PRODUCT GUIDE **2019/2020**

ADVANCED FASTENING SOLUTIONS

We **DEVELOP** and **PRODUCE** solutions dedicated to electrical installation and professional construction, combining our Italian and European **COMPETENCES**.
The only multi-product and multi-solution offer for your profession.

ELEMATIC the fastening and multi-material anchoring systems specialist.

THE STRENGTH OF A GLOBAL GROUP

Elematic is part of ITW, an American **MULTINATIONAL** group with over 100 years of history: the **IDEAL PARTNER** for every professional looking for innovative, differentiating, and high-quality products.

SYSTEM CERTIFICATIONS

The company is certified **ISO 9001:2015** for the design and manufacturing of cable ties and fixing systems with technopolymers, and trading of cabling and fixing accessories. The certification guarantees the quality of the production processes thanks to the implementation of strict operational procedures and quality controls at all levels.

ENVIRONMENTAL CERTIFICATIONS

Aware of the importance of our impact on the environment, we undertook an environmental certification procedure to reduce our impact on the environment as much as possible. All our Italian sites are certified according to **ISO 14001: 2015** standard for the design and production of cable ties and fixing systems in technopolymers by injection moulding, and trading of cabling and fixing accessories.

PRODUCT CERTIFICATIONS AND COMPLIANCE

CABLE TIES CERTIFICATIONS

UL LISTED

UL RECOGNIZED

UL – FILE E86244

Elematic cable ties are recognized by UL (Underwriters Laboratories Inc.) according to UL 62275 standard - Cable Management Systems - Cable Ties for Electrical Installation.

DNV-GL - FILE E-12898

DNV-GL certification guarantees that Elematic cable ties comply to the "Det Norske Veritas" and "Germanischer Lloyd" standards for cable fixing in naval and offshore constructions, for both internal and external applications.

LLOYD'S REGISTER CERTIFICATE N° 09/00025 (E1)

The English Lloyd's Register homologation certifies the mechanical properties and flame resistance of Elematic cable ties in naval construction.

BUREAU VERITAS CERTIFICATE N° 13190/CO BV

This homologation, according to the IEC standard 60092-IEC 62275, ensures that Elematic cable ties comply to the "Bureau Veritas" standard for cables fixing in shipbuilding.

R.I.N.A. CERTIFICATE N° ELE040812CS

The Italian Naval Register homologation, according to the IEC EN 60092-101 "Electrical Installations in Ship" certifies that Elematic cable ties have been tested for flame propagation in shipbuilding.

Self-certification

CE MARKING

Certifies the declaration of conformity of Elematic cabling products to the relevant directive.

CEI EN 62275

Elematic cable ties have been internally tested following the European standards "Cable Ties for electrical installations". Elematic cable ties passed the tests required by these standards.

CABLE PROTECTION CERTIFICATIONS

UL – FILE E228117

Elematic heat-shrinking tubes have obtained the UL (Underwriters Laboratories Inc.) recognition according to UL 224 - Extruded Insulating Tubing standard.

Elematic PVC insulation tapes have obtained the VDE (Verband Deutscher Elektrotechniker) recognition according to the IEC standard 60454-3-1-7 / F-PV-CP / 90

Self-certification

EN 60684

Elematic heat-shrinking tubes have been internally tested following the European standards "Flexible insulating sleeving". Elematic heat-shrinking tubes passed the tests required by these standards. The results are in line with the specifications in the respective product pages on this catalogue.

MECHANICAL AND CHEMICAL ANCHORS CERTIFICATIONS

For all Elematic anchors that satisfy the European Assessment Document (EAD) a European Technical Approval (ETA - European Technical Assessment) is issued.

Option 1: for cracked and non-cracked concrete

Option 7: for non-cracked concrete

ETAG 014: for insulators fixing in composite systems (ETICS)

ETAG 020: nylon anchors for fixing on concrete and masonry

ETAG TR 023: for structural joints with bars of post-installation reinforcement

Fixing system with fire resistance data

Anchor tested under seismic actions

Product with very low content of Volatile Organic compounds, class A+. Ideal for indoor use

MATERIAL CERTIFICATIONS

WEEE - ELV - REACH (REGULATION EC 1907/2006)

The materials used by Elematic to produce cable ties, accessories and various systems comply with the European directives: WEEE (waste electrical equipment - 2012/19/EU) ELV (end of life vehicles - 2000/53/EC) REACH (the materials used to produce our articles, do not contain substances listed in the "List of Candidate Substances" or in Annex XIV of the EC Regulation 1907/2006).

ROHS - (REGULATION EC 2002/95/CE)

The materials used by Elematic to produce cable ties, accessories and various systems comply with the European RoHS directive - 2002/95 / EC (Restriction of Hazardous Substances Directive) adopted in February 2003 by the European Community. The legislation imposes restrictions on the use of certain hazardous substances in the construction of various types of electrical and electronic equipment.

SUPPORT MATERIALS GUIDE

NON-CRACKED CONCRETE

Compressed concrete due to its position in the structure. Assumed of resistance $\geq C20 / 25$ ($f_{ck} \geq 250$). Critical applications for safety fixing requires specific products (Technical approval European Option 7)

CONCRETE HOLLOW BLOCK

Agglomerated hollow cementitious elements, with perforated volume and variable shape. Used for partitioning. Fixing requires specific anchors. The cut is possible with universal discs.

AERATED CONCRETE

Gasbeton. Elements obtained from ground sand, lime and cement, porous, friable and light. Employed on masonry constructions, load-bearing and non-load bearing walls. Compressive strength is 3 N/mm^2 approx. Fixing requires the use of specific products.

TENSE/CRACKED CONCRETE

Uncompressed concrete that is under tension due to its position in the structure. Assumed resistance $\geq C20 / 25$ ($f_{ck} \geq 250$). Critical applications for safety fixing requires specific products (Technical approval European Option 1).

UNRENDERED HOLLOW BRICK/ RENDERED HOLLOW BRICK

Clay elements, with 45% or more of hollow volume, Tied with cement mortar: Fixing and cutting requires specific products.

DRYWALL

Plaster slabs enclosed between two sheets of tight cardboard. Low resistance, friable. The single slabs are typically 10 mm or 13 mm thick. The walls are made in single, double or triple slab. Fixing requires specific products.

NATURAL STONE

Compact, high resistance natural stones such as granite, basalt, marble, porphyry, dolomite. Same assumed resistance applied to concrete for fixing purposes. For security applications testing is required.

LIGHTWEIGHT CONCRETE

Concrete with a lower density ($< 600 \text{ kg / m}^3$) less than normal concretes due to light conglomerates (eg clay, polystyrene) instead of inert materials.

WOOD

Solid aged wood, belong to the types and categories 1 and 2 listed on UNI 8198 and considered from Eurocode 5.

FULL BRICK

Clay elements, full or with hollow volume $< 15\%$, linked between them with mortar. Used for exposed brick walls, walls bearing and not. Fixing requires products specific. Cutting is possible with universal disks.

2-LOCK

The only double steel tooth cable tie

WO 2012/075034 A1
EP 2 646 338 B1

Designed and manufactured
in Italy

DNV-GL TAE0000006

UL E86244

ELE120817CS001

MAXIMUM GRIP

The innovative double tooth locking system allows to reach nominal grip values up to 80 kg.

SAFETY AND RELIABILITY

The INOX AISI 316 steel double cage is incorporated in the head: no detachment for total security and reliability.

RESISTANT TO UV RAYS AND LOW TEMPERATURES

Safe and guaranteed even in low temperatures applications, up to -40°C . The 2-LOCK ties in black are produced in resistant polyamide, durable against UV rays and atmospheric agents, for permanent installations in external environment.

INNOVATION AND EXCLUSIVITY

The 2-LOCK innovative locking system and the exclusive production process are internationally patented.

2-LOCK™ Cable Ties

Professional cable ties, in polyamide 6.6, having an innovative double locking system in stainless steel: maximum performance and reliability

Features and benefits

- The special AISI 316 stainless steel locking system, directly incorporated into the head during the injection manufacturing process, allows the highest performances and reliability
- The double tooth mechanism allows a double locking, on both side of ties, for an ultimate tightening of the bundles
- Perfect wiring: the smooth profile without racks offers infinite adjustment along the length of the tie and always a correct tensioning for any bundling diameters
- Resistance and reliability at low operating temperature up to -40°C
- 2-LOCK™ cable ties, in black color, are manufactured of special UV-resistant polyamide, for extreme outdoor applications
- 2-LOCK™ cable ties are packed in an innovative resealable bag: this avoids any dispersion after the first opening, maintaining the superior characteristics of the ties.

Technical documents

Body material	polyamide 6.6
Cage material	stainless steel INOX AISI 316
Halogen	absent
Humidity absorption (50% relative humidity)	2,7%
Working temperature	$-40^{\circ}\text{C} \div +85^{\circ}\text{C}$
Installation temperature	$-40^{\circ}\text{C} \div 60^{\circ}\text{C}$
Flammability rating	UL94 class V2

Resistance external agents:

UV-resistant (2-Lock in black color). Excellent chemical resistance to aromatic solvents, oils, greases, oil-based products. Good chemical resistance to bases. Limited resistance to acids. Does not resist to phenol and chlorinated solvents. Corrosion Resistant (Overmoulded Locking System in A4-AISI 316 stainless Steel)

Applications

- Control panels
- Switchboards
- Electrical building installation
- Industrial plants
- Automotive wiring harness
- Solar energy Installations
- Outdoor and special applications

Approvals and certifications

Compliant with CEI EN 62275 standard

Standard Cable Ties

Technical cable ties, in polyamide 6.6, for professional application

Features and benefits

- Guaranteed quality and performances by numerous approvals according to different international product standard
- Black cable ties, made of polyamide with special additives, have superior UV resistance than the natural colour ties

Technical documents

Material	polyamide 6.6
Halogen	absent
Humidity absorbtion (50% relative humidity)	2,7%
Working temperature	-40°C ÷ +85°C
Installation temperature	-10°C ÷ 60°C

Easy Belturing Cable Ties

Outside serrated cable ties with low profile head and manufactured with UV-resistant polymer. Tool-free installation

Features and benefits

- Easy insertion with low effort: maximum installation speed and important time saving
- Easy Belturing cableties can be installed without any tool: ideal for overhead lines or when working in difficult positions
- High resistance to ultraviolet radiation and in outdoor exposure conditions
- The external rack and the parallel locking system offer a smooth surface to the fastened cables avoiding any damages to the insulation
- Easy installation even at very low temperatures up to -30 ° C
- Temporary locking position allows re-opening of the ties for addition or removal of cables

Technical documents

Material	technopolymer
Halogen	absent
Humidity absorbtion	<1,5%
Working temperature	-40°C ÷ 95°C
Installation temperature	-30°C ÷ 60°C
Flammability rating	UL 94 class HB

Resistance external agents:

UV-resistant. (Tested according to ISO 4892-2 : 1000h Xenon-Arc Lamp exposure). Excellent chemical resistance to aromatic solvents, oils, greases, oil-based products. Good chemical resistance to bases. Limited resistance to acids. Does not resist to phenol and chlorinated solvents.

