Through terminal block, 264 Series, operating tool

This through terminal block (item number 264-336) is designed for quick and easy connections. Our mini rail-mount terminal blocks are the perfect choice for working in confined spaces. A large selection of mounting and actuation variants means you can find a suitable mini terminal block for every purpose. This also means you can adapt the terminal blocks to your unique requirements. This mini rail-mount terminal block has a rated voltage of 800 V and can handle currents up to 24 A. Conductors can only be connected to this through terminal block if their strip length is between 8 mm and 9 mm. Featuring conductor terminals along with CAGE CLAMP®, this connector delivers reliable performance. Our CAGE CLAMP® connection offers a secure and maintenance-free way to connect all types of conductors. You do not need to prepare the conductor in any way, such as crimping ferrules. Depending on the type of conductor, this through terminal block is designed for conductor cross sections ranging from 0.08 mm² to 2.5 mm². It has one level. The single potential can connect using the four clamping points. The orange housing is made of polyamide (PA66) for insulation. An operating tool is used to operate this mini rail-mount terminal block. Conductors made of copper can be connected via front-entry wiring.

[Item No.: 280-432](#)

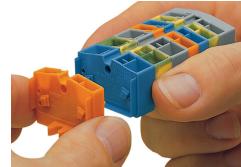

Operating tool; made of insulating material; 2-way; white

Installation Notes

Installation

Assembling modular terminal blocks into terminal strips.

Mounting an "end terminal block" with mounting flange.

Mounting an end plate.

Removing a terminal block.

Conductor termination

**CAGE CLAMP® connection**

Inserting a conductor.

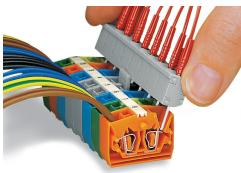

With ferruled conductors, it is necessary to use a terminal block one size smaller than the conductor's nominal cross-section.

Commoning

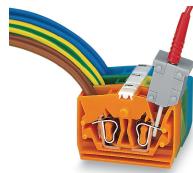

Commoning with comb-style jumper bar.

Testing

Testing by touch contact to the CAGE CLAMP® spring (limited to 0.5 A and 48 V test voltage) – test pins are not protected against accidental contact.

Testing via CAGE CLAMP® on the current bar (max. nominal current: 6 A).
CAGE CLAMP® clamps individual test contacts.
The maximum test voltage is 400 V.

Marking

Marking via Mini-WSB Quick Marking System.
