

xComfort Compact Distribution Boxes

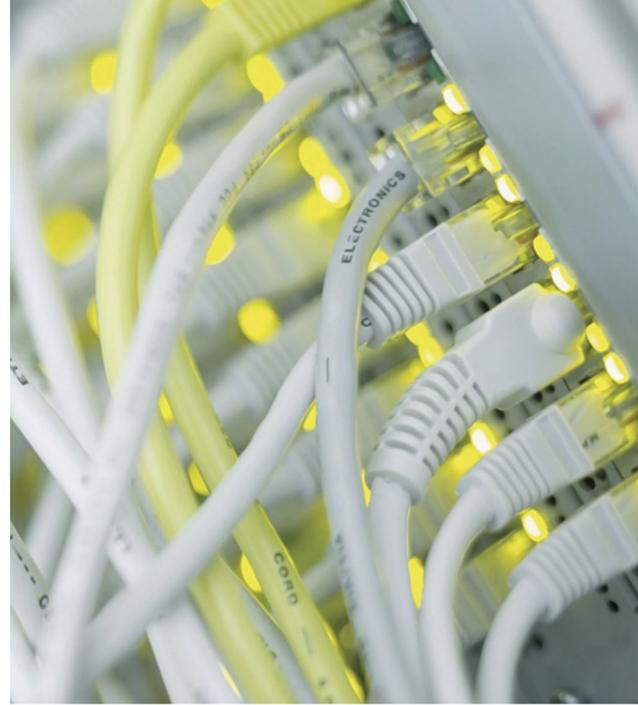

Home match for a safe electrical installation system

Assortment catalog

EATON

Powering Business Worldwide

Powering electrical systems worldwide

Public and private sectors

Buildings, Information Technology, Industrial & Machinery, Energy & Utilities
We provide reliable, efficient and safe power management.

Buildings

- Residential
- Healthcare
- Education
- Commercial offices
- Retail
- Public sector
- Airports
- Electrical distribution solutions for safe and efficient power delivery
- Power quality systems for uptime and reliability
- Power metering and monitoring to add intelligence and save costs
- Industrial control products for HVAC applications

Information Technology

- Data centers
- Telecommunication
- Networks
- Computer rooms
- World's most efficient line of UPSs to reduce footprint and save energy
- Reliable power systems with inherent redundancy to improve availability
- Power metering and monitoring to diagnose problems and lower costs
- Local service and support for quick response