Applications

- Electrical installation
- Industrial cables harness
- Solar energy and photovoltaic installations
- Heavy-duty outdoor cable bundling and installations

Laying instructions

Approvals and certifications

Compliant with CEI EN 62275 standard

HALOGEN FREE

EASY BELTURING BLACK - UV-RESISTANT

Description	Width (mm)	Length (mm)	Ø bundle max (mm)	Tensile Strength (kg)	Tensile Strength (N)	Pack (pcs.)	Code
Easy belturing 8,8x180 single head	8,8	180	38	39,78	390	100	6551E
Easy belturing 8,8x270 double head	8,8	270	63	57,12	560	100	6553E
Easy belturing 8,8x360 double head	8,8	360	93	57,12	560	100	6555E

Belturing Plus

Outside serrated cable ties with low profile head and manufactured with UV-resistant polymer. For high resistance outdoor application

Features and benefits

- High resistance to ultraviolet radiation and in outdoor conditions with significant thermal excursion
- The external rack and the parallel locking system offer a smooth surface to the fastened cables avoiding any damages to the insulation
- Temporary locking position allows re-opening of the ties for addition or removal of cable
- Packed in special box, with hanging system and re-closing top, for the best using confort and protection in the jobsite

Technical documents

Material	technopolymer
Halogen	absent
Humidity absorbtion	<1%
Working temperature	-45°C ÷ 85°C
Installation temperature	-30°C ÷ 60°C
Flammability rating	UL 94 class HB

Resistance external agents:

UV-resistant. (See Approvals: Tested according to ISO 4892-2: Xenon-Arc Lamp exposure). Excellent chemical resistance to aromatic solvents, oils, greases, oil-based products. Good chemical resistance to bases. Limited resistance to acids. Does not resist to phenol and chlorinated solvents.

Applications

- Electrical installation
- Solar energy and photovoltaic installations
- Industrial cables harness
- Heavy-duty cable fastening and cable bundling
- In outdoor applications

Installation cable ties

Colspeed

Outside serrated cable ties with low profile head. Manufactured in polyamide 6.6, allow installation without any tool

Features and benefits

- Flexible and elongated tail for reduced insertion effort
- Smooth shape, ergonomic ribbed grips for an easy installation also without any tools.
- The external rack and the parallel locking system offer a smooth surface to the fastened cables avoiding any damages to the insulation
- For using in application where high-strength performance are definitely required

Technical documents

Material	polyamide 6.6
Halogen	absent
Humidity absorbtion	2,7% (50% relative humidity)
Working temperature	-40°C ÷ 85°C
Installation temperature	-10°C ÷ 60°C
Flammability rating	UL 94 class V2

Resistance external agents:

Excellent chemical resistance to aromatic solvents, oils, greases, oil-based products. Good chemical resistance to bases. Limited resistance to acids. Does not resist to phenol and chlorinated solvents.

Applications

- Electrical installations
- Industrial and automotive cables harness
- Cable assembly in switchboards and control panels

Approvals and certifications

Compliant with CEI EN 62275 standard

Hand tools
from page 188

COLSPEED BLACK

Description	Width (mm)	Length (mm)	Ø bundle max (mm)	Tensile Strength (kg)	Tensile Strength (N)	Pack (pcs.)	Code
Colspeed 8,8x200 single head	8,8	200	40	40,8	400	100	6501E
Colspeed 8,8x290 double head	8,8	290	70	59,16	580	100	6502E
Colspeed 8,8x380 double head	8,8	380	100	59,16	580	100	6503E

UV-Resistant Cable Ties

Technical cable ties, in polyamide 6.6 uv-resistant, suitable for outdoor applications

Features and benefits

- Excellent resistance to ultraviolet radiation; cable ties passed the tests, for UV resistance, defined by the CEI EN 62275 standard, maintaining, after the test conditions, the 100% of the tensile declared strength (ISO 4892 - 2 - A method - 1000 hours at the xenon arc - equivalent to about 10 years of solar irradiation typical of southern European regions)
- Also suitable for installations at high operating temperatures (up to 85°C)

Applications

- Solar energy installation
- Outdoor industrial applications

Approvals and certifications

Compliant with CEI EN 62275 standard

HALOGEN FREE

Technical documents

Material	polyamide 6.6.
Halogen	absent
Humidity absorbtion	2,7% (50% relative humidity)
Working temperature	-40°C ÷ 85°C
Installation temperature	-10°C ÷ 60°C
Flammability rating	UL 94 class V2

Resistance external agents:

High UV resistance (certified by DNV), excellent resistance to aromatic solvents, oils, greases, petroleum products, good resistance to bases, limited resistance to acids. Does not resist phenol and chlorinated solvents.

Hand tools

Heat Resistant Cable Ties

Technical cable ties, suitable for high temperature applications, up to 150°C

Hand tools
from page 190

Features and benefits

- High temperatures resistance: up to 125°C in continuous, up to 150°C for 500 h.

Technical documents

Material	polyamide 6.6 with additives
Halogen	absent
Humidity absorbtion	2,7% (50% relative humidity)
Working temperature	from -40°C to 125°C
Installation temperature	-10°C ÷ 60°C
Flammability rating	UL 94 class V2

Resistance external agents:

Resistant to high temperatures. Excellent chemical resistance to aromatic solvents, oils, greases, oil-based products. Good chemical resistance to bases. Limited resistance to acids. Does not resist to phenol and chlorinated solvents.

Applications

- Automotive wiring harness in engine compartments
- Industrial high temperature cabling

Approvals and certifications

Compliant with CEI EN 62275 standard

HALOGEN FREE

Self-Extinguishing Cable Ties

Self-extinguishing cable ties, in polyamide VO, for higher fire protection. Halogen and phosphorus free

Features and benefits

- Manufactured in self-extinguish polyamide with extremely low toxic gas emission in fire situations
- Good flammability behaviour

Technical documents

Material	polyamide 6.6 with additives
Halogen	absent
Humidity absorption	2,7% (50% relative humidity)
Working temperature	-40°C ÷ 85°C
Installation temperature	-10°C ÷ 60°C
Flammability rating	UL 94 class VO - GW 960°C

Resistance external agents:
Excellent flammability behaviour (UL94 VO). Excellent chemical resistance to aromatic solvents, oils, greases, oil-based products. Good chemical resistance to bases. Limited resistance to acids. Does not resist to phenol and chlorinated solvents.

Applications

- Rolling stock wiring harness, cable bundling in ship building and marine installations
- Underground electrical installations
- Electrical cables harness in tunnels
- Wiring harness with fire protection in civil, commercial and industrial building (cinemas, theatres, hospitals, schools)

Approvals and certifications

Compliant with CEI EN 62275 standard

Certificate according to UNI EN 45545-2: 2015 (concerning railway applications - Fire protection on railway vehicles and requirements for materials and components fire behaviours in the railway sector)

HALOGEN FREE

Detectable Cable Ties

Detectable cable ties for food and pharmaceutical industries

Features and benefits

- The inclusion of an iron oxide additive in the polyamide material enables cable ties or related small sections to be detected by the metal detectors or X-ray inspection systems
- The blue colour allows an easy visual inspection and detection
- Use of detectable cable ties in plants installation, machines cabling and maintenance allows the agro-food and pharmaceutical industries to comply with the Hazard Analysis Critical Control Points principles (HACCP). This preventive approach is implemented to identify and eliminate potential hazard and contaminations in the food production processes

Technical documents

Material	polyamide 6.6 with iron oxide
Halogen	absent
Humidity absorbition	2,7% (50% relative humidity)
Working temperature	-40°C ÷ 85°C
Installation temperature	-5°C ÷ 60°C
Flammability rating	UL 94 class HB

Not suitable for food contact

Resistance external agents:

Excellent chemical resistance to aromatic solvents, oils, greases, oil-based products. Good chemical resistance to bases. Limited resistance to acids. Does not resist to phenol and chlorinated solvents.

Applications

- Cables bundling, cable harness and machine cables assembly and maintenance into the agro-food and pharmaceutical processing industries.

Approvals and certifications

Compliant with CEI EN 62275 standard

HALOGEN FREE

Coloured Cable Ties

Technical cable ties, in coloured polyamide 6.6, for an easy identification or differentiation

Features and benefits

- Available in four colours: red, yellow, green, blue

Technical documents

Material	polyamide 6.6 added with coloured master
Halogen	absent
Humidity absorbtion	2,7% (50% relative humidity)
Working temperature	-40°C ÷ 85°C
Installation temperature	-10°C ÷ 60°C
Flammability rating	UL 94 class HB

Resistance external agents:

Excellent chemical resistance to aromatic solvents, oils, greases, oil-based products. Good chemical resistance to bases. Limited resistance to acids. Does not resist to phenol and chlorinated solvents.

Applications

- Electrical installation
- Industrial cable harness, switchboards
- Logistic
- Packaging and special applications

Approvals and certifications

Compliant with CEI EN 62275 standard

Identification Ties with Plate

Technical cable ties with identification plate allow bundles and cabling to be easily marked and identified

Features and benefits

- Ideal for electrical wiring, bundles and in the cabling applications
- Transversal, longitudinal or external identification plate can be easily marked with label or a permanent marker and allows bundles or cables to be easily identified

Technical documents

Material	polyamide 6.6
Halogen	absent
Humidity absorption	2,7% (50% relative humidity)
Working temperature	-40°C ÷ 85°C
Installation temperature	-10°C ÷ 60°C
Flammability rating	UL 94 class V2

Resistance external agents:

Excellent chemical resistance to aromatic solvents, oils, greases, oil-based products. Good chemical resistance to bases. Limited resistance to acids. Does not resist to phenol and chlorinated solvents.

