Installation Notes

Using fuse plugs with rail-mount terminal blocks (280/281 and 769 Series) for control circuit protection is highly advantageous because the function and wiring levels are separated:

- No additional assembly and wiring costs
 - No risk of accidental contact with live parts when disconnecting the fuse plug
 - Quick plug replacement in case of a blown fuse
 - The fuse plug can be removed by service personnel
 - No unintentional reclosing of the circuit by another person
- Additional advantages:
- Terminal blocks/plugs provide ultra high-density wiring in a width of just 5 mm
 - Optional LED indicates blown fuse

Fuse protection of individual outputs;
supply via wire commencing chain
