Ground terminal block, 264 Series, CAGE CLAMP®

Our ground terminal block (item number 264-347) makes connections quick and easy. Ground terminal blocks connect directly to the mounting rail via an integrated contact foot. This creates an electrical and mechanical connection between the electrical conductors and the mounting adapter. Ensure that the strip lengths are between 8 mm and 9 mm when connecting conductors to this ground terminal block. This product features conductor terminals and utilizes CAGE CLAMP®. Our CAGE CLAMP® connection offers a convenient and maintenance-free way to connect all types of conductors. You do not need to prepare the conductor in any way, such as crimping ferrules. Depending on the conductor type, this ground terminal block is designed for conductor cross sections ranging from 0.08 mm² to 2.5 mm². It has one level. You can connect a single potential using the four clamping points. The green-yellow housing is made of polyamide (PA66) for insulation. This mini rail-mount terminal block is operated with an operating tool. You can connect copper conductors thanks to front-entry wiring.

## Installation Notes

Installation

Assembling modular terminal blocks into terminal strips.
Mounting an "end terminal block" with mounting flange.

Mounting an end plate.

Removing a terminal block.

Conductor termination

**CAGE CLAMP® connection**
Inserting a conductor.
With ferruled conductors, it is necessary to use a terminal block one size smaller than the conductor's nominal cross-section.
Commoning

Commoning with comb-style jumper bar.

Testing

Testing by touch contact to the CAGE CLAMP® spring (limited to 0.5 A and 48 V test voltage) – test pins are not protected against accidental contact.

Testing via CAGE CLAMP® on the current bar (max. nominal current: 6 A). CAGE CLAMP® clamps individual test contacts.
The maximum test voltage is 400 V.

Marking

Marking via Mini-WSB Quick Marking System.
