

Twilight switch, 230 V, 2-200 lux, IP54, white

350-10030

4 year
warranty

This twilight switch is mounted on an outdoor wall, and at twilight it automatically switches on the outdoor lighting. The light sensitivity can be adjusted to between 2 and 200 lux. The large sensor surface area ensures precise light measurement. The device has an IP54 protection degree and conforms to the European directive for EMC and safety EN 60669-2-1.

Colour: white

- Sustainable
- Functional
- Reliable
- Greater comfort
- Improved burglary protection

Automatic twilight switch for use in driveways, carports, gardens, etc.

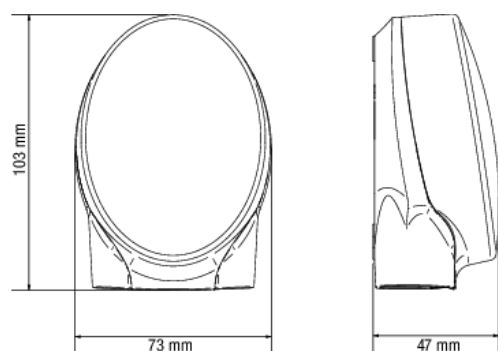

- The twilight switch is suitable for controlling outdoor lighting.
- The lighting turns on automatically when the level of daylight drops below the programmed lux value. The lighting turns off automatically when the level of daylight is above the programmed lux value.
- The housing offers enough room for the cabling and thus allows quick, easy installation.

Technical features

Input voltage	230 Vac
Detector output	230 V (ON/OFF)
Maximum MCB rating	10 A
Minimum ambient temperature	-50 °C
Maximum ambient temperature	+50 °C
Mounting method	surface mounting
Colour	white
Dimensions (HxWxD)	103 mm x 73 mm x 47 mm
Protection degree standalone	IP54
Certificates marks	CE
