Short description

ETHERMA EXO PRO infrared heater, 2kW, white, IP65

**Product Description**

The new premium infrared heater ETHERMA EXO PRO has been specially developed for outdoor use on patios, balconies, in restaurants, or cabins. The highly efficient, short-wave infrared heat radiation penetrates the air particularly efficiently and quickly due to its wavelength, providing a noticeable feeling of warmth very quickly and thus guaranteeing high operating cost savings compared to gas radiators or gas patio heaters. Infrared radiant heaters are particularly flexible in outdoor use and impress with their maintenance-free operation. The ETHERMA EXO PRO is also available with an integrated radio dimmer, allowing the radiant heater to be easily controlled via radio remote control and dimmed in three stages (33%/66%/100%). The device is made of high-quality, rustproof aluminum and, thanks to protection class IP 65, is protected against water jets, so nothing stands in the way of year-round outdoor use. The innovative carbon heating tube reliably generates maximum heat output with only minimal residual light and has an above-average service life of 10,000 hours. It is enclosed by the reflector so that the heat is directed forward. The optional remote control is required for operation. Colors: white, black; suitable for wall and ceiling mounting, protection class: IP 65, voltage: 230 V, plug cable 180 cm, system design: CE compliant This product is only suitable for outdoor use.

ETIM characteristics

Model	Ceiling-/wall emitter	Voltage	230 230 Volt
Mounting method	Surface mounting	Number of heating levels	1
Power step OFF	✗	Min. heating power	660 Watt
Mounting over cradle	✗	Max. heating power	2000 Watt
Degree of protection (IP)	IP65	Min. mounting height	1.8 Metre
Colour	White	Max. mounting height	2.5 Metre
Compatible with Apple HomeKit	✗	Height	155 Millimetre
Compatible with Google Assistant	✗	Width	830 Millimetre
Compatible with Amazon Alexa	✗	Depth	250 Millimetre
IFTTT support available	✗	RAL-number	9016