Applications

- Electrical installation
- Industrial cable harness
- Switchboards
- Automotive wiring harness
- Other special applications

Approvals and certifications

Compliant with CEI EN 62275 standard

Fixing Cable Ties

Fixing ties with screw mount head or arrowhead anchoring allow to fix bundles and cabling to panels or to different supports by screws, bolts, or rivets

Features and benefits

- Fixing ties with arrowhead anchoring for fastening bundles or cable to panels up to 3 mm thickness
- Fixing ties with screw mount head for fastening bundles or cable to any surface. The possibility of using screws, bolts or rivets offers flexibility and strong fixation to any supports

Technical documents

Material	polyamide 6.6
Halogen	absent
Humidity absorbtion	2,7% (50% relative humidity)
Working temperature	-40°C ÷ 85°C
Installation temperature	-10°C ÷ 60°C
Flammability rating	UL 94 class V2

Resistance external agents:

Excellent chemical resistance to aromatic solvents, oils, greases, oil-based products. Good chemical resistance to bases. Limited resistance to acids. Does not resist to phenol and chlorinated solvents.

Releasable Cable Ties

Releasable and reusable cable ties, suitable for temporary bundling and when open-close function is necessary in different industrial and commercial applications

Features and benefits

- The release mechanism allows easy and manual opening of the ties.
- Opened ties can be reused for new fastenings

Technical documents

Material	polyamide 6.6
Halogen	absent
Humidity absorbtion	2,7% (50% relative humidity)
Working temperature	-40°C ÷ 85°C
Installation temperature	-10°C ÷ 60°C
Flammability rating	UL 94 class V2

Resistance external agents:

Excellent chemical resistance to aromatic solvents, oils, greases, oil-based products. Good chemical resistance to bases. Limited resistance to acids. Does not resist to phenol and chlorinated solvents.

Applications

- Electrical installation
- Industrial cables harness
- Switchboards
- Automotive wiring harness
- Other special applications

Approvals and certifications

Compliant with CEI EN 62275 standard

EASY BELTURING

THE **PERFECT**
CABLE TIE
FOR **OUTDOOR**
APPLICATION

TIME SAVINGS

The application time is **at least 1/3** less compared to competitors' ties.

HIGH RESISTANCE TO UV RAYS

High **resistance to UV** rays (ISO 4892-2 test).

LOW INSERTION EFFORT

thanks to the material characteristics and the tie structure.

THE BEST PERFORMANCES

Very high resistance to atmospheric agents, high operating temperature, **superior mechanical strength**.

EASY TO INSTALL

It can be installed **without tools**.
Easy tightening even in **uncomfortable positions**.

Colsteel

Completely stainless steel cable tie, with high mechanical strength, resistant to the fire and corrosion

Features and benefits

- Quick installation, by manual tightening and tensioning with the specific tool
- The ball locking mechanism and the smooth surface offer a very low insertion effort and an infinitely calibrated closing adjustment along all the length of the tie
- High mechanical strength: for safety and high performance applications, which can be guaranteed, only with a metal tie
- The total-smooth profiles and surfaces avoid any damage to the insulation of the electrical cables to be bundled
- Fire resistant, suitable for very high operating temperatures
- Maximum resistance to ultraviolet rays exposure
- Available in 304 and also in 316 stainless steel grade for the highest corrosion and chemical resistance

Technical documents

Material	stainless steel INOX AISI 304 and 316
Working temperature	-80°C ÷ 538°C Not inflammable
Resistance external agents:	Excellent resistance to acids, oils, greases, oil-based products, chemical and oxidizing agents, solvents. High resistance in salt mist atmosphere. Corrosion resistant. UV-resistant

Applications

- Fastening and bundling of cables and pipes in hard environments like oil rigs off-shore installations, oil pipelines, chemical plants, ship buildings, mining
- Different electrical installation for fire protections, solar thermal and photovoltaic installations subjected to higher solar exposure or adverse climatic conditions

Approvals and certifications

Compliant with CEI EN 62275 standard

Anchoring Base for Cable Ties

Polyamide anchoring base for cable ties, for fixing to different building materials. To be used with any cable tie up to 9mm wide

5458E

5459E
SPACED

5456 AE - 5458 AE
WITH WINGS

Base materials

Technical documents

Material	polyamide 6 - nero
Halogen	absent
Humidity absorption (50% relative humidity)	3,0 %
Working temperature	-10°C + 65°C
Min. Installation temperature	-5°C
Flammability rating	UL94 class V2
Resistance external agents: Excellent chemical resistance to aromatic solvents, oils, greases, oil-based products. Good chemical resistance to bases. Limited resistance to acids. Does not resist to phenol and chlorinated solvents.	

Applications

- Light-duty anchoring base for fastening cables and pipes, by cable ties, in civil, commercial and industrial electrical installations

Installation

- Push directly into the drilled hole. The fixing immediately wedges in the building material

Approvals and certifications

Compliant with CEI EN 62275 standard

HALOGEN FREE

Threaded Fixing Base for Cable Ties

Threaded base M6/7 suitable for cable ties up to 9mm wide. To be fixed, by metric-head plugs, to different building supports

Base materials

Technical documents

Material	polyamide 6 - black/gray
Halogen	absent
Humidity absorption (50% relative humidity)	3,0 %
Working temperature	-10°C ÷ 65°C
Min. installation temperature	-5°C
Flammability rating	UL94 class V2
Resistance external agents: Excellent chemical resistance to aromatic solvents, oils, greases, oil-based products. Good chemical resistance to bases. Limited resistance to acids. Does not resist to phenol and chlorinated solvents.	

Applications

- For fixing, by metric-head plugs, to solid building materials (concrete, solid brick, etc.)

Installation

- Screw directly to pre-installed plugs, anchors or screws having metric threaded head

Approvals and certifications

Compliant with CEI EN 62275 standard

HALOGEN FREE

Screw Fixing Mounts

Screw fixing mount in polyamide 6.6, to secure cables and pipes, by cable ties up to 4,8 mm width. For fixing to boards with countersunk screws or rivets

Applications

- Fixed by screws, rivets or bolts to boards, the base provides a simple and compact support for fastening cables with ties into switchgears and cabinets

Installation

- Fix the base by screws, rivets or bolts and secure cables or pipes by cable ties.

Approvals and certifications

Compliant with CEI EN 62275 standard

Two-way Mounting Bases

Bi-directional mounts, in ABS material, white or black colour, self-adhesive or for screw fixing

Features and benefits

- Available for two different mounting, these bases allow a simple, flexible and safe fastening by cable ties up to 4,8 mm width
- The syntetic rubber adhesive ensures a very fast adhesiveness, allowing an immediate fixing of the cables and pipes.
- The acrylate adhesive, which ensures very high pull-off performances after 24 hours, allows the mounts to be used for long-term and heavy applications, even when exposed to high temperatures

Applications

- Fastening of cables or bundles with ties into electrical switchgears and cabinets and in a wide variety of indoor application

Technical documents

Material	ABS
Halogen	absent
Working temperature	-10°C ÷ 60°C
Flammability rating	UL94 class HB

Installation

- Screw fixing mounts: to be fixed with screws, bolts, rivets or additional adhesive supports
- Self-adhesive mounts - acrylate: to be loaded after 24 hours from installation
- For a secure installation of the self-adhesive mounts, the surfaces must be carefully cleaned and degreased with solvent (alcohol or other cleaning product)

Approvals and certifications

Compliant with CEI EN 62275 standard

HALOGEN FREE

ADHESIVE PROPERTIES

Type of support	Rubber base - Polyethylene	Acrylic base - Polyurethane
Density	85 Kg/cm ³	320 Kg/cm ³
100 hour static shear adhesion *	0,7 kg/cm ²	0,6 kg/cm ²
Tensile strength	10 kg/cm ²	16,5 kg/cm ²
U.V. Resistance	not recommended	good
Working temperature	-40 °C ÷ 60 °C	-40 °C ÷ 90 °C
Recommended application temperature	18 °C ÷ 35 °C	18 °C ÷ 35 °C
Stocking temperature	18 °C ÷ 30 °C	18 °C ÷ 30 °C
Shelf life	12 months	24 months
Use	immediate application	application after 24h rest

* On degreased and dry galvanized metal surface

MOUNTING BASES ADHESIVITY

Maximum static load recommended	Rubber base adhesive	Acrylic base adhesive
Dimensions 19x19 mm	125 gr	150 gr
Dimensions 27x27 mm	300 gr	300 gr

INSTALLATION INSTRUCTIONS

Clean the surface using an appropriate cleaner and wait until completely dried.

Peel off the protective film avoiding touching the adhesive.

Apply the base on the surface pressing down for few seconds.

For the best results wait time indicated in the technical table.

