• Air damper size up to approx. 1 m²

• Torque motor 5 Nm
• Nominal voltage AC/DC 24 V
• Control modulating, communicative, hybrid, Cloud
• Communication via BACnet IP, Modbus TCP and Cloud
• Ethernet 10/100 Mbit/s, TCP/IP, integrated web server
• Conversion of sensor signals

ASHRAE BACnet™

Modbus

BELIMO CLOUD

Technical data

Electrical data	Nominal voltage	AC/DC 24 V
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 19.2...28.8 V / DC 21.6...28.8 V
	Power consumption in operation	3.5 W
	Power consumption in rest position	3 W
	Power consumption for wire sizing	5 VA
	Connection supply / control	Cable 1 m, 6x 0.5 mm²
	Connection Ethernet	RJ45 socket
	Parallel operation	Yes (note the performance data)
Data bus communication	Communicative control	Cloud BACnet/IP Modbus TCP
	Number of nodes	BACnet / Modbus see interface description
Functional data	Torque motor	5 Nm
	Operating range Y	2...10 V
	Input impedance	34 kΩ
	Operating range Y variable	0.5...10 V
	Position accuracy	±5%
	Direction of motion motor	selectable with switch 0/1
	Direction of motion note	Y = 0%: At switch position 0 (ccw rotation) / 1 (cw rotation)
	Manual override	with push-button, can be locked
	Angle of rotation	95°
	Angle of rotation note	can be limited on both sides with adjustable mechanical end stops
	Running time motor	150 s / 90°
	Running time motor variable	35...150 s
	Adaptation setting range	manual
	Sound power level, motor	35 dB(A)
	Mechanical interface	Universal shaft clamp 6...20 mm
	Position indication	Mechanical, pluggable
Safety data	Protection class IEC/EN	III, Safety Extra-Low Voltage (SELV)
	Degree of protection IEC/EN	IP40 IP54 when using protective cap or protective grommet for RJ45 socket
	EMC	CE according to 2014/30/EU

Technical data

Safety data	Hygiene test		According to VDI 6022 Part 1 / SWKI VA 104-01, cleanable and disinfectable, low emission
	Type of action		Type 1
	Rated impulse voltage supply / control		0.8 kV
	Pollution degree		3
	Ambient humidity		Max. 95% RH, non-condensing
	Ambient temperature		-30...50°C [-22...122°F]
	Storage temperature		-40...80°C [-40...176°F]
	Servicing		maintenance-free
Weight	Weight		0.56 kg

Safety notes

⚠️

- This device has been designed for use in stationary heating, ventilation and air-conditioning systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- Outdoor application: only possible in case that no (sea) water, snow, ice, insolation or aggressive gases interfere directly with the device and that it is ensured that the ambient conditions remain within the thresholds according to the data sheet at any time.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied with during installation.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- Cables must not be removed from the device.
- To calculate the torque required, the specifications supplied by the damper manufacturers concerning the cross-section and the design, as well as the installation situation and the ventilation conditions must be observed.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.

Product features

Operating mode

The actuator is controlled via the Cloud, BACnet IP or Modbus TCP and drives to the position defined by the control signal. Various data points can be written and read via the same interfaces.

Hybrid mode:

The actuator receives its analog control signal from the higher level controller and drives to the position defined. Using the Cloud, BACnet IP or Modbus TCP, various data points can be read and with the exception of the control signal written.

Converter for sensors

Connection option for two sensors (passive sensor, active sensor or switching contact). The actuator serves as an analogue/digital converter for the transmission of the sensor signal to the higher level system.

Product features

Communication	The parametrisation can be carried out through the integrated web server (RJ45 connection to the web browser), by communicative means or via the Cloud.
	Additional information regarding the integrated web server can be found in the separate documentation.

"Peer to Peer" connection
http://belimo.local:8080
The Notebook must be set to "DHCP".
Make sure that only one network connection is active.
Standard IP address:
http://192.168.0.10:8080
Static IP address
Password (read-only):
User name: «guest»
Password: «guest»
Simple direct mounting	Simple direct mounting on the damper shaft with a universal shaft clamp, supplied with an anti-rotation device to prevent the actuator from rotating.
Data recording	The recorded data (integrated data recording for 13 months) can be used for analytical purposes.
	Download csv files via web browser.
Manual override	Manual override with push-button possible (the gear train is disengaged for as long as the button is pressed or remains locked).
Adjustable angle of rotation	Adjustable angle of rotation with mechanical end stops.
High functional reliability	The actuator is overload protected, requires no limit switches and automatically stops when the end stop is reached.
Home position	The first time the supply voltage is switched on, i.e. at the time of commissioning, the actuator carries out an adaptation, which is when the operating range and position feedback adjust themselves to the mechanical setting range.
	The actuator then moves into the position defined by the control signal.
Adaptation and synchronisation	An adaptation can be triggered manually by pressing the "Adaptation" button. Both mechanical end stops are detected during the adaptation (entire setting range).
	The actuator then moves into the position defined by the control signal.

Accessories

Electrical accessories	Description	Type
	Grommet for RJ connection module, Multipack 50 pcs.	Z-STRJ.1

| **Tools**	Description	Type
	Service tool, with ZIP-USB function, for parametrisable and communicative Belimo actuators, VAV controller and HVAC performance devices	ZTH EU
	Connecting cable 5 m, A: RJ11 6/4 ZTH EU, B: 6-pin for connection to service socket	ZK1-GEN

Electrical installation

⚠️ Supply from isolating transformer.

Parallel connection of other actuators possible. Observe the performance data.

Wire colours:
1 = black
2 = red
5 = orange
10 = yellow/black
11 = yellow/pink
12 = yellow/grey

Wiring diagrams
AC/DC 24 V
Connection of a notebook for parametrisation and manual control via RJ45.

Optional connection via RJ45 (direct connection to notebook / connection via Intranet or Internet) for access to the integrated web server

Functions

⚠️ The connection diagrams shows connections for the first sensor on terminal S1, while the second sensor can be connected identically on terminal S2.

Parallel use of different sensor types is permitted.

For hybrid operation, S1 is used for the control signal Y and must be configured as an active sensor.

Functions with specific parameters (Parametrisation necessary)
TCP/IP (Cloud) / BACnet IP / Modbus TCP
TCP/IP (Cloud) / BACnet IP / Modbus TCP with analogue setpoint (hybrid operation)

Functions

Functions with specific parameters (Parametrisation necessary)
Connection of active sensors

Switching contact connection

Connection of passive sensors

Operating controls and indicators

1 Direction of rotation switch

| Switch over: | Direction of rotation changes |

2 LED display green

Off:	No power supply or wiring error
On:	Actuator starts operation
Flickering:	In operation

3 Push-button and LED display yellow

Off:	Standard mode
On:	Adaptation or synchronisation process active
Press button:	Triggers angle of rotation adaptation, followed by standard mode

4 Manual override button

| Press button: | Gear train disengages, motor stops, manual override possible |
| Release button: | Gear train engages, synchronisation starts, followed by standard mode |

5 Service plug
For connecting parametrisation and service tools

6 RJ45 socket
For the connection of TCP/IP (Cloud), BACnet IP and Modbus TCP
