Male connector/plug *WINSTA*® MIDI B coding

The *WINSTA*® MIDI male connector/plug with protection against mismating offers easy, secure handling to support drive and control technology tasks. The pluggable PCB connectors with spring pressure connection technology and Push-in CAGE CLAMP® technology from WAGO permit impact-resistant, maintenance-free, fast terminal connections. The coding options reduce installation errors, allowing fast, secure wiring of all components. B coding enables the *WINSTA*® MIDI pcb connectors to be used for application control in the domains of automation, mechanical engineering and robotics. This pcb connectors can be used for electrical currents up to 25 A. Thus the product is also suitable for high power loads. Our *WINSTA*® MIDI product line allows maximum flexibility for the installation. With its Push-in CAGE CLAMP® spring pressure connection technology, it guarantees time-saving, error-free installation and offers flexibility and customization for meeting all installation requirements.

Lower costs through fast commissioning and elimination of service expenses – solutions from *WINSTA*® MIDI

WINSTA® is the pluggable connection system that is ideally tailored to the strict requirements of electrical installation. It offers error-free installation of cables and components, quickly and reliably. Choose durability and quality – with marking from WAGO makes the installation of electrical components substantially easier.

- effective protection against mismating
- pre-assembled versions
- with B coding for controllers, for example sun blinds and lighting fixtures
- convenient installation and commissioning
