TRONIX

Before first use

Before getting started with this product, it is advisable to check the order completeness and any damage. If this is the case, please contact Tronix Lighting.

Description

This LED Slim Wall Pack lamp has a slim design and is designed for long life without maintenance.

Features

- Very low light nuisance compared to traditional Wall Packs;
- Excellent rainwater protection thanks to IP66 rating;
- Lightweight design;
- RAL7024 finish making it compatible with Streetlights RAL7024;
- Can be combined with Photocell day/night sensor (see related products).

Installation

1. Turn off the power, remove the product and associated parts from their packaging and check the wiring present before installation;
2. Open the Wallpack and underlying protection to access the wiring and driver;
3. Remove the inner plate by loosening the screws. This gives you access to the drill holes on the back of the Wallpack;
4. Press the back plate against the wall, pull the cable through the indicated hole and attach the plate;
5. Replace the interior and connect it. Check the wiring and then close the Wallpack using the cover;
6. Check the complete installation after the Wallpack is attached. Should it be in order, the mains power can be reactivated.

Safety

Safety is a top priority at Tronix Lighting. Therefore, we heartily recommend that you follow the following steps closely:

- Keep this manual carefully for future reference;
- Choose a qualified electrician while installing, maintaining or inspecting this product;
- Never look directly into a light source to avoid possible damage to the eye;
- Always ensure that the relevant power group is on non-active when the product is connected;
- Use only recommended combinations (LED drivers, controllers or dimmers) to avoid injury or damage to the product.

Technical problems and repair

Should a product not work properly after installation, or if the product exhibits problems over time, it is advisable to check the following elements:

- Check the wiring and installation of your product;
- Check for the presence of disruptive elements such as dust, water or other electronics;
- Should it be possible, try disconnecting the product and testing it in another location to rule out a problem at the location;

Should you be dealing with a WIFI-based product, check and reset your router's settings.

Should the product still not work after testing, it is recommended to send it in for inspection and/or repair. To do so, please contact Tronix Lighting using nearby details and proof of purchase (packing slip).
