

Declaration on the EU Chemicals Regulation REACH

To whom it may concern,

Zehnder is a manufacturer of Air Distribution components for ventilation systems and as such called "downstream user" which does not distribute, import or produce chemical products (substances) within the scope of the REACH-regulation (EG) No. 1907/2006.

Consequently, our products do not emit any substances of very high concern (SVHC) under normal, reasonably foreseeable conditions of use. Therefore, our company is not obliged to generate safety data sheets or to register at the European Chemical Agency (ECHA).

Nevertheless, we can confirm that the products we manufacture do not contain substances of very high concern (SVHC) from the candidate list (as of August 2018) above 0,1 % (w/w) according to article 33 of the REACH- regulation (EG) (Regulation (EG) No. 1907/2006). The EU-suppliers of components used to produce our products are obliged to proactively inform us if more than 0,1 % (w/w) of an SVHC substance is included in one of their supplied products. In the case of such information from our supplier and, hence, acquirement of knowledge that an SVHC is present in those articles above a concentration of 0,1 % (w/w), we will immediately inform you.

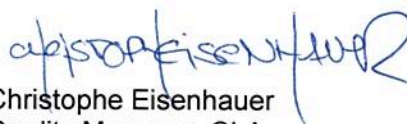

This confirmation applies to Air Distribution products, distributed by Zehnder and in the responsibility of the Zehndergroup Deutschland Holding GmbH (PLA/CLA).

For further inquiries, please do not hesitate to contact us at any time.

Sincerely yours