Detectable Two-way Mounting Bases

Bi-directional self-adhesive mounts.
Detectable by metal detecting and X-ray equipments

Features and benefits

- The iron oxide added into polyamide 6.6 offer an excellent detectability allowing the use in the food and pharmaceutical processing plants
- The reduced curing time of syntetic rubber adhesive allows immediate fastening and loading of cables and bundles

Applications

- Electrical installations and other fastening in Pharmaceutical and agri-food processing plants

Technical documents

Material	polyamide 6.6 blue with iron oxide
Halogen	absent
Working temperature	-5°C ÷ 60°C
Flammability rating	UL94 class HB

Installation

- For a secure installation of the self-adhesive mounts, the surfaces must be carefully cleaned and degreased with solvent (alcohol or other cleaning product)

Approvals and certifications

Compliant with CEI EN 62275 standard

HALOGEN FREE

For the adhesive technical characteristics and the application methods, see page 38

Self-adhesive Fixing Clips for Round Cables

Self-adhesive clips in polyamide, natural or black colour, with acrylate or synthetic rubber based adhesives, for easy fastening of round cables

Features and benefits

- The synthetic rubber adhesive ensures a very fast adhesiveness, allowing an immediate fixing of the cables and pipes.
- The acrylate adhesive, which ensures very high pull-off performances after 24 hours, allows the mounts to be used for long-term and heavy applications, even when exposed to high temperatures

Applications

- For the indoor fastening of cables into switchgears and control cabinets

Technical documents

Material	polyamide 6.6
Halogen	absent
Working temperature	-40°C ÷ 85°C
Flammability rating	UL94 class V2

Installation

- Self-adhesive clips - acrylate: to be loaded after 24 hours from installation
- For a secure installation of the self-adhesive clips, the surfaces must be carefully cleaned and degreased with solvent (alcohol or other cleaning product)

Approvals and certifications

HALOGEN FREE

Self-adhesive Clips for Flat Cables

Self-adhesive clips in polyvinylchloride (PVC), with rubber based adhesive, for fixing of flat cables

Features and benefits

- The synthetic rubber adhesive ensures a very fast adhesiveness, allowing an immediate fixing of the cables and pipes

Installation

- For a secure installation of the self-adhesive Clips, the surfaces must be carefully cleaned and degreased with solvent (alcohol or other cleaning product)

Technical documents

Material	PVC
Working temperature	-10°C + 70°C
Flammability rating	UL94 class VO

Applications

- For the indoor fastening of cables into switchgears and control cabinets

For the adhesive technical characteristics and the application methods, see page 38

ADHESIVE CABLE CLIP FOR FLAT CABLE

Cable Clips

Cable clip in polyethylene, high temperatures resistant, white colour, with hardened and galvanized steel nail

Features and benefits

- Easy installation thanks to the hammer-in application
- High Resistant steel nails

Applications

- Fixing of electric cables on masonry and wooden supports

Technical documents

Material	High-density polyethylene with high thermic resistance
Working temperature	-40°C ÷ 100°C
Flammability rating	UL94 class V2

Approvals and certifications

E-bloks Single Pole Terminal Blocks

Single pole terminal blocks, 1 or 2 inputs, in transparent Polycarbonate, with screw clamping, for free connections

Features and benefits

- Single pole terminal blocks can be easily split up from the 10 or 5 pins bars
- Fast and safe connection and tightening thanks to the increased dimensions of the insulating body of the terminal and of the screws

Technical data

Insulation material	transparent polycarbonate, polyamide interiors and bases
Material of insert	brass
Screw material	zinc-plated steel
Halogen	absent
Working temperature	-5°C ÷ 85°C
Heat resistance	130°C
Flame retention	UL94 class V2

Applications

Multi-Way Terminal Blocks

Multi-way terminal blocks for junctions between conductors, with screw clamping, for operating temperatures up to 85 ° C (Polyethylene Insulation) and up to 110 ° C (Polyamide Insulation)

Technical data

Insulation material	clear polyethylene neutral polyamide
Material of insert	brass (PE version) nickel brass (PA version)
Screw material	zinc-plated steel
Halogen	absent
Working temperature	-5°C ÷ 85°C (PE version) -30°C ÷ 110°C (PA version) max 150°C for short period (PA version)
Flame retention	UL94 class V2 (PA version)

Applications

- Junctions or shunts of conductors in industrial and domestic electrical wiring.

Approvals and certifications

EN 60998-2-1: 2004 (PE line - PA line)

EN 60998-1 + A1: 2001 (PA line)

Non-insulated End-sleeves

Non-insulated end-sleeves for copper conductors ends

Features and benefits

- Protecting and compacting ends of copper conductors, to facilitate the inserting in the terminal blocks

Technical data

Conductor material electrolytic tinned copper (purity grade 99.9%)

Applications

- Cabling and connections in electrical and electronic switchgears

Approvals and certifications

Compliant with DIN 46228/1

HALOGEN FREE

Insulated End-sleeves for Single Cable

Polypropylene Insulated end-sleeve for single copper conductors end

Features and benefits

- Excellent electrical conductivity (tinned copper, 99.9%)
- Availability of three colour ranges (T-W-D)
- Available in 50-piece strips (0.5 ÷ 2.5 mm²)

Technical data

Conductor material	electrolytic tinned copper (purity grade 99.9%)
Insulation material	PVC for joints and grafts. Self-extinguishing UL94 class V2
Halogen	absent
Working temperature	-10°C ÷ 105°C
Installation temperature	0°C ÷ 60°C
Maximum allowable temperature	120°C for short period
Resistance to external agents	
Good resistance to bases and weak acids. Limited resistance to strong oxidant acids, oils and minerals. No resistance to chloride solvents.	

Applications

- Cabling and connections in electrical and electronic switchgears

Approvals and certifications

Compliant, by color and size, with DIN 46228/4
CSA Certification No. 250148

HALOGEN FREE

Insulated End-Sleeves for Two Cables

Polypropylene insulated end-sleeves for two copper conductors ends

Features and benefits

- Excellent electrical conductivity (tinned copper, 99.9%)
- Available in two color ranges (T-D)
- Allows the inserting of two connectors in the same input of the terminal block

Technical data

Conductor material	electrolytic tinned copper (purity grade 99.9%)
Insulation material	polypropylene self-extinguishing UL94 class V2
Halogen	absent
Working temperature	-10°C + 105°C
Installation temperature	0°C + 60°C
Maximum allowable temperature	120°C for short period
Resistance to external agents	
Good resistance to bases and weak acids. Limited resistance to strong oxidant acids, oils and minerals. No resistance to chloride solvents.	

Applications

- Cabling and connections in electrical and electronic switchgears

Approvals and certifications

Compliant, by color and size, with DIN 46228/4
 CSA Certification No. 250148

HALOGEN FREE

Assortment of Insulated End-Sleeves

Assortment in dispenser box of insulated end-sleeves, in different sizes and colors

Features and benefits

- The assortment of various sections and colors makes it possible to find the most suitable terminal for installation needs
- The transparent dispenser box is divided into separate sectors in order to facilitate the choice of the terminal
- Box dimensions: diameter = 90 mm; h = 45 mm

Applications

- Cabling and connections in electrical and electronic switchgears

Approvals and certifications

Compliant, by color and size, with DIN 46228/4
 CSA Certification No. 250148

Insulated Terminal Lugs

Insulated terminal lugs in electrolytic tinned copper, available with Nylon and PVC insulation

Features and benefits

- Electrolytic copper (at 99.9%) annealed and electrolytically tinned to facilitate cable crimping
- The Nylon insulated terminals are equipped with "Easy Entry" barrel to make the insertion of the conductors quicker and easier
- The PVC Insulated terminals are equipped with special barrel with anti-vibration end-sleeve to avoid tearing and unthreading of the cable even in conditions of high mechanical stress

Technical data

Conductor material	electrolytic tinned copper (purity grade 99.9%) obtained from annealed and electrolytically tinned copper sheets
Insulation material	Nylon (Easy Entry system) for rings, forks, pins and connectors PVC for joints and grafts. Self-extinguishing UL94 class V2
Working temperature	Nylon up to 105°C PVC up to 75°C

Applications

- Connection of cables on terminal blocks (ring, fork and pin type)
- Connection and insulation of electric cables (caps and terminals)
- Leads, junctions and cable insulation (quick connectors)
- Connection of cables (joints and couplings)

Approvals and certifications

Compliant with DIN 46237 (eyelets, forks, tips) UL Certification - E344191 / E344188

HALOGEN FREE

only with insulating Nylon

Joint Connectors - Heat Shrinking Insulation

Tinned copper joint with a heat-shrinking Insulation and internal hot-melt adhesive for waterproofing joints

Features and benefits

- Effective sealing and insulation of electrical connections

Applications

- Waterproofing joints in the connection of cables

Technical data

Conductor material	electrolytic tinned copper (purity grade 99.9%)
Insulation material	cross-linked polyolefin
Halogen	absent
Shrinkage temperature	100°C
Working temperature	-55°C ÷ 125°C
Dielectric strength	30 kV/mm

HALOGEN FREE

JOINT CONNECTORS - HEAT SHRINKING INSULATION

Description	Cable section (mm ²)	Cable section (AWG)	Length (mm)	ø seat (mm)	Color	Pack (pcs.)	Code
			A	B			
Joint connectors heat shrinking insulation 0,25÷1,5	0,25 ÷ 1,5	22 ÷ 16	36	5,4	●	100	11221140
Joint connectors heat shrinking insulation 1,5÷2,5	1,5 ÷ 2,5	16 ÷ 14	36	5,8	●	100	11221250
Joint connectors heat shrinking insulation 4÷6	4 ÷ 6	12 ÷ 10	41	6	●	100	11221465

Hand tools for terminals
from page 190

Non-insulated Tubular Cable Lugs

Non-insulated tubular cable lugs in tinned copper at high conductivity

Features and benefits

- Countersunk barrel for easy insertion of the cable
- Tinner surface treatment to protect from oxidising
- Each cable lugs is marked with the cable section and the hole diameter
- The annealing of the material guarantees an optimal and easy crimping

Technical data

Conductor material	electrolytic tinned copper (purity grade 99.9%)
Tinning thickness	4 µm

Applications

- Connection of cables in domestic and industrial switchgears and cabinet
- Head joints with copper electric cables

Approvals and certifications

Compliant with IEC 1238-1: 1993

HALOGEN FREE

Hand tools for terminals

How to choose the right heat-shrink tube

TECHNICAL CHARACTERISTICS

	PRODUCT	SHRINKING RATIO	OPERATING TEMPERATURE (C°)	SHRINKING TEMPERATURE (C°)	FLAME RATING (C°)	Ø AVAILABLE (mm)	CHARACTERISTICS	COLOURS	PACKAGING	PAGE
THIN WALL	EV 100	2:1	-30°C÷105°C	>90°C	-	1,6÷50,8	General purpose Competitive priced	Black	Reel Box 1 mtr length	66
	ET 100	2:1	-55°C÷135°C	>90°C	UL 224	1,2÷101,6	General purpose	Black Colours	Reel Box 1 mtr length	68
	EL 100	2:1	-55°C÷135°C	>90°C	UL 224 VW1	1,6÷101,6	Professional	Black	Reel Box	72
	ET 301	3:1	-55°C÷135°C	>100°C	UL 224	1,5÷39	General purpose high shrinking ratio	Black	Reel Box 1 mtr length	74
DUAL WALL THIN ADHESIVE-LINED	EL 301A	3:1	-55°C÷110°C	>100°C	UL 224 (parete esterna)	3÷24	Professional purpose adhesive-lined	Black	Box 1 mtr length	78
MEDIUM WALL WITH ADHESIVE	EM 100A	3:1	-40°C÷120°C	>110°C	-	12÷180	Heavy applications adhesive-lined	Black	1 mtr length	80

In order to choose the right heat-shrink tubing size, it is necessary that the diameter of the shrunk tubing allows the perfect adhesion between the tubing and the cable diameter that has to be covered. This result is achieved when the tubing shrinks between 20% and 80% of its complete shrinkage capacity. Herewith some examples:

EXAMPLE 1

Image to have a cable of 10 mm diameter to be wrapped with a heat-shrink tubing with a shrinking ratio of 3:1; in theory both sizes 12/4 and 24/8 would be suitable, since the required diameter of 10 mm lies within the shrinking range of both tubing sizes:

Tubing type	Ø nominal max expanded (mm)	Ø nominal min recovered (mm)	Shrinkage capacity (mm)	Minimum shrinking (20%)	Maximum shrinking (80%)
12/4	12	4	8	10,4	5,6
24/8	24	8	16	20,8	11,2

The right heat-shrink tube is 12/4.

