

Long claw for switches and socket outlets

170-71003

This long claw is intended for use in combination with switches and socket outlets with claws.

Technical data

Long claw for switches and socket outlets

Long claws for mounting flush-mounting switches and socket outlets in flush-mounting boxes which are sunk too deeply in the wall. First, the existing claws of the switch or socket outlet are easily pushed out of the switch or socket outlet. Then, the long claws are pushed between the nut and the pinion. The long claw is 10 mm longer than the claws that normally hang on the switches or socket outlets. (L:27mm)

- Protection degree: IP41 for the combination of a mechanism, central plate and faceplate
- Impact resistance: the combination of a mechanism, a central plate and a faceplate has an impact-resistance of IK06
- Marking: CE
