Power supply for touchscreen (not compatible with the 1st generation touchscreen)

550-00502

This Power-over-Ethernet power supply ensures that the touch screen can also be supplied with power via one UTP/STP cable. This offers an alternative to laying a second power supply cable for the touchscreen.

This power supply is not compatible with the 1st generation Niko Home Control touchscreen (550-20100).

Technical data

Power supply for touchscreen (not compatible with the 1st generation touchscreen).

- PoE standard: IEEE 802.3af
- Input voltage: 96 - 264 Vac
- Output voltage: 56 Vdc
- Overload protection: missing_value
- Usage environment: indoor
- Weight: 462 gr
- Marking: CE
