Double-deck terminal block, 2200 Series, push-button

This double-deck terminal block (item number 2200-2248) provides fault-free electrical installations. The double-deck terminal block also functions as a shield terminal block as well as a through terminal block. Ensure that the strip lengths are between 9 mm and 11 mm when connecting conductors to this double-deck terminal block. This product features conductor terminals and utilizes Push-in CAGE CLAMP®. Push-in CAGE CLAMP® connection technology is ideal for connecting all conductor types. Solid and fine-stranded conductors with ferrules can be plugged in without needing to use any tools—all thanks to its pluggable design. Depending on the type of conductor, this double-deck terminal block is ideal for conductor cross sections ranging from 0.14 mm² to 1.5 mm². It features two levels and four clamping points that you can use to connect two potentials. The gray housing is made of polyamide (PA66) for insulation. These through rail-mount terminal blocks are mounted using DIN-35 rails.. This product is designed for specific Ex applications (please refer to the product datasheet).

Installation Notes

Conductor termination

All conductor types at a glance

Push-in termination of solid and ferruled conductors

Insert fine-stranded conductors via operating tool.

Removing all conductors via operating tool.

Commoning

Insert a push-in type jumper bar and push down until it hits the backstop.

Commoning with step-down jumpers.

Testing

Testing with a 2 mm Ø test plug (max. 42 V).
