Through terminal block, 262 Series, operating tool

Our through terminal block (item number 262-132) makes connecting wires quick and easy. Our mini rail-mount terminal blocks are perfect for working in tight spaces thanks to their compact design. With various mounting and actuation options, they offer maximum flexibility. Conductors can only be connected to this through terminal block if their strip length is between 9 mm and 10 mm. Featuring conductor terminals along with CAGE CLAMP®, this connector is highly versatile. Our reliable and maintenance-free CAGE CLAMP® connection makes it easy to connect all conductor types without having to prepare the conductor. For example, you don't need to crimp ferrules. This through terminal block is suitable for conductor cross sections ranging from 0.5 mm² to 4 mm². It has one level. Two potentials can connect two poles using the four clamping points The light gray housing is made of polyamide (PA66) for insulation. An operating tool is used to operate this mini rail-mount terminal block. The side-entry wiring means you can connect copper conductors.
