operating pressure	10 bar	Suitable for solar	No
KVS value [m <sup>3</sup> /h] at ΔP 1 bar	1095.5	With dismountable filter	No
Variable flow direction	Yes	Filter volume	500 l
With insulation	No	Magnet operating principle	No
Separator type	Air/dirt	With automatic de-aerator	Yes
Connection	Flange	Cleaning possible during operation	Yes
Model	Horizontal	With couplers	No
Nominal diameter	DN 250	Inlet/outlet offset distance	0 mm
Max. glycol mixture	50 %	Material of connection	Steel
Suitable for heating	Yes	Flow-through capacity	0 - 575 m <sup>3</sup> /h
Suitable for cooling	Yes	Flange standard	DIN
