

PRESSCHECK1432: Tool to control the accuracy of a pressing Ø14-32

Commercial information

- This measurement tool is only suitable for use on press connections made with the Henco profile (BE profile) or the TH profile (up to Ø 26) combined with a Henco PVDF or brass press connection.
- After pressing, the fitting may no longer be rotated in relation to the pipe.

Basic unit dimensions

Height	3 mm
Length	60 mm
Width	3 mm
Net weight	0.037 kg

Certificates

Applications

Potable water, Heating, Cooling, Compressed air, Sprinkler, Underfloor Heating, Gas, Sanitary

Solutions

Building installations, Industry, Underfloor heating, Fire protection, Oil & gas, Utility, Shipbuilding

Technical characteristics

Material	Steel	Outer pipe diameter all connections	14 Millimetre
See-through model	✓	Height	2.5 Millimetre
Type of glass	Other		
Flow indicator	✗		
Type of flow indicator	Other
