## Installation Notes

### 2-conductor female plugs

- Common signals from one subassembly to the other (bus structure)
- Can be used as a T-wire branch tap connection (e.g. for lighting wiring)
- Enable a higher number of connection possibilities

## Conductor termination

### CAGE CLAMP® connection

Female plug: Inserting/removing a conductor via operating tool.  
Operation 90° to conductor is also possible.

With ferruled conductors, it is necessary to use a terminal block one size smaller than the conductor's nominal cross-section.

## Commoning

Commoning a 2-conductor female plug via staggered jumper and carrier terminal blocks via adjacent jumpers.

### Commoning options of female plugs:

- After removal, commoned potentials still remain commoned
- Use of plug-in jumpers instead of additional wired jumpers
- Can be used as a "hardware" key for safety lockout
- Can also be used as a commoning jumper for sensor circuits or machine programming

## Coding

Coding a female plug by removing coding finger(s) via cutting tool. Do not remove the first and last coding fingers or use an additional locking lever.

## Locking system

Locking/releasing a lever.

## Strain relief

Removing a female plug via conductor bundle provided with strain relief plate.

## Marking

Labeling a female plug with CAGE CLAMP® connection via Mini-WSB Quick Markers.