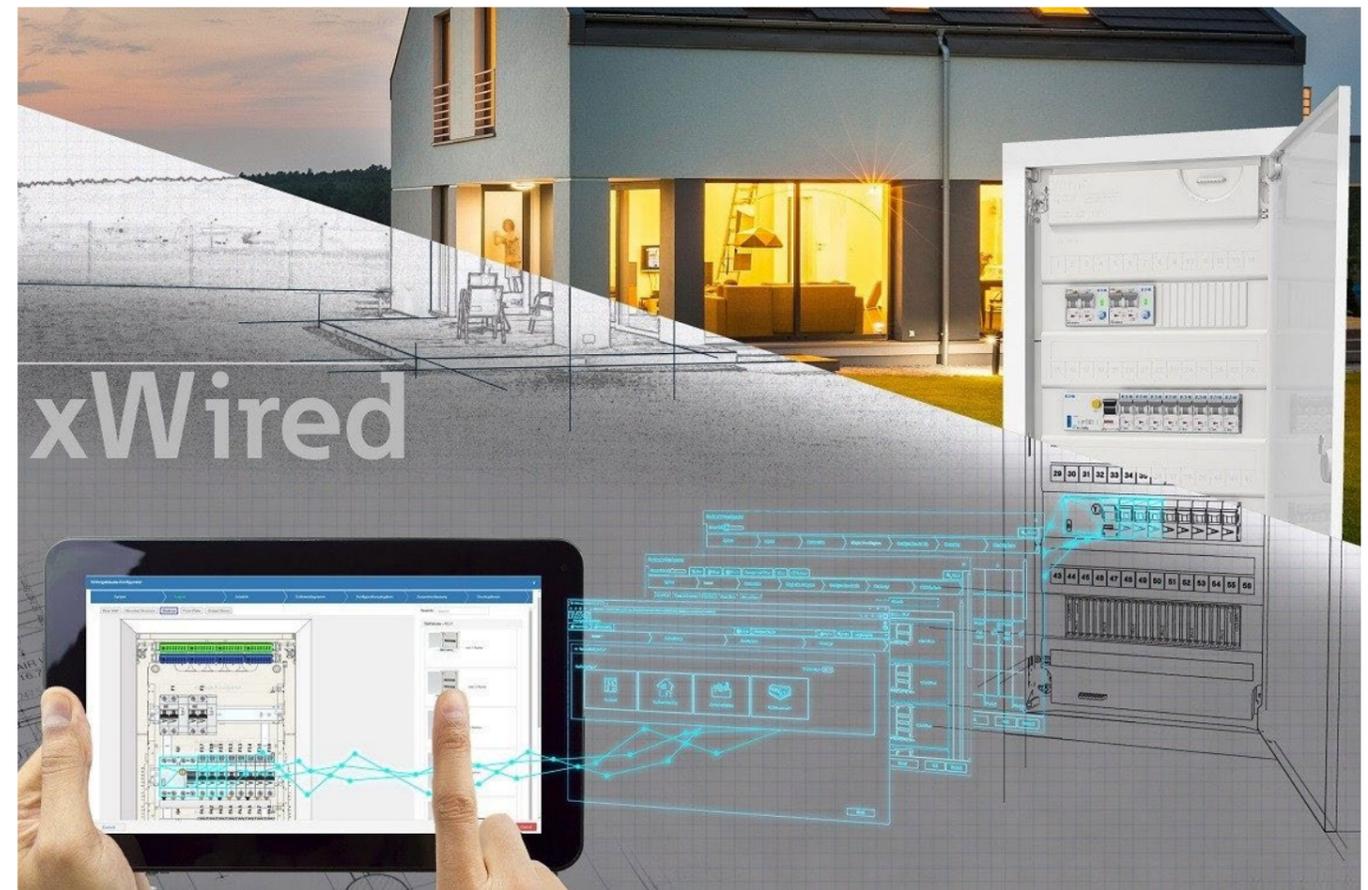

Industrial & Machinery

- Manufacturing
- Agriculture
- Construction
- Mining and metals
- Processing:
 - Petrochemicals
 - Pharmaceuticals
 - Pulp and paper
- Material handling
- Electrical distribution equipment to deliver power throughout the enterprise
- Control & automation and power quality equipment for process control
- Power metering and monitoring to manage energy costs and uptime
- Power and motion control products to optimize productivity, reliability, safety and operator comfort

Energy & Utilities

- Renewable energy:
 - Solar
 - Wind
 - Hydropower
- Traditional energy:
 - Oil
 - Gas
- Smart grid
- Water and waste water
- Electrical balance of system and turnkey services for residential, utility and commercial solar installations
- Power distribution equipment, control components and system installations services
- Network power grid technology for intelligent data, lower costs and crew/public safety

We make what matters work.*

Distribution board configurator xWired for different types of buildings.

The xWired configurator from Eaton is a multifaceted, web-based configuration tool for electrical distribution systems from residential construction to small commercial buildings. Based on the electrical installations specified in the floor plan, electricians can use it to create a standard-compliant, documentation-ready system for different types of buildings in just a few steps. The tool then transmits all the necessary documents, including the parts list, the wiring and installation plan and the associated type plate.

Included features

- Configurator for electrical distribution boards in residential and commercial buildings
- Simple, fast and intuitive configuration
- Clear and precise visualization
- Output of standard-compliant documentation at the push of a button
- Editable at any time
- Plug & Work - fully wired and tested by Eaton

* At Eaton, we believe that power is a fundamental part of just about everything people do. That's why we're dedicated to helping our customers find new ways to manage electrical, hydraulic and mechanical power more efficiently, safely and sustainably. To improve people's lives, the communities where we live and work, and the planet our future generations depend upon. Because this is what really matters. And we're here to make sure it works.

Description

MICRO-... and MINI-....

- Degree of protection IP20 or IP30
- Protection class II, totally insulated
- Either with or without a window
- 1-row; 2, 3, 4, 5 and 6 MU
- High-quality ABS plastic
- Glow wire test 650 °C
- Support rail made of plastic
- Possibility of direct fixing on the wall
- Pre-punched metric areas for cable entry all around
- Lead-sealable window
- Body RAL 9003, door transparent

Rows / MU Description Version Type Designation Article No. Pack (pcs.)