EXAMPLE 2

Image to have a cable of 5 mm diameter to be wrapped with a heat-shrink tubing with a shrinking ratio of 2:1; in theory both sizes 6,4/3,2 and 9,5/4,7 would be suitable, since the required diameter of 5 mm lies within the shrinking range of both tubing:

Tubing type	Ø nominal max expanded (mm)	Ø nominal min recovered (mm)	Shrinkage capacity (mm)	Minimum shrinking (20%)	Maximum shrinking (80%)
6,4/3,2	6,4	3,2	3,2	5,76	3,84
9,5/4,7	9,5	4,7	4,7	8,56	5,74

The right heat-shrink tube is 6,4/3,2.

COMPLETE EXAMPLE - THIN AND DUAL WALL TUBING

Tubing type	Shrinking ratio	Ø nominal max expanded (mm)	Ø nominal min recovered (mm)	Shrinkage capacity (mm)	Minimum shrinking (20%)	Maximum shrinking (80%)

EV 100

Thin wall heat-shrink tube 2:1, halogen free

Features and benefits

- Halogen free
- Thin flexible tubing in cross-linked polyolefin

Applications

- Electrical insulation in the cable connection
- Cable protection
- General purpose

Technical data

Shrinkage ratio	2:1
Available diameters	Ø 1,6mm ÷ Ø 50,8mm
Available colours	black
Halogen	absent
Working temperature	-30°C ÷ +105°C
Shrinkage temperature	>90°C
Fire resistance	FMVSS 302
Longitudinal withdrawal	-10% ÷ +5%
Dielectric strength	>20kV/mm

Approvals and certifications

FMVSS 302

Coloured thin wall heat-shrink tube
2:1 - Self-extinguishing

Features and benefits

- Thin flexible tubing in cross-linked polyolefin. Good mechanical strength, chemical resistant
- Self-extinguishing according to UL224 and available in different colors

Technical data

Shrinkage ratio	2:1
Available diameters	Ø 1,2mm ÷ Ø 101,6mm
Available colours*	black, white, red, blue, transparent, yellow/green
Halogen	absent
Working temperature	-55°C ÷ +135°C
Shrinkage temperature	>90°C
Fire resistance	Self-extinguishing according to UL224 (except transparent)
Longitudinal withdrawal	-5% ÷ +5%
Dielectric strength	>20kV/mm

* For colors other than black, add the color code to the article code: BI = white, BL = blue, R = red, TR = transparent

Applications

- Electrical and mechanical protection of cables
- Permanent electrical insulation
- Applications requiring self-extinguishing properties
- Cabling identification

Approvals and certifications

UL224 125°C - UL cert.E 228117*

CSA C22.22 N. 198.1-98 OFT*

*except transparent

ET 100 Assortment Display

Floor display with 1m heat-shrink tube boxes

Display technical data

Height	1.740 mm
Width	415 mm
Depth	345 mm
Assortment	24 boxes - 1 meter bars
Note: Code 8221705 for single display without set-up. For personalization contact our sales offices.

EL 100

Professional thin wall heat-shrink tube
2:1- highly self-extinguishing

CABLE PROTECTION

Features and benefits

- Thin flexible tubing in cross-linked polyolefin. High mechanical performances, chemical resistant to different substance and solvents
- Self-extinguishing according to UL224 VW-1

Technical data

Shrinkage ratio	2:1
Available diameters	Ø 1,6mm ÷ Ø 101,6mm
Available colours	black
Working temperature	-55°C ÷ +135°C
Shrinkage temperature	>90°C
Fire resistance	Self-extinguishing according to UL224 VW-1
Longitudinal withdrawal	-5% +5%
Dielectric strength	>20kV/mm

Applications

- Electrical and mechanical protection of cables
- Permanent electrical insulation
- Applications requiring self-extinguishing properties
- Cable bundling

Approvals and certifications

UL224 125°C VW1 - UL cert.E 228117
CSA C22.22 N. 198.1-98 OFT

ET 301

Thin wall heat-shrink tube 3:1 - self-extinguishing

Features and benefits

- High shrink ratio tubing in cross-linked polyolefin. High mechanical performances, chemical resistant to different substance and solvents
- Self-extinguishing according to UL224

Technical data

Shrinkage ratio	3:1
Available diameters	Ø 1,5mm ÷ Ø 39mm
Available colours	black
Working temperature	-55°C ÷ +135°C
Shrinkage temperature	>90°C
Fire resistance	Self-extinguishing according to UL224
Longitudinal withdrawal	+1% -10%
Dielectric strength	>20kV/mm

Applications

- Electrical and mechanical protection of cables
- Permanent Electrical Insulation
- Applications requiring self-extinguishing properties

Approvals and certifications

UL224 125°C - UL cert.E 228117
 CSA C22.22 N. 198.1-98 OFT

EL 301A

Dual wall heat-shrink tube 3:1,
with adhesive liner

Features and benefits

- High shrink ratio tubing in cross-linked polyolefin
- Good insulating performances. Sealing and high protection against humidity and external agents
- Good mechanical and chemical resistance
- Outer jacket self-extinguishing

Technical data

Shrinkage ratio	3:1
Available diameters	Ø 3mm ÷ Ø 24mm
Available colours	black
Working temperature	-55°C ÷ +110°C
Shrinkage temperature	>100°C
Fire resistance	Self-extinguishing (outer jacket)
Longitudinal withdrawal	-10% ÷ +1%
Dielectric strength	>20kV/mm

Applications

- Permanent electrical insulation and mechanical protection of cables and cables joints
- Protections in electronic applications

Approvals and certifications

EN 60684-2-248

EM 100A

Medium wall heat-shrink tube up to 4:1, with adhesive liner

CABLE PROTECTION

Features and benefits

- High shrink ratio tubing in cross-linked polyolefin
- Excellent electrical insulating performances
- Sealing and high protection against humidity and external agents
- High mechanical and chemical resistances

Technical data

Shrinkage ratio	3:1 - 4:1
Available diameters	Ø 12mm ÷ Ø 180mm
Available colours	black
Working temperature	-40°C ÷ +120°C
Shrinkage temperature	>110°C
Fire resistance	Not self-extinguishing
Longitudinal withdrawal	-10% ÷ 0%
Dielectric strength	>17kV/mm

Applications

- Insulation and protection of low voltage cable and cable joints
- Suitable for application in power switchgear and controlgear assemblies

Hot air guns

Neoprene Sleeves

Sleeves in lubricated neoprene for easy installing

Features and benefits

- Internally lubricated for an easy application
- Resistant to oil and solvents
- Good resistance to humidity and ageing
- Suitable for low temperature application

Applications

- Connectors protection
- Industrial wiring
- Application in switchgears and cabinets

Technical data

Material	lubricated neoprene
Available diameters	from Ø 1,75 to Ø 17 mm
Available colours	black
Working temperature	-30°C ÷ +90°C
Fire resistance	UL 94 class V0
Dielectric strength	13 kV/mm

Hot air guns

PVC Cable Protection Sleeve

PVC sleeve suitable for protection against abrasion

Features and benefits

- Easy insertion
- Resistant to ozone, ageing and weak acids

Applications

- Applications in switchgears and cabinets
- Industrial wiring
- Cable harness in automotive applications

Technical data

Material	PVC
Available diameters	from Ø 3 to Ø 50 mm
Available colours	black
Working temperature	-40°C ÷ +70°C
Fire resistance	UL 94 class V1
Dielectric strength	25 kV/mm

Polyethylene Spiral Binding

LDPE spiral binding for protecting and managing cables and cable bundles

Features and benefits

- Extremely flexible
- Quick installation in definitive wiring
- Easy to branch out the cable at any point

Technical data

Material	low density polyethylene
Available diameters	from Ø 3 to Ø 150 mm
Available colours	black and transparent
Working temperature	-50°C a 85°C
Fire resistance	UL 94 class HB
Halogen	Absent

Applications

- Organising and protecting cables in switchgear and electrical cabinets
- Industrial wiring

Braided Sleeve

Braided sleeving for mechanical protection of cables and for cable bundling

Features and benefits

- Easy insertion
- Resistant to abrasion

Applications

- Protection of cables in switchgears
- Industrial wiring

Technical data

POLYESTER VERSION

Material	Polyester
Thread diameters	0,22 mm
Working temperature	-40°C ÷ +150°C
Available diameters	from Ø 6 to Ø 40 mm
Fire resistance	UL 94 class V2
Halogen	Absent

POLYAMIDE 6.6 VERSION

Material	Polyamide 6.6
Thread diameters	0,25 mm
Working temperature	-40°C ÷ +125°C
Available diameters	from Ø 6 to Ø 40 mm
Fire resistance	UL 94 class V2
Halogen	Absent

Approvals and certifications

For polyester version:

EN 45545-21 (HL3)

DIN 5510-2

PVC Insulation Tape

Self-extinguishing PVC tape for mechanical and electrical applications

CABLE PROTECTION

Features and benefits

- Self-extinguishing
- Good electrical insulation
- Suitable for applications at low temperature
- Good resistance to abrasion
- Available in different colours

Technical data

Material	Self-extinguishing PVC
Thickness	0,13/0,15/0,18 mm
Adhesion to the steel	2,5N/cm
Back adhesion	2,2N/cm
Breaking load	25N/cm (0,13 mm version) 27N/cm (0,15 mm version) 30N/cm (0,18 mm version)
Elongation at break	200% (0,13 mm version) 200% (0,15 mm version) 250% (0,18 mm version)
Dielectric strength	40kV/mm
Working temperature	-18°C ÷ +90°C
Flammability resistance	Self-extinguishing

Applications

- Electrical installation in residential and industrial building
- Electrical insulation
- Cable identification
- Cable protection

Approvals and certifications

CEI EN 60454-3-1

VDE approval: n. 40039640"

Self-amalgamating Tape

Self-amalgamating tape in EPR to achieve a good mechanical protection and ideal for waterproofing

CABLE PROTECTION

Features and benefits

- Good electrical insulation
- Excellent mechanical protection
- Quick self-bonding
- Good resistance to water and ozone

Applications

- Insulation of cables and cable connections in residential and industrial
- Electrical installation

Technical data

Material	ethylene propylene rubber
Halogen	absent
Nominal thickness	0,75 mm
Sheet adhesion	4 N/cm
Breaking load	20 N/cm
Dielectric strength	35 kV/mm
Working temperature	-40°C ÷ +90°C
Flammability resistance	Self-extinguishing

Installation

Remove the protective film and stretch the tape to reduce the width. Wrap the section to cover by overlapping 50% of each subsequent layer. Join the end of the tape to the section covered. It is recommended to cover the connection with PVC adhesive tape.

