## Prefabricated chimney

### Features

- The most compact prefab chimney
- Full high quality aluminium
- Quick and easy assembly
- 10 Year warranty

### Product description

Econox offers the Alfa Compact chimney especially for single-family houses. A compact combined chimney for the supply and exhaust of the central heating boiler, an exhaust of the ventilation and an exhaust of the sewerage system.

The advantages of the Alfa Compact chimney are its light weight, quick and easy assembly, 100% permanent leakage-free, high-quality material and quick delivery. The Alfa Compact chimney is also the most compact chimney of its kind. The Alfa Compact chimney is an economical universal prefabricated solution for house building.

The dimensions of the prefabricated aluminium chimney are 313 x 313 mm and it is available in 4 types. A left-hand and right-hand version, with or without sewer venting. As standard, the chimney is executed in RAL 7016 (deviating RAL colours are available on

request) and is equipped with extended channels (L= 650mm). If longer channels are required, an extra extension set can be ordered. The Alfa Compact chimney can be used on various roof types, such as a flat roof, sloping roof and ridge roof. Other roof types are also possible, please ask our salespeople. As an extra option, Econox can supply (airtight) roof sheeting. For the installation of the Alfa Compact chimney, please refer to the Econox installation instructions, which can be found on our website [www.econox.nl](http://www.econox.nl).