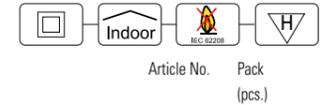

KLV flush-mounted/hollow-wall Compact Distribution Boards, IP30

IP30, Flush-mounted, combined push-in terminal KSK

- Approved according to IEC/EN 60670-24 and IEC/EN 62208, i.e. for distributions according to IEC/EN 61439-3
- N/PE combined push-in terminal, finger-proof IP2X with combined push-in and screw-technology, terminal points are easy to add to the carrier, with a separate N-FI terminal block (FI = RCD).
- Self-extinguishing plastic, resistant to abnormal heat and fire up to 650 °C, glow-wire test according to IEC/EN 62208
- Door with frame made of sheet steel, with 3D plaster compensation (compensation possible up to 18 mm), colour RAL 9016, flat (F)
- Stable device cover made of plastic, with cut-outs for DIN switchgear and protective devices, 12+2 MU per row, 90° four-point lock, leadsealing is possible, laser-labelled rating plate
- Wall pan made of plastic with integrated spirit level
- DIN rails galvanised, stable design with crossbars, 125 mm distance between rows
- Wiring duct at the side, with cable holder for clearly structured wiring
- Cable insertion slide with pre-marked holes and snap-on fixing
- Door hinges are easy to inverse, hinges for manual handling
- Flat rotary closure of the door, can be replaced by one of the lock versions
- Nail straps for fixing on the wall

Flush-mounted UPP (combined push-in terminal KSK)

	4 / 48+8	with 1x N/PE combined push-in terminal, 4x 2.5-25 mm ² each and 28x 0.5-4 mm ² each with separate N-FI terminal block	flat	KLV-48UPP-F	178804	1/45
	5 / 60+10	with 1x N/PE combined push-in terminal, 4x 2.5-25 mm ² each and 28x 0.5-4 mm ² each plus separate N and PE terminal blocks 1x 2.5-25 mm ² and 7x 0.5-4 mm ² each	flat	KLV-60UPP-F	302410	1/30

Rows / MU Description Version Type Designation Article No. Pack (pcs.)

IP30, Hollow-wall, combined push-in terminal KSK

- Approved according to IEC/EN 60670-24 and IEC/EN 62208, i.e. for distributions according to IEC/EN 61439-3
- N/PE combined push-in terminal, finger-proof IP2X with combined push-in and screw-technology, terminal points are easy to add to the carrier, with a separate N-FI terminal block (FI = RCD).
- Self-extinguishing plastic, resistant to abnormal heat and fire up to 850 °C, glow-wire test according to IEC/EN 62208
- Door with frame made of sheet steel, with 3D plaster compensation (compensation possible up to 18 mm), colour RAL 9016, flat (F)
- Stable device cover made of plastic, with cut-outs for DIN switchgear and protective devices, 12+2 MU per row, 90° four-point lock, leadsealing is possible, laser-labelled rating plate
- Wall pan made of plastic with integrated spirit level
- DIN rails galvanised, stable design with crossbars, 125 mm distance between rows
- Wiring duct at the side, with cable holder for clearly structured wiring
- Cable insertion slide with pre-marked holes and snap-on fixing
- Door hinges are easy to inverse, hinges for manual handling
- Flat rotary closure of the door, can be replaced by one of the lock versions
- Hollow-wall anchor for fixing in a hollow wall

Hollow-wall mounting HWP (combined push-in terminal KSK)

	1 / 12+2	with 1x N/PE combined push-in terminal, 2x 2.5-25 mm ² each and 14x 0.5-4 mm ² each	flat	KLV-12HWP-F	178806	1/90
	2 / 24+4	with 1x N/PE combined push-in terminal, 2x 2.5-25 mm ² each and 14x 0.5-4 mm ² each 1x N-FI single terminal with 1x 2.5-25 mm ² and 7x 0.5-4 mm ²	flat	KLV-24HWP-F	178808	1/60
	3 / 36+6	with 1x N/PE combined push-in terminal, 4x 2.5-25 mm ² each and 28x 0.5-4 mm ² each with separate N-FI terminal block	flat	KLV-36HWP-F	178810	1/60
	4 / 48+8	with 1x N/PE combined push-in terminal, 4x 2.5-25 mm ² each and 28x 0.5-4 mm ² each with separate N-FI terminal block	flat	KLV-48HWP-F	178812	1/45
	5 / 60+10	with 1x N/PE combined push-in terminal, 4x 2.5-25 mm ² each and 28x 0.5-4 mm ² each plus separate N and PE terminal blocks 1x 2.5-25 mm ² and 7x 0.5-4 mm ² each	flat	KLV-60HWP-F	302412	1/30

