

# Product data sheet Spirotech

## Product name

## SpiroTrap MB3 -1½" -Magnet -Uni

## Product properties

Article number

# UE150WJ

## Product image

A brass dirt separator with magnet and a 22 mm - 2" universal connection

- Very small particles, from 5  $\mu\text{m}$  (= 0.005 mm) are separated and removed
- Including a magnet for extra protection and high efficient removal of magnetite
- Dirt can be drained while the system is in operation
- No shut-off valves or bypass required
- Applicable with 50/50 Ethylene Glycol / Water (Volume)
- Constant low pressure drop
- Maintenance only takes a few seconds and is not a dirty job
- No unnecessary downtime
- Connection diameters from 22 mm - 2" (G2)

|                                      |                                                            |
|--------------------------------------|------------------------------------------------------------|
| Housing material                     | Brass                                                      |
| With drain valve                     | Yes                                                        |
| Housing material quality             | Other                                                      |
| Backwash filter                      | No                                                         |
| Max. operating pressure              | 10 bar                                                     |
| KVS value [m3/h] at $\Delta P$ 1 bar | 31.01                                                      |
| Variable flow direction              | Yes                                                        |
| With insulation                      | No                                                         |
| Separator type                       | Dirt                                                       |
| Connection                           | Internal thread cylindrical BSPT-Rp (ISO 7-1 / EN 10226-1) |
| Model                                | Horizontal/vertical                                        |
| Nominal diameter                     | 1 1/2 inch (40)                                            |
| Max. glycol mixture                  | 50 %                                                       |
| Suitable for heating                 | Yes                                                        |
| Suitable for cooling                 | Yes                                                        |
| Construction length                  | 128 mm                                                     |
| Article compression class            | PN 10                                                      |
| Surface protection                   | Untreated                                                  |
| Suitable for open system             | No                                                         |

|                                       |          |
|---------------------------------------|----------|
| Suitable for closed system            | Yes      |
| Suitable for solar                    | No       |
| Whirl operating principle             | No       |
| Negative pressure operating principle | No       |
| With dismountable filter              | No       |
| Filter volume                         | 0.75 l   |
| Magnet operating principle            | Yes      |
| Thrust operating principle            | No       |
| With automatic de-aerator             | No       |
| Partial flow principle                | No       |
| Principle full flow with settling     | Yes      |
| With integrated replenishment automat | No       |
| With couplers                         | Yes      |
| Cleaning possible during operation    | Yes      |
| Material of connection                | Brass    |
| Inlet/outlet offset distance          | 0 mm     |
| Material quality connection           | Other    |
| Operating principle                   | Magnet   |
| Magnet location                       | External |
