Through terminal block, 781 Series, light gray

Connect conductors quickly and securely with this through terminal block (item number 781-993). Strip lengths must be between 9 mm and 10 mm when connecting conductors to this through terminal block. This product features conductor terminals and utilizes CAGE CLAMP®. Our CAGE CLAMP® connection provides a secure and maintenance-free way to connect all types of conductors. You do not need to prepare the conductor in any way, such as crimping ferrules. This through terminal block is suitable for conductor cross sections ranging from 0.08 mm² to 4 mm². It has one level. You can connect a single potential using the three clamping points. The light gray housing is made of polyamide (PA66) for insulation. These installation rail-mount terminal blocks are mounted using DIN-35 rails..

## Installation Notes

### Installation

Snapping a ground conductor block onto the DIN-rail automatically makes a direct electrical connection to the rail.

Removing a terminal block from the assembly.

## Conductor termination

**Insulation stop**

Prevents the conductor insulation from being pushed into the clamping unit. (Available for terminal blocks up to 4 mm²/12 AWG)

## Commoning

Commoning ground conductor terminal blocks with through terminal blocks is possible in one direction only (via rear side of terminal block) using adjacent jumpers. WAGO recommends using yellow-green adjacent jumpers in addition to the required marking of these blocks.

Commoning

Staggered jumpers are suitable for sophisticated circuit requirements. Push jumpers down until fully inserted!