IP30, Flush-mounted, screw-type terminal

- Approved according to IEC/EN 60670-24 and IEC/EN 62208, i.e. for distributions according to IEC/EN 61439-3
- N/PE screw-type terminal, with electric shock protection, additional terminal points are easy to add
- N-FI (FI = RCD) expansion terminal, comes as a standard feature in distribution boards with 2 to 4 rows, additional N-FI terminals of the accessories range can be added
- Self-extinguishing plastic, resistant to abnormal heat and fire up to 650 °C, glow-wire test according to IEC/EN 62208
- Door with frame made of sheet steel, with 3D plaster compensation (compensation possible up to 18 mm), colour RAL 9016, flat (F)
- Stable device cover made of plastic, with cut-outs for DIN switchgear and protective devices, 12+2 MU per row, 90° four-point lock, leadsealing is possible, laser-labelled rating plate
- Wall pan made of plastic with integrated spirit level
- DIN rails galvanised, stable design with crossbars, 125 mm distance between rows
- Wiring duct at the side, with cable holder for clearly structured wiring
- Cable insertion slide with pre-marked holes and snap-on fixing
- Door hinges are easy to inverse, hinges for manual handling
- Flat rotary closure of the door, can be replaced by one of the lock versions
- Nail straps for fixing on the wall

Flush-mounted UPS (screw-type terminal SK)

	1 / 12+2	with 1x N/PE screw-type terminal 13x 0.75-16 mm ² (N) and 13x 0.75-16 mm ² (PE)	flat	KLV-12UPS-F	178814	1/90
	2 / 24+4	with 1x N/PE screw-type terminal 13x 0.75-16 mm ² (N) and 16x 0.75-16 mm ² (PE) plus separate N-FI terminal with 2x 0.75-16 mm ² and 2x 0.75-25 mm ²	flat	KLV-24UPS-F	178816	1/60
	3 / 36+6	with 2x N/PE screw-type terminal 25x 0.75-16 mm ² (N) and 25x 0.75-16 mm ² (PE) plus separate N-FI terminal with 2x 0.75-16 mm ² and 2x 0.75-25 mm ²	flat	KLV-36UPS-F	178818	1/60
	4 / 48+8	with 2x N/PE screw-type terminal 25x 0.75-16 mm ² (N) and 25x 0.75-16 mm ² (PE) plus separate N-FI terminal with 2x 0.75-16 mm ² and 2x 0.75-25 mm ²	flat	KLV-48UPS-F	178820	1/45
	5 / 60+10	with 2x N/PE screw-type terminal 32x 0.75 - 16 mm ² (N) and 32x 0.75 - 16 mm ² (PE) plus separate N-FI terminal with 2x 0.75-16 mm ² and 2x 0.75-25 mm ²	flat	KLV-60UPS-F	302414	1/30

Cross sections of connections and other important information

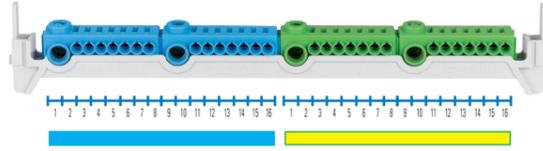

- Per block 1x screw-type connection for 2.5-25 mm² (single-wired/multiwired) or 2.5-16 mm² (fine-wired with professionally pressed wire end sleeve).
- Per block 7x push-in connection for 0.5-4 mm² (single-wired/multiwired or fine-wired with professionally pressed wire end sleeve).
- The tightening torque [Nm] of the screw connection is indicated on the terminal enclosure.
- Minimum connection length in case of a push-in connection is indicated on the terminal enclosure.
- Max. electrical load 63 A / 400 V AC
- Degree of protection IP2X

- High safety level thanks to finger-proof plastic encapsulation, degree of protection IP2X
- N potential in blue colour, protective-conductor potential in green colour
- Modular as the additional block can be plugged onto the terminal carrier without any tools to provide additional separate RCD protective circuits. Up to 4 blocks per terminal carrier, up to 4 terminal carriers in each distribution board.
- Separate blocks can be interlinked using cable links.
- We recommend 4 mm² (rigid or flexible with wire end sleeve).
- Vertical offset for terminal carriers in the distribution board to provide easy access to the connections and easy snap-on in the distribution board.

Description

KLV-...HY24... and KLV-...HY36...

