Information notice on Adressable emergency luminaires + Gateways (wired & wireless)

If you are interested in purchasing, renting or leasing an ABB Connected Product this information notice ("**Notice**") provides you with information according to the Data Act (EU Regulation 2023/2854)[1].

All terms in this Notice shall have the same meaning as in the Data Act.

Should you require additional information beyond what is provided in this Notice, please do not hesitate to contact us at *eu-data-act@abb.com*

1 Regulation (EU) 2023/2854 of the European Parliament and of the Council on harmonised rules on fair access to and use of data (Data Act) those terms shall have the same meaning as in that Union legislation.

Details on the Connected Product and Product Data

Connected Product	See annex
Information on how to directly access and retrieve Product Data	Two persons within R&D team, who followed a training on GDPR and Cybersecurity, have access to the raw data directly in the Cloud as the Cloud administrators. All requests for direct access to backend database data needs to go through a temporary granted request with business justification.
Information on how to access and retrieve Product Data via a request (indirect access)	The customer can have access to the product data through the app
Information on how to delete your User account and the respective data (where a Connected Product requires login via a User account)	The customer can delete their account by pressing “delete your account” in the apps. The user loses access to their account however the data remains indefinitely in the cloud database; it is never deleted. We should have a mechanism of deleting the data forever after an announced period of time (ex: 60 days). The gap has been identified and is tracked in our bug tracking system.
Type of Product Data	Product health status, test scheduling, test results, location of the products in the building (if the customer indicated this in the app)
Format of Product Data	Byte format (in the Cloud). Message format in the app
Estimated volume of Product Data	Volume of data is dependent on number of Luminaires installed at client site. We store on average 500 bytes of data per Luminaire per month. A typical client organization can range between 20 and 500 luminaires.
Collection frequency of Product Data	For France: once a day / For other countries: in real time
Storage place of Product Data	Google Cloud
Intended duration of retention of Product Data	We retain data as long as the customer has their account active
