### APPLICATION AND USE

The WC-pans delivered under this certificate in combination with flushing cisterns and/or pressure flush valves are intended for use as sanitary appliances, connected to drinking water installations with a water temperature of 30 °C maximum.

### MARKING

The Kiwa®-mark products are marked with the word mark "KIWA"

On the WC-pan this word mark can be followed by

- the number 6, 7.5 or 9, indicating the flushing volume;
- the letter A and or C which indicates the type of flushing device to be connected:
  - A intended for connection with a cistern (or concealed cistern)
  - C intended for connection with a pressure flush valve.

The WC-pan is marked as follows:

"KIWA-6-A "

By this marking it is given that the WC-pan is Kiwa certified and intended for connection to a (concealed) flushing cistern. The nominal water volume required to perform a full flush is 6 litres.

Product(s) with a nominal flush volume of 4 and / or 5 litres are entitled to be marked with only word mark Kiwa.

Place of the mark:

- on the WC-pans between the attachment holes of the lavatory seat
- on one of the sides of the flushing rim
- under the rim of the WC-pan
- under the WC-pan

Compulsory specifications:

name or mark of the manufacturer

- on the WC-pans
- additional marking or labelling as specified in the European Standard EN997.

Method of marking:

- non-erasable;
- visible after assembly.

### RECOMMENDATIONS FOR CUSTOMERS

Check at the time of delivery whether:

- the supplier has delivered in accordance with the agreement;
- the mark and the marking method are correct;
- the products show no visible defects as a result of transport etc.

If you should reject a product on the basis of the above, please contact:

- Hansgrohe SE
- and, if necessary,
- Kiwa Nederland B.V.

Consult the supplier's processing guidelines for the proper storage and transport methods.