- 5-rows, 24 or 36 module units
- Hollow-wall and flush-mounted versions
- Versions with/without WiFi door
- Flat door design
- Integrated spirit level
- 3D plaster compensation
- Neutral and protective conductor terminals
- N-FI expansion terminal (FI = RCD = Residual Current Device)
- Pre-marked cable entries on all sides
- Degree of protection IP30
- Door and cover frame, sheet steel RAL 9016
- Micro-perforated mounting plate
- Cable holders
- Device holder
- Rotary power socket (Euro2)
- IEC/EN 60670-24 (PD) und EN 62208

KLV flush-mounted/hollow-wall Hybrid Distribution Boards, IP30

KLV flush-mounted/hollow-wall Hybrid Distribution Boards, IP30

- 5-row wall pan
- According to IEC/EN 60670-24 (PD) and IEC/EN 62208, i.e. released for distributions according to IEC/EN 61439-3
- N/PE combined push-in terminal, finger-proof IP2X with combined push-in and screw-technology, terminal points are easy to add to the carrier, with a separate N-FI terminal block (FI = RCD)
- Self-extinguishing plastic, resistant to abnormal heat and fire up to 650 °C (flush-mount) and 850 °C (hollow-wall), glow-wire test according to IEC/EN 62208
- Door with frame made of sheet steel, with 3D plaster compensation (compensation possible up to 18 mm), colour RAL 9016, flat (F)
- Door with ventilation louvers, optionally with WiFi door insert
- Stable device cover made of plastic, with cut-outs for DIN switchgear and protective devices, 12+2 MU per row, four-point lock, leadsealing is possible, laser-labelled rating plate
- Wall pan made of plastic with integrated spirit level
- DIN rails galvanised, stable design with crossbars, 125 mm distance between rows
- Wiring duct at the side, with cable holder for clearly structured wiring, device holder for routers
- Rotary power socket incl. EURO2 adapter with push-in terminal up to 2.5 mm²
- Microperforated mounting plate for telecommunication devices of protection class II
- Suitable for equipment of up to 80 mm max. depth
- Cable guidance slide with snap-on fixing
- Doors are easy to inverse, hinges for manual handling, flat rotary closure of the door, can be replaced by lock version
- Nail straps for fixing on the wall (flush-mounting only), Hollow-wall anchor for fixing in a hollow wall (hollow-wall mounting only)
- Protection class II when using insulated devices on the mounting plate

Flush-mounting UPP HY (push-in terminal KSK)

	2 / 24+4	with 1x N/PE combined push-in terminal, 2x 2.5 - 25 mm ² each and 14x 0.5 - 4 mm ² each and 1x N-FI terminal with 1x 2.5 - 25 mm ² and 7x 0.5 - 4 mm ²	flat	KLV-60UPP-HY24-F	302426	1/30

Description

KLV-...UP and KLV-...HW

- 3- to 5-rows
- Hollow-wall and flush-mounted versions
- Flat door design
- Variants with WiFi door
- Integrated spirit level
- 3D plaster compensation
- Top row carrier rail
- Micro-perforated mounting plate
- Cable holder
- Device holders
- Rotary power socket (Euro2)
- Pre-marked cable entries on all sides
- Degree of protection IP30
- Door and frame, sheet steel RAL 9016
- Low halogen level
- IEC/EN 62208 and IEC/EN 60670-24 (GP)

Rows / DIN / MPL	Description	Version	Type Designation	Article No.	Pack (pcs.)
------------------	-------------	---------	------------------	-------------	-------------

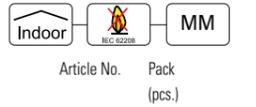

KLV flush-mounted/hollow-wall Multimedia Distribution Boards, IP30

IP30

- According to IEC/EN 62208 and IEC/EN 60670-24 (GP)
- Door with ventilation slots and frame made of sheet steel
- 1 DIN rail, e.g. for accommodating patch modules, mounting plate for telecommunication devices
- Device and cable holders for clear arrangement of devices
- Rotary power socket incl. EURO2 adapter with push-in terminal up to 2.5 mm²
- Suitable for equipment of up to 80 mm max. depth
- Wall pan made of plastic with integrated spirit level
- Cable guidance slide with snap-on fixing
- Door with frame made of sheet steel, with 3D plaster compensation (compensation possible up to 18 mm), colour RAL 9016, flat (F)
- Door hinges are easy to inverse, hinges for manual handling
- Flat rotary closure of the door, can be replaced by one of the lock versions
- Hollow-wall anchor for fixing in a hollow wall (hollow-wall mounting only)
- Nail straps for fixing on the wall (flush-mounting only)
- Connection brackets for linking wall pans in pairs or fixing them on flush-mounted or hollow-wall mounted compact distribution boards KLV-UP..., KLV-HW...

