Male connector/plug *WINSTA*® MINI with protection against mismating

The *WINSTA*® MINI male connector/plug B coding offers secure, easy handling to support drive and control technology tasks. Our remarkable selection of pluggable PCB connectors with different insertion directions and operating variants offers you the perfect solution for your application at all times. The coding options reduce installation errors, allowing fast, maintenance-free wiring of all components. Solutions like the *WINSTA*® MINI pcb connectors with B coding are suitable for applications involving process control, for example, for lighting or within data networks. If only limited space is available, our smallest pluggable connection system, *WINSTA*® MINI, consistently displays its advantages. It saves space, and, with Push-in CAGE CLAMP® spring pressure connection technology, it also can be installed quickly, since the connection is low-maintenance and can be performed without screw connections.

WINSTA® MINI solutions for your electrical installation – protected against mismating and maintenance-free

The WINSTA® Pluggable Connection System is perfectly tailored to the strict requirements of building installation. It makes electrical installation pluggable, and therefore faster, more reliable, and error-free. Use of this pre-assembled system reduces time spent on assembly and installation errors at the construction site. Choose quality and durability – with protection against mismating from WAGO makes the electrical installation of electrical components substantially easier.
