ABB EcoSolutions™ – Evago

Emergency Lighting systems
Lighting the way for people to exit buildings safely and efficiently in an emergency

ABB Eco Solutions™

Offered with take-back services
At end of life, the product is recycled through a WEEE-compliant take-back program. Materials are recycled and reintroduced into the supply chain.

Designed for high recyclability
Up to 90.13% recyclability rate, calculated according to EN 45555. Materials and construction are optimized for material recovery at end of life.

Extended lifetime
Modular design allows replacing individual components instead of the entire unit. Spare parts available for 8 years. Predictive maintenance and repair services extend product life.

Energy efficient
EVAGO delivers higher energy efficiency than comparable products, reducing operating costs and carbon impact over its service life.

Produced in a zero waste to landfill site
All non-hazardous waste generated during production is recycled. We continuously work to reduce waste at the source and drive material efficiency across our operations

PEP ecoPASSPORT®

Third-party verified Environmental Product Declaration

EPD compliant with ISO 14025 Type III (externally verified), data accuracy and full transparency on the product's environmental impacts throughout its life cycle (LINK to the EPD).