Description

KLV-...-4PR

- Same content as flush-mounted/hollow-wall or multimedia distribution boards
- Delivery form optimized for projects
- Finish in 2 or 3 steps
- N/PE combined plug-type terminals
- Multimedia

Description	Rows / MU	Type Designation	Article No.	Pack (pcs.)
-------------	-----------	------------------	-------------	-------------

KLV-...4PR Delivery Form for Projects - Flush-mounted/Hollow-wall

IP30

- Delivery form for projects, separate ordering and delivery of assemblies: Wall pan + equipment set
- Approved according to IEC/EN 60670-24 and IEC/EN 62208, i.e. for distributions according to IEC/EN 61439-3
- Wall pan, empty, optionally for flush-mounting or hollow-wall mounting
- Equipment set with door and frame in flat design
- Technical parameters same as Compact Distribution Boxes KLV-...

Delivery Form for Projects - Wall pan

Description

IKA-...-UV ; IKA-...-ST and IKA-...-OT

- Degree of protection IP65
- Protection class II, totally insulated
- Industrial version (PC) or PRO/Standard version (ABS)
- 1 to 4-rows, 12 and 18 module units
- Mini module with 4, 6 and 8 module units
- Glow wire test 850 °C or 650 °C
- CNC foamed sealing
- Fully removable DIN support rack
- Up to 46 mm wiring area under the DIN rail
- Module tolerance compensation in the cover

- Possibility of direct fixing on the wall
- Depth-adjustable DIN rail
- Neutral and protective conductor terminals
- Fast and easy inversion of the door hinges
- Pre-punched metric areas for cable entries
- Intuitive locking and unlocking of the door
- Body RAL 7035, door transparent
- Halogen-free

System Overview IKA surface-mounted Compact Distribution Boxes

Compact Distribution Boxes Version	Protection class II (totally insulated)	Complies with European Standard EN 62208	IP65	RAL 7035	N/PE terminals	Doors transparent	Outdoor (UV resistant, ISO 4892-2)
Industrial	■	■ ¹⁾	■	■ ²⁾	■	■	■ ³⁾
Professional	■	■ ¹⁾	■	■ ²⁾	■	■	-
Standard	■	■ ¹⁾	■	■ ²⁾	-	■	-

¹⁾ Pre-requisite for building distribution boxes from empty enclosures according to IEC/EN 61439-3

²⁾ Body and cover frame, door is transparent

³⁾ Eaton nevertheless recommends not to expose the product to direct solar radiation

Legend IKA surface-mounted Compact Distribution Boxes

Symbol	Explanation
	Totally insulated, according to EN 60670-24.
	Only for indoor applications.
	For indoor applications and outdoor applications. Outdoor use under canopy is recommended.
	Resistance to abnormal heat and fire according to IEC/EN 62208.
	Final product UV resistant according to ISO 4892-2.

IKA-...UV Compact Distribution Boxes, Industrial

IP65 (IK08)

- Surface-mounted
- Protection class II, totally insulated
- Industrial version completely made of high-quality polycarbonate, UV resistant according to ISO 4892-2
- 1 to 4-rows, 12 and 18 module units
- Mini module with 4, 6 and 8 module units
- Fully removable DIN support rack in distribution boxes containing several rows
- Up to 46 mm space under the DIN rail to allow for convenient laying of the cables
- Module tolerance compensation integrated in the cover frame
- Possibility of direct fixing on the wall, no need to drill holes into the enclosure
- Depth-adjustable DIN rail, 150 mm distance between the rows
- Neutral and protective conductor terminals, IP2X protection against insertion of fingers, with solid screw-technology
- Fast and easy inversion of the door hinges
- Side panels with pre-punched metric areas for cable entries
- Intuitive locking and unlocking of doors, cylinder lock optionally with accessories
- Body RAL 7035, door transparent
- Glow wire test 850 °C
- Halogen-free

IKA-...OT Compact Distribution Boxes, Standard

IP65 (IK08)

- Surface-mounted
- Protection class II, totally insulated
- Standard version: Body made of ABS, door made of polycarbonate
- No neutral and protective conductor terminals, no cover for spare areas
- 1 to 4-rows, 12 and 18 module units
- Mini module with 4, 6 and 8 module units
- Fully removable DIN support rack in distribution boxes containing several rows
- Up to 46 mm space under the DIN rail to allow for convenient laying of the cables
- Module tolerance compensation integrated in the cover frame
- Possibility of direct fixing on the wall, no need to drill holes into the enclosure
- Depth-adjustable DIN rail, 150 mm distance between the rows
- Fast and easy inversion of the door hinges
- Side panels with pre-punched metric areas for cable entries
- Intuitive locking and unlocking of doors, cylinder lock optionally with accessories
- Body RAL 7035, door transparent
- Glow wire test 650 °C
- Halogen-free

