PCB terminal block, 805 Series, 0° conductor entry to board

Our PCB terminal block (item number 805-359) ensures effortless electrical installations. You can count on proven safety with these PCB terminal blocks, perfect for a wide range of applications when designing your devices. Conductors can only be connected to this PCB terminal block if their strip length is between 9 and 10 mm. Featuring one conductor terminal along with Push-in CAGE CLAMP®, this connector outperforms the competition. Push-in CAGE CLAMP® technology provides a universal connection solution for all conductor types. It allows both solid and fine-stranded conductors with ferrules to be inserted directly into the clamping point without the need for tools. Dimensions: (33 x 13.7 x 13.6) mm (width x height x depth). Depending on the type of conductor, this PCB terminal block is designed for conductor cross sections ranging from 0.2 mm<sup>2</sup> to 1.5 mm<sup>2</sup>.

Tin is used for coating the contact surfaces. This PCB terminal block is operated with a push-button. The PCB terminal block is designed for THT soldering. Insert the conductor into the board at an angle of 0°.

## Installation Notes

### Conductor termination

Inserting solid conductor via push-in termination.  
Inserting and removing fine-stranded conductors via push-buttons.

## Installation

Terminal strips with spacers and enlarged conductor entry (5 mm pin spacing) are available upon request.

## Commoning

WAGO's 805 Series Terminal Strips provide "internal commoning" to meet requirements than ban routing the ground conductor over the board. This enables custom terminal strips to be commoned and marked at the factory upon request.

## Installation

Mixed-color terminal strips are available upon request.
