Disconnect terminal block, 280 Series, blue

Our disconnect terminal block (item number 280-839) is the ideal way to connect conductors quickly and securely. Conductors can only be connected to this disconnect terminal block if their strip length is between 8 mm and 9 mm. This product incorporates conductor terminals and utilizes CAGE CLAMP®. Our reliable and maintenance-free CAGE CLAMP® connection makes it easy to connect all conductor types without having to prepare the conductor. For example, you don't need to crimp ferrules. Depending on the type of conductor, this disconnect terminal block is designed for conductor cross sections ranging from 0.08 mm² to 2.5 mm². It features one level and four clamping points that you can use to connect two potentials. The blue housing is made of polyamide (PA66) for insulation. These function terminal blocks are mounted using DIN-35 rails..

Connection 1

Connectable conductor materials (note)	**Terminating Aluminum Conductors** WAGO Spring-Clamp Terminal Blocks are suitable for solid aluminum conductors up to 4 mm²/12 AWG if WAGO "Alu-Plus" Contact Paste 249-130 is used for termination.

"Alu-Plus" Contact Paste Advantages:

• Automatically destroys the oxide film during clamping.
• Prevents fresh oxidation at the clamping point.
• Prevents electrolytic corrosion between aluminum and copper conductors (in the same terminal block).
• Provides long-term protection against corrosion.

Using terminal blocks with CAGE CLAMP® Spring Pressure Connection Technology, **aluminum conductors must first be cleaned with a blade** and then immediately inserted into the clamping units filled with "Alu-Plus" contact paste.

It is also possible to apply WAGO "Alu-Plus" **additionally** on the whole surface of the aluminum conductor before termination.

Please note that the nominal currents must be adapted to the reduced conductivity of the aluminum conductors::