Description

IKA-...-C

- Degree of protection IP65
- Protection class II, totally insulated
- Plastic ABS
- 1-row, 12 and 18 module units
- Glow wire test 650 °C
- CNC foamed sealing
- Up to 46 mm wiring area under the DIN rail
- Module tolerance compensation in the cover
- Possibility of direct fixing on the wall
- Depth-adjustable DIN rail
- Neutral and protective conductor terminals
- Fast and easy inversion of the door hinges
- Pre-punched metric areas for cable entries
- Intuitive locking and unlocking of the door
- Individual assembly with RMQ command and signaling devices and socket outlets
- Body RAL 7035, door transparent
- Halogen-free

Description

BC-A2-x/xx-DW

- 1 to 3 rows, 12 MUs / row
- 1 to 3 rows, 18 MUs / row
- Protection class II, totally insulated.
- Degree of protection IP40
- Glow wire test 650 °C
- Neutral and Protective-earth screw type conductor terminals
- Fully removable DIN support rack
- All the bases are reversible, to select the direction of the cable inputs according to installation requirements.
- Halogen-free plastic materials.
- Mounting inserts incl. Door and Frame, ABS White RAL 9003
- Depth-adjustable DIN rail
- 125mm DIN rail distance
- Up to 30 mm wiring area under the DIN rail
- Pre-punched metric areas for cable entries
- The top side has horizontal and vertical marks of 4mm to cut the cable entry holes as required.
- Spirit Level for precise alignment
- Fast and easy inversion of the door hinges

IP40, Surface-mounted Enclosure, screw-type terminal

- Approved according to IEC/EN 60670-24 and IEC/EN 62208, i.e. for distributions according to IEC/EN 61439-3
- Surface Mounted.
- Protection class II, totally insulated.
- 1 to 3 rows, 12 or 18 module units per row.
- N/PE screw-type terminal bars with the bar-holder support, attached by a clip system for quick and safe installation.
- Resistant to abnormal heat and fire up to 650 °C, glow-wire test according to IEC/EN 62208
- Base, frame and door made of ABS plastic, white RAL 9003.
- Stable frame, with cut-outs for DIN switchgear and protective devices.
- DIN rails galvanized, Depth-adjustable, 125 mm distance between rows.
- Fully removable DIN support rack in distribution boxes containing several rows.
- Up to 30 mm wiring area under the DIN rail
- Door hinges are easy to inverse, hinges for manual handling.
- All the bases are reversible, to select the direction of the cable inputs according to installation requirements.
- Pre-punched metric areas for cable entries
- The top side has horizontal and vertical marks of 4mm to cut the cable entry holes as required.
- Halogen-free plastic materials

Description

BF-U-3S...-D125

- Setup of the distribution board is based on a 3-step principle (wall pan / mounting insert + DIN frame + door)
- 2 to 7 rows, 24 MUs / row
- 4 to 7 rows, 33 MUs / row
- Protection class I
- Degree of protection IP30
- Complete types incl. neutral and protective-earth screw type conductor terminals
- Wall pan (galvanized) prepared for cable insertion at the top/ bottom
- Mounting inserts incl. door and cover frame
- Metal front plates with contact point at the enclosure
- Flat metal door design
- 150 mm DIN rail distance (ideal for switchgear busbar system)
- Multimedia door can be ordered as an accessory
- Prepared enclosures and can be used as media distribution boards

Type key (24 or 33 MU / row)

Description

- Setup of the distribution board is based on a 2-step principle (wall pan / mounting insert + door)
- Installation depth of only 100 mm (especially suitable for hollow walls of reduced wall thickness)
- 2- to 6-rowss 24 MUs/row
- 4- to 6-rowss 33 MUs/row
- Degree of protection IP30
- Protection class I
- Complete types incl. neutral and protective conductor terminals
- Wall pan (galvanized) prepared for cable insertion at the top/bottom
- Mounting insert incl. door and cover frame, sheet steel phosphatized and polyester-powder-coated in RAL 9016 (white)
- Metal front plates with contact point at the enclosure
- Sheet steel door with or without inspection window
- 150 mm DIN rail distance (ideal for switchgear busbar system)
- Prepared enclosures come with mounting plate and can be used as media distribution boards
- Screw-type and combined plug-type terminals can be integrated by means of terminal carriers

