Through terminal block, 262 Series, CAGE CLAMP®

This through terminal block (item number 262-137) is designed for simple and secure connections. Whether for use in industry or building installations, our rail-mount through terminal blocks allow you to quickly and securely connect electrical conductors. They're perfect for either classic through-wiring or distributing potential, depending on the variant. Conductors can only be connected to this through terminal block if their strip length is between 9 mm and 10 mm. This product incorporates conductor terminals and utilizes CAGE CLAMP®. Our CAGE CLAMP® connection offers a reliable and maintenance-free way to connect all types of conductors. You do not need to prepare the conductor in any way, such as crimping ferrules. Depending on the type of conductor, this through terminal block is designed for conductor cross sections ranging from 0.5 mm² to 4 mm². Up to seven potentials / seven poles can be connected to this terminal strip using fourteen clamping points on one level. The light gray housing is made of polyamide (PA66) for insulation. An operating tool is used to operate this mini rail-mount terminal block. Conductors made of copper can be connected thanks to side-entry wiring.