ETD III

Heavy-duty wedge anchor in zinc coated steel, for structural application in non-cracked concrete

Base materials

Features and benefits

- ETA approved quality anchor for standard applications
- Long thread for embedment & fixture thickness flexibility
- Offers one of the highest loads of any ETA Option 7 approved anchor
- Low edge and spacing distance allowed
- Rapid expansion with improved clip design
- Letter marking engraved on the head (length checking on site)
- Fast installation and tightening with few turns
- Premium white-blue electrolytic zinc-plating for high corrosion resistance

Applications

- Support rails and brackets in HVAC and electrical installations
- Warehouse racks and storage systems
- Plumbing appliances
- Safety barriers
- Road signs
- Machine tools, conveyors
- Metal joinery
- Automated systems

Installation

T11

Wedge anchor in zinc coated steel, for non-cracked concrete

Base materials

Features and benefits

- High load capacity through bolt
- Long thread for embedment & fixture thickness flexibility
Ideal for medium duty applications
- Expansion clamp with special geometry in galvanized steel

Applications

- Support rails and brackets in HVAC and electrical installations
- Plumbing appliances
- Machine tools, conveyors
- Automated systems
- Fencing, gates

Installation

TRIDER

SMART
MECHANICAL
TRANSFORMATION

MEDIUM DUTY ANCHORING IS NO LONGER
JUST A MATTER OF CHEMISTRY

E ELEMATIC

MECHANICAL, IMMEDIATE, WORKS ON ALL MATERIALS

HIGH RESISTANCE SCREWS

Class 8.8 galvanized screws:
the highest resistance
to shear efforts.

EASY INSTALLATION

Anti-rotation polymer fins:
they adapt to the various materials by
blocking the rotation during screwing.

UNIVERSAL FLEXIBILITY

Flexible polymer body:
expands, flexes, knots, depending
on the material structure for great
performances on all materials

APPLICATION SAFETY

Cellulose dust protection:
protects the metric thread and ensures
a simple installation.

SECURE INSTALLATION

Positioning lip:
Prevents anchor slipping inside
hollow base materials

CONTROLLED EXPANSION

Steel expansion body:
expands effectively in three directions,
it does not damage the internal
sections of hollow base materials.

RELIABILITY AND VERSATILITY

Metal cone with metric thread:
completely integrated into the
expansion structure, it does not rotate
and fits different fixing accessories.

EASY AND FAST

- Reduced hole diameter, no specific tool
- Instantly loadable
- Ideal for professional installations

FOR ALL MATERIALS

- It can be used on solid or hollow base materials
- For installations with reduced distances between holes and from the edges
- Metallic, for medium and heavy-duty installations

TRIDER

Bi-material, universal, heavy-duty sleeved anchor for concrete, solid and hollow masonry structures

Base materials

Features and benefits

- Unique and exclusive multi-material performance
- Optimized expansion both in solid or hollow base materials
- Matches bonded anchor performance in hollow blocks
- Dual complementary expansion sleeves in steel and high strength polymer
- 3 full expansion steel legs ensure high-load performance
- 3 polymer expansion legs provide immediate grip in the inside of hollow materials while subsequent soft steel legs soft expansion creates grip without cracking the base material
- Cone firmly latched to the sleeve to avoid loss
- Large plastic lip to avoid over-embedment
- Effective integrated anti-rotation fins
- Special collated dust cap to avoid thread jamming

Technical data

Anchor material	electrolytic zinc plated steel ≥7μ LTH, High resistance polymer, cellulose protection and high density polymer lip
Screw material	class 8.8 electrolytic zinc plated steel

Installation

Applications

- Brackets for ducting, clamps, steel tracks, switchboards in electrical installations
- Support rails, clamps, hangers in HVAC
- Metal joinery
- Fencing, gates, handrails
- Industrial doors
- Facade frameworks
- Plumbing appliances
- Signs
- Antennas

T101 PIOVRA

Heavy-duty large expansion shield anchor, in zinc coated steel, for non-cracked concrete

Base materials

Features and benefits

- ETA Option 7 approved for non-cracked concrete
- 4 full expansion legs for better load distribution
- Exclusive anchoring fins, designed for superior grip and low displacement
- Superior performances compared to the traditional shield anchors
- Special Lanthane-F finishing allows higher corrosion resistance
- Internal collar for better screw guidance
- Available either with or without screw and with metric accessories

Applications

- Support rails and brackets in HVAC and electrical installations
- Metal joinery Structures, profiles and guides
- Shelving
- Tie rods, ropes and chains
- Hand rails, fencing, gates
- Aerials

Installation

Approvals and certifications

LE-LEX

Heavy-duty large expansion shield anchor, in zinc coated steel, for non-cracked concrete and solid base materials

Base materials

Features and benefits

- 4 full expansion legs for better grip
- Low spacing and edge distance installation
- Anti-rotation fins ensure easy setting
- Cone linked to the body to avoid cone loss
Flexible fixture thickness
- Available either with or without screw and with metric accessories
- Stainless steel variant available

Applications

- Support rails and brackets in HVAC and electrical installations
- Metal joinery
- Structures, profiles and guides
- Shelving
- Tie rods, ropes and chains
- Hand rails, fencing, gates
- Aerials

Installation

EFPM

Heavy-duty large expansion shield anchor, in zinc coated steel, for non-cracked concrete and solid base materials

Base materials

Features and benefits

- Heavy-duty anchor
- Anti-rotation fins ensure easy setting
- Dust cap prevents screw jamming
- Available either with or without hex head bolt and with metric accessories

Applications

- Support rails and brackets in HVAC and electrical installations
- Structures, profiles and guides
- Tie rods, ropes and chains
- Hand rails, fencing, gates
- Aerials

Installation

HPM

Large expansion shield anchor, in zinc-aluminium alloy, for solid base materials and non-cracked concrete

Base materials

Features and benefits

- 4 full expansion legs for better load distribution
- Anti-rotation fins ensure easy setting
- Cone linked to the body to avoid cone loss
- Roughened legs surface for the best grip
- Available either with or without hex head bolt

Applications

- Support rails and brackets in HVAC and electrical installations
- Structures profiles and guides
- Hand rails, fencing, gates
- Aerials

Installation

DYNABOLT PLUS

Through fixing sleeved anchor, in zinc coated steel, for non-cracked concrete and solid base materials

Base materials

Features and benefits

- Deformable body structure for a perfect adherence of the object to fix to the base material
- Quick and easy installation thanks to the pass-through design

Applications

- Support rails and brackets in HVAC and electrical installations
- Plumbing appliances
- Signs
- Metal joinery
- Air ducts
- Antennas

T21

Through fixing sleeved anchor, in zinc coated steel, for non-cracked concrete and solid base materials

Installation

Base materials

Features and benefits

- Through bolt for wasy and fast setting, hexagonal head for aesthetic finishing
- Collapsing system to provide clamping of the fixture
Hex head bolt cl. 8.8 and larger diameter washer

Technical data

Anchor material: electrolytic zinc plated steel

Applications

- Support rails and brackets in HVAC and electrical installations
- Metal joinery

EDC

Wedge anchor with cap nut, for concrete

Installation

Base materials

Features and benefits

- Aesthetic and safe finishing
- Low drilling diameter and long anchoring depth
- Fast and easy setting
- Cold-formed expansion clip

Technical data

Anchor material: electrolytic zinc plated steel

Applications

- Street furniture
- Buffers, barriers
- Stairlifts
- Road signs

Ø	Application conditions in mm		Recommended tensile loads - Nrec in kN (1kN ~ 100 Kg)
	Ø drilling	Max. embedment depth	Non-cracked concrete C20/25
EDC 8	8	50	1,60

ETHD

Inner thread flush anchor, in zinc coated steel, for non-cracked concrete

Base materials

Features and benefits

- Allows use of every type of metric threaded bolt or rod
- Short embedment depth avoiding rebar contact
- Flexible fixture thickness
- Allows fixture removal without damaging the anchor
- Reliable setting control using the related setting tool

Installation

Applications

- Threaded rods suspensions
- Benches, gazebo, garden furniture
- Support rails and brackets in HVAC and electrical installations
- Hand rails, fencing, gates

Technical data

Anchor material: electrolytic zinc plated steel

Ø	Application conditions in mm		Recommended tensile loads - Nrec in kN (1kN ~ 100 Kg)

* Marking expander supplied separately - not included in the packs

T51

Internally threaded brass anchor, for solid base materials

Base materials

Features and benefits

- 4-ways large expansion body, easy to use thanks to immediate expansion by screwing
- Wide expansion for the of the accessory or the screw, excellent grip thanks to the knurled surface that avoids rotation on light duty materials such as wood
- Conical expansion section that can fit crews, rod and accessories with metric thread

Installation

Applications

- Hangers for tubes, pipes for HVAC or electrical installations
- Handrails
- Industrial door frames