Functional product features

- **Wall pan** with easy-to-knock-out openings for cable insertion at the top and bottom. In addition, there are slots at the back of the wall pan to ensure fixing/strain relief of the cables right after inserting them. Lateral add-on can be achieved by means of integrated straps which serve as fasteners in the brickwork. These straps allow you to install two distribution boards side by side at an appropriate distance so as to avoid a collision of the two door frames when fixing the inserts. For inserts in hollow-walls a suitable BFZ-HWS fastening set is available as accessory.
- **Mounting insert** incl. door and cover frame is delivered with the correct number of carrier rails (35 x 7.5 mm). They come firmly riveted to the insert when they are delivered. As a standard feature, the media distribution board is equipped with a micro-perforated mounting plate for universal installation purposes of components. In addition, a carrier rail in the top area provides space for the DIN rail devices. Carefully selected positioning of the long holes for screw-fixing the wall pan provides 3D plaster compensation in a straightforward way. (alignment left/right and in depth). Screw-type terminals are pre-assembled directly at the mounting insert (no loss of MUs). In addition and where necessary, you can install additional terminals (screw-type or combined plug-type terminals) on the side as well as at the top and bottom by means of BFZ-KTH-KSK or BFZ-KTH-SK holders.
- **Sheet steel door** with a rotary bolt lock in the versions with or without inspection window. The media distribution board comes with a door incl. an inspection window and additional ventilation slots (at the top and bottom) for passive ventilation.
- **Front panels** come with our proven locks as a standard feature, these locks automatically make contact with the enclosure by closing and tightening the screw (ground connection).

Description

- Flush-mounted Flat Distribution Boards
- 2- to 6-rows 24 MUs/row (versions A, E, C)
- 4- to 6-rows 33 MUs/row (versions A, C, P)
- IP30
- Protection class I
- Sheet steel enclosure polyesterpowder coated (white RAL 9016;4)
- Prepared for Eaton MCCB Incoms
- Metal front plates with contact point at the enclosure
- Removable DIN rail frame
- Generous wiring space
- 150 mm DIN rail distance (ideal for switchgear busbar system)
- Complete enclosure (including N/PE terminals)
- Depth: 127 mm
- Universal mounting plate

Description BF-U flush-mounted Flat Distribution Boards, IP30, Version A

- Flat installation distribution board for flush-mounting
- 2- to 6-rowss with 24 module units (MU) per row
- 4- to 6-rowss with 33 module units (MU) per row

Enclosure:

- Closed construction including rear wall
- Rear wall useable as mounting area
- 2 cable entry flanges at flat distribution board with 24 MU width at the top
- 3 cable entry flanges at flat distribution board with 33 MU width at the top
- Pre stamped cable entry openings at the bottom
- Terminals pre mounted at the enclosure (no losing of module units)

Wall pan:

- Wall pan with door frame
- Rear wall useable as mounting area
- Easy removeable knock-outs
- 127 mm depth
- Terminals pre mounted at the enclosure (no losing of module units)
- 4 lateral mounting straps

Door:

- Steel sheet door with rotary door handle white in the scope of delivery
- Steel sheet door with additional depth (required to install RMQ-Components at the door) is available as accessory (BFZ-OTR-./...)
- Steel sheet door with window is available as accessory (BFZ-OTT-./...)

DIN rail frame:

- Removable DIN rail frame
- For 45 mm Switchgear
- 150 mm distance between DIN rails
- Eaton MCCB integrate able by mounting set (BFZ-NZM1-SET/(33))
- EUniversal mounting set for flush mounted enclosure (BFZ-U-MPL...)

Front plate:

- Contacting of the metal front plate by special catch on enclosure

Description BF-O surface-mounted Flat Distribution Boards, IP30, Version P

- Flat installation distribution board for surface-mounting
- 3- to 6-rowss with 24 module units (MU) per row

Enclosure:

- Closed construction including rear wall
- Rear wall useable as mounting area
- 2 cable entry flanges at flat distribution board with 24 MU width at the top
- Pre stamped cable entry openings at the bottom
- Terminals pre mounted at the enclosure (no losing of module units)

Wall pan:

- Wall pan with door frame
- Rear wall useable as mounting area
- Easy removeable knock-outs
- 127 mm depth
- Terminals pre mounted at the enclosure (no losing of module units)
- 4 lateral mounting straps

Door:

- Steel sheet door with rotary door handle white or steel sheet door with window and rotary door handle white in the scope of delivery
- Steel sheet door with additional depth (required to install RMO-Components at the door) is available as accessory (BFZ-OTR-./...)

DIN rail frame:

- Removable DIN rail frame
- For 45 mm Switchgear
- 150 mm distance between DIN rails
- Eaton MCCB integrate able by mounting set (BFZ-NZM1-SET/(33))
- EUniversal mounting set for flush mounted enclosure (BFZ-O-ITMPL..)

Front plate:

- Contacting of the metal front plate by special catch on enclosure
