Niko's doorbell push button (6-12V AC/DC, max. 1A) is made of high-quality materials and is highly resistant to corrosion and harsh weather conditions. It is equipped with a brightly illuminated nameplate for improved visibility.

Operating voltage

6-12 V AC/DC

Maximum current

1A

Materials

Sprayed metal and thermoplastic

Contact type

NO Reed contact

Features

Large, brightly illuminated nameplate,
chamfered top and bottom edges

Dimensions

95 mm x 54 mm x 19 mm

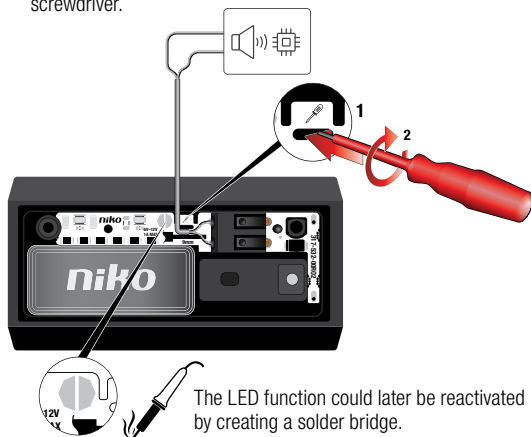

Modified Installation ⚠ 230 V – OFF

Installatie / Installation / Installation / Installation / Installation / Installasjon
Installazione / Instalacja / Inštalácia

When using a sensitive electronic chime or connecting multiple doorbell buttons in parallel, the small power consumption of the LEDs may cause false triggers. Deactivate the LEDs to fix this.

To deactivate the LEDs, break off the internal tab using a screwdriver.

The LED function could later be reactivated by creating a solder bridge.