Technical data

LIGHTWEIGHT AND SPECIAL MECHANICAL ANCHORS

T66

Extremely versatile, universal, through-fixing frame anchor

Base materials

Features and benefits

- Designed for multiple fixings in either solid or hollow base materials
- Evaluated for seismic performance in shaking table testing's
- Fire resistance R90, for facade application
- Sleeve without protrusions allows easy through fixing
- Immediate expansion prevents rotation in hollow blocks
- Effective clamping on uneven surfaces
- ETA approved

Applications

- Doors and windows frames
- Prefab insulation panels
- Façades frameworks
- Window guards
- Wooden roof lathing
- Runners

Installation

Approvals and certifications

ETA-13/1066
ETAG 020

Fire resistance
R90

Technical data

Anchor material	polyamide 6
Screw material	zinc plated carbon steel
Installation temperature	-5°C ÷ +40°C
Working temperature	-40°C ÷ +80°C

T88

Universal, through-fixing frame anchor suitable for solid and hollow base materials

Base materials

Features and benefits

- Designed for multiple fixings in either solid or hollow base materials
- Multiple expansion principle, it self-adapts to internal geometry of base material to always ensure the best possible resistance
- Easy setting by tapping on the screw head, without risk of premature expansion
- Fire resistance R90 for façade anchors
- Knotting system always ensures effective clamping on uneven surfaces
- ETA approved

Installation

Approvals and certifications

ETA 17/0440
ETAG 020

Fire resistance
R90

Applications

- Wall plates, runners
- Doors and windows frames
- Façades frameworks
- Wooden roof lathing
- Prefab insulation panels
- Metal joinery

APS

Through-fixing frame anchor with double length expansion sleeve

Base materials

Features and benefits

- Quick and easy pass-through installation
- Low torque expansion
- Effective grip provided by 6 anti-rotation fins allows reliable installation in all recommended base material
- Double length expansion portion ensures satisfying performance

Applications

- Doors and windows frames
- Prefab insulation panels
- Wooden roof lathing
- Window guards

Installation

Technical data

Anchor material	polyamide 6
Screw material	electrolytic zinc plated steel
Installation temperature	0°C ÷ +40°C
Working temperature	-40°C ÷ +80°C

Note: Anchors supplied with screw, non-preassembled

Ø	Application conditions in mm		Recommended tensile loads - Nrec in kN (1kN ~ 100 Kg)

ETFP

Light-duty plastic anchor for doors and windows frames

Base materials

Applications

- Door and window frames

Features and benefits

- Anti-rotation fins provide grip to the frame
- Plastic sleeve prevents galvanic corrosion
- Able to compensate frame thermal expansion
- White plastic screw cap included

Technical data

Anchor material	polyamide 6
Screw material	electrolytic zinc plated steel
Installation temperature	0°C ÷ +40°C
Working temperature	-40°C ÷ +80°C

JTX

Universal, light-duty, hammer-in plastic anchor

Base materials

Features and benefits

- Immediate hammer-in expansion with asymmetrical expansion fins geometry
- It self-adapts to internal geometry of base material providing increased grip compared to traditional hammer-in anchors so the same performance with shorter length
- Shorter setting times thanks to lower drilling depth required
- Available in length 30 mm, ideal either for floor applications or hollow base materials
- Large lip diameter and shape ensures perfect clamping and effective aesthetic finish

Technical data

Anchor material	polyamide 6
Screw material	electrolytic zinc plated steel
Installation temperature	-5°C ÷ +40°C
Working temperature	-40°C ÷ +80°C

Applications

- Drywall tracks
- Insulation starting profiles
- Roof flashing
- Plastic or metal trunkings
- Clips for tubes, pipes
- Perforated strip

Installation

Ø	Application conditions in mm		Recommended tensile loads - Nrec in kN (1kN ~ 100 Kg)

* Non-preassembled version, with bronzed screw

HCX

Light-duty, hammer-in, fast installation, plastic anchor with large lip

Base materials

Features and benefits

- Quick hammer-in setting
- Dome lipped sleeve variant

Applications

- Drywall tracks
- Insulation starting profiles
- Roof flashing
- Signs
- Plastic or metal trunkings
- Perforated strip

Technical data

Anchor material	polyamide 6
Screw material	electrolytic zinc plated steel/painted steel/copper
Installation temperature	0°C ÷ +40°C
Working temperature	-40°C ÷ +80°C

Installation

Ø	Application conditions in mm		Recommended tensile loads - Nrec in kN (1kN ~ 100 Kg)	
	Ø drilling	Depth of pose	Non-cracked concrete C20/25	Solid brick
6	6	30	0,20	0,16

Consult the technical documentation and check or take various adequate safety factors as applicable.

ETCD

Light-duty, hammer-in, zinc-aluminium alloy anchor

Base materials

Features and benefits

- Quick hammer-in setting
- Corrosion resistant, thanks to the zinc-aluminium alloy body
- Dome lip \varnothing 14 mm ensure effective clamping

Applications

- Insulation starting
- Roof flashing
- Signs
- Plastic or metal trunkings
- Perforated strip

Technical data

Anchor material: zinc-aluminium alloy (zamak)

Installation

Ø	Application conditions in mm		Recommended tensile loads - Nrec in kN (1kN ~ 100 Kg)	
	Ø drilling	Depth of pose	Non-cracked concrete C20/25	Solid brick

BLUEFIX

INNOVATIVE BI-MATERIAL PLASTIC ANCHOR!

Great performance on concrete,
incredible on plasterboard,
the best on unrendered hollow
bricks!

The innovative bi-material technology:

- allows the **application on different construction supports** as universal plastic plugs but thanks to the high-resistance bi-material Bluefix outperforms them.
- **high performances** on all supports, **higher grip values on plasterboard and Unrendered hollow bricks!**
- expands or knots, **adapting automatically to the support structure**

BLUEFIX

High-performance, universal, light-duty, bi-material anchor

Base materials

Features and benefits

- Very high resistance ensured by bi-materials principle
- 4-ways multidirectional expansion and knotting principle always fits various base materials
- Flexible lip allows either through fixing or flush installation
- The effective 4 anti-rotation fins allow perfect functioning especially in hollow blocks.
- Reinforced materials portions allow the best control during the installation
- Reinforced polymer on the top cone and along the whole length ensure unmatched resistance
- The best flexibility, every size is compatible with a wide range of screw types and diameter
- BLUEFIX diameter 8 mm has been tested for anchorages under seismic loads

Applications

- Clamps, clips, brackets for tubes, pipes for HVAC or electrical installations
- Basket trays
- Plastic or metal trunkings
- Heaters, fans
- Electrical panels, fuse boxes
- Lighting
- Drywall tracks
- Shelves, cabinets

Installation

Technical data

Anchor material	reinforced polyamide + elastomeric polyamide
Screw material	electrolytic zinc plated steel
Installation temperature	0°C ÷ +40°C
Working temperature	-20°C ÷ +70°C

Note: screw not pre-mounted on VA, KS, HS anchors

T6

Universal light-duty plastic anchor with multidirectional expansion

Base materials

Features and benefits

- Easy to install, high resistance
- 6-ways multidirectional expansion and knotting principle fits both solid or hollow base materials
- Dynamic lip allows either through fixing or flush installation
- The effective anti-rotation fins allow perfect functioning especially in hollow blocks

Applications

- Clamps, clips, brackets for tubes, pipes for HVAC or electrical installations
- Plastic or metal trunkings
- Lighting
- Drywall tracks
- Shelves, lightweight cabinets

Installation

Technical data

E/EB

Universal light-duty plastic anchor with or without lip

Base materials

Features and benefits

- Large and effective expansion
- High quality of polymer ensure safety and durability
- Very versatile, fits many applications in several types of base material
- Quick installation
- Available either in lipped or non-lipped variant

Applications

- Picture frames
- Bathroom fixtures
- Lighting
- Signs
- Curtain rails

Installation

T4

Universal light-duty plastic anchor, especially recommended for Unrendered hollow bricks masonry structures

Base materials

Features and benefits

- Easy to install, high resistance
- 4-ways multidirectional expansion and undercut principle fits both solid or hollow base materials
- The effective 12 anti-rotation fins allow perfect functioning especially in hollow blocks
- Special reinforced fins along the sleeve increase capacity in solid base materials

Installation

Technical data

Anchor material	polyamide 6
Screw material	zinc plated steel
Installation temperature	-5°C ÷ +40°C
Working temperature	-40°C ÷ +80°C

Applications

- Plastic trunkings
- Bathroom fixtures
- Lighting
- Signs, curtain rails

Ø	Application conditions in mm			Recommended tensile loads - Nrec in kN (1kN ~ 100 Kg)

TPF-TPFC

Universal light-duty polyethylene anchor

Base materials

Features and benefits

- Easy to install, high resistance, for both solid or hollow base materials
- 3-ways expansion in solid base materials
- Undercut principle in hollow blocks or boards
- Effective anti-rotation fins allow perfect functioning especially in hollow blocks
- Available either in lipped or non-lipped variant

Applications

- Plastic trunkings
- Bathroom fixtures
- Lighting
- Signs
- Curtain rails

ENP

Light-duty plastic anchor with screw, hook, eyelet or angle hooks, for professional and household use

Base materials

Applications

- Shelves, cabinets, furniture
- Curtain rails
- Lighting
- Lightweight racks
- Lightweight suspensions
- Heaters, fans
- Metal support brackets
- Electrical panels, fuse boxes

Features and benefits

- Suitable either for solid or hollow base materials
- Good resistance and installation reliability
- Quick and easy installation thanks to the anti-rotation fins and immediate grip

XTECH

THE BEST ON PLASTERBOARD, SHEETS, AND PERFORATED MATERIALS

NO LAYING TOOL

XTECH is installed with a simple screwdriver: **screwing is easy** and progressive until the fixing complete stop.

VERSATILE

The range includes assembly with **metric cylindrical head screws, countersunk head screws, eyelets**, and hooks: they can solve different application needs both for professionals and hobbyists.

NO ROTATION

Robust and effective fins block any plug rotation during installation on drywall and lightweight materials.

SPECIAL LIP

The **inner lip** blocks the knotting, **safeguarding the panel structure**.

MAXIMUM FLEXIBILITY

The geometry with **8 helicoidal cuts and the body material** allow a **perfect knotting** with great resistance in hollow base materials and in the cavities of various support materials.

