Through terminal block, 262 Series, light gray

Connect conductors quickly and securely with this through terminal block (item number 262-289). Whether for use in industry or building installations, our rail-mount through terminal blocks make it easy to quickly and securely connect electrical conductors. They're perfect for either classic through-wiring or distributing potential, depending on the variant. Conductors can only be connected to this through terminal block if their strip length is between 9 mm and 10 mm. Featuring conductor terminals along with CAGE CLAMP®, this connector is highly versatile. Our tried-and-tested universal connection known as CAGE CLAMP® is industry-leading when it comes to connection technology and electrical interconnections. Depending on the conductor type, this through terminal block is ideal for conductor cross sections ranging from 0.5 mm² to 4 mm². It comes with one level and thirty-six clamping points for connecting nine potentials / 9 poles. The light gray housing is made of polyamide (PA66) for insulation. An operating tool is used to operate this mini rail-mount terminal block. You can connect copper conductors via side-entry wiring.