BI-MATERIAL STRUCTURE

The special constructive technology allows to **combine the characteristics of the two different materials** constituting the body and the tip.

HIGHEST RESISTANCE

The plug tip has an **M5 metric thread** and is made of very **high-strength polymer**: this allows the use of metric screws and accessories for high-capacity anchors.

T61

Light-duty steel anchor especially recommended for solid base materials

Base materials

Applications

- Shelves, cabinets, furniture
- Curtain rails
- Lighting
- Lightweight racks
- Lightweight suspensions
- Heaters, fans, radiators
- Metal support brackets
- Electrical panels, fuse boxes

Features and benefits

- Steel structure anchor
- Expansion to three independent sectors for high loads on compact materials

Installation

XTECH

High performance anchor for plasterboard and hollow blocks

Base materials

Features and benefits

- Quick, very effective, high resistance fastening
- It knots in the inside of drywall or hollow blocks
- Always reliable thanks to the reinforced polymer cone
- Metric thread allows fine tightening adjustment so good clamping of the part to be fixed and onto the wall
- 50 mm length variant is especially recommended for fastening on single layer plasterboard. 60 mm length variant fits either for double layer plasterboard or fastenings on hollow blocks
- Can be installed both with electric or manual screwdrivers

Installation

Applications

- Radiators
- Bathroom fixtures
- Curtain rails, hangers
- Lighting
- Support brackets
- Mantles

Technical data

Anchor material	polyamide + tecnopolymer
Product material viti e accessori	electrolytic zinc plated steel

Ø	Application conditions in mm		Recommended tensile loads - Nrec in kN (1kN ~ 100 Kg)				Access breakage in kN (1 kN ~ 100 Kg)*

EMS

Universal floating shelf brackets

Base materials

Features and benefits

- Special anchoring system performing both on compact materials, such as concrete and bricks, and hollow base materials
- Easy and safe installation, supports high loads in different conditions
- Excellent aesthetic finish: no bracket or support visible under the shelves

Applications

- Wooden shelves and wall units

Installation

Technical data

Anchor material	polyamide 6 + steel cone
Shelf material	zinc plated steel

T-CLICK

Self-drilling high performance expansion anchor in reinforced polyamide for plasterboard and aerated concrete

Base materials

*pre-drilling Ø 8 mm

Features and benefits

- Fast solution without pre-drilling, for plasterboard up to 15 mm thickness
- Additional expansion ensures high tensile and shear resistance
- Ideal flush finishing
- Suitable also for aerated concrete (8 mm pre-drilling required)

Installation

Applications

- Clamps, clips for tubes or pipes for HVAC or electrical installations
- Plastic or metal trunkings
- Lighting
- Shelves, lightweight cabinets
- Bathroom fixtures

Technical data

Anchor material	reinforced polyamide with fiberglass
Screw material	electrolytic zinc plated steel

Application conditions in mm	Recommended tensile loads - Nrec in kN (1kN ~ 100 Kg)		Recommended tensile loads - Nrec in kN (1kN ~ 100 Kg)
Self-drilling. For aerated concrete, drill:	Aerated concrete	Plasterboard (13 mm)	Plasterboard (13 mm)
Ø 8x45	0,1	0,09	0,25

Consult the technical documentation and check or take various adequate safety factors as applicable.

DRIVA

Self-drilling zinc-aluminium alloy anchor for plasterboard and aerated concrete

Base materials

*pre-drilling Ø 8 mm

Features and benefits

- Fast solution without pre-drilling, for plasterboard or aerated concrete
- Available either with pan or countersunk head to fit different fastening requirements
- Corrosion resistant, thanks to the zinc-aluminium alloy body
- Specific geometry for effective anchoring on single and coupled lightweight panels
- Thin blade thread and smooth edge: prevents gypsum swelling and paper tearing

Applications

- Clamps, clips, brackets for tubes, pipes for HVAC or electrical installations
- Plastic or metal trunkings
- Switchboxes
- Lighting
- Lightweight cabinets
- Signs

Installation

Technical data

Anchor material	zinc-aluminum alloy
Screw material	electrolytic zinc plated steel

Application conditions in mm	Recommended tensile loads - Nrec in kN (1kN ~ 100 Kg)	
Self-drilling. For aerated concrete, drill.	Aerated concrete	Plasterboard (13 mm)
Ø 8x35	0,06	0,06

Consult the technical documentation and check or take various adequate safety factors as applicable.

DRIVA ZINC PLATED COUNTERSUNK FLAT/PAN HEAD SCREWS - POZIDRIV

Description	Anchor length (mm)	Ø screw (mm)	Screw length (mm)	Max. fixing thickness (mm)	Pack (pcs.)	Code
DRIVA TP 12	31	4,5	35	12	100	569443
DRIVA TF 5	31	4,5	25	5	100	569444
DRIVA TF 27	31	4,5	50	27	100	569445
DRIVA TP 12 blister	31	4,5	35	12	4	565464
DRIVA TP 12 can	31	4,5	35	12	150	568144

* TP = pan head, TF = countersunk head
For applications on aerated concrete, a pre-drilling of ø 6 mm is required. For applications on coupled gypsum sheets and gypsum blocks a pre-drilling of ø 10 mm is required.

DRIVA NYLON

Self-drilling plastic anchor for plasterboard and aerated concrete

Base materials

Features and benefits

- Fast solution without pre-drilling, for plasterboard or aerated concrete
- Flanged head screw fits fastening of thin or plastic parts
- White colour provides good external appearance

Applications

- Clips for tubes, pipes for HVAC or electrical installations
- Plastic or metal trunkings
- Switchboxes
- Lighting
- Signs
- Picture frames

Installation

Technical data

Anchor material	reinforced polyamide

MINI DRIVA

Self-drilling anchor, all-in-one solution, for lightweight fastening in plasterboard, gypsum fiber board, and aerated concrete

Base materials

Features and benefits

- Extremely fast, single step solution
- Direct mounting without pre-drilling
- Corrosion resistant, thanks to the zinc-aluminium alloy body

Applications

- Plastic trunkings, raceways
- Plastic clips

Installation

Technical data

Anchor material: zinc-aluminum alloy (zamak)

ETPV ZENTECH

Zinc coated steel anchor for boards or hollow blocks

Base materials

Features and benefits

- Using the special tool, the anchor sleeve bends, expand and grip against the inside of the drywall
- The undercut principle allows high resistance even on thin walls or lightweight panels
- Fixed part can be removed and repositioned without damaging the anchor

Applications

- Radiators
- Lighting
- Curtain rails, hangers
- Pipe clips
- Bathroom fixtures
- Mantles

Installation

Installation tool

cod. 707070

ETAF

Zinc coated toggle anchor suitable for boards and hollow blocks, for wall or overhead applications

Base materials

Features and benefits

- Intrinsically safe anchor, for drywall and especially overhead installation
- High quality components in zinc coated steel

Applications

- Lightweight suspensions
- Ceiling lights
- Curtain rails
- Lightweight cabinets
- Heaters, radiators
- Electrical panels, fuse boxes

Installation

EIS-D

Spiral anchor for fastening on ETICS façades and low or medium density insulation panels

Base materials

Features and benefits

- Self-drilling anchor in reinforced polyamide designed for fixing on composite insulation systems
- No thermal bridge
- Short length fits also shallow thickness insulation
- Effective performance on medium or high density panels
- EIS-D is particularly suitable for fixing on medium density insulation. EIS-D LT is suitable for fixing on low-density insulation
- EIS-D 95 is particularly suitable for fixing pipe collars

Installation

Applications

- Cameras
- Detectors, sensors and alarms
- Switchboxes
- Clamps, clips, brackets for tubes or pipes
- Signs
- Mailboxes

Technical data

Anchor material	reinforced polyamide
Screw material	electrolytic zinc plated steel

ECLIP

Accessory for rigid conduits clamping in the diameter range 16÷50 mm

Features and benefits

- Angled and rounded edges makes tube clamping quick and easy
- Slotted hole allows adjusting for easy alignment
- Interlocking slots for the support rails
- Dovetail profiles for side-by-side mounting
- Suitable for T6, UCX, E plugs

Technical data

product material:	polypropylene, color gray RAL 7035
Installation temperature:	-5° ÷ +35°C
Working temperature:	-30 ÷ +55°C
Flammability Rating:	HB according to UL 94
Glow wire test:	650°C according to IEC 60695-2-12
Maximum strength to release:	up to 9 daN

Installation

CT-CLIP

Accessory for cable management, suitable for conduits or apparent cables in the diameter range 16÷63 mm

Features and benefits

- Convenient slotted hole allows mounting with various types of plastic plugs
- Range adapted to all common diameters of rigid conduits for electrical installations

Installation

Technical data

Product material:	polyamide 6.6, color gray RAL 7035
Installation temperature:	-5°C ÷ 35°C
Working temperature:	-40°C ÷ +70°C
Flammability Rating:	HB according to UL 94
Glow wire test:	650 °C according to IEC 60695-2-12
Min. Tensile strength:	360 N

Approvals and certifications

Compliant with CEI EN 62275 - cable trays systems and accessories for cables - Cable ties for electrical installations

CT-CLIP

Description	Total length (mm)	Ø bundle min/max	Base width (mm)	Base length (mm)	Tensile Strength (N)	Pack (pcs.)	Code

CT-CLIP 40-63	280	40 ÷ 63	16	40,5	360	100	565511

ELEFIX

Accessory for cable management, suitable for conduits or apparent cables in the diameter range 16÷63 mm. With metric threaded hole M6/7

Features and benefits

- The metric threaded hole M6/7 allows assembling with various types of plastic plugs in all masonry types
- The accessory can be mounted with threaded stud plugs, such as UCX/VM or the special ELEFIX anchor

Technical data

Product material:	polyamide 6.6, color gray RAL 7035
Installation temperature:	-15° ÷ +35°C
Working temperature:	-40 ÷ +85°C
Flammability Rating:	V2 according to UL 94
Glow wire test:	850°C according to IEC 60695-2-12
Min. Tensile strength:	360 N

Approvals and certifications

Compliant with CEI EN 62275 - cable trays systems and accessories for cables - Cable ties for electrical installations

Installation

Installation with ELEFIX M7 anchor

Installation with UCX V M6 anchor

Installation with driva anchor

ECAV

Accessory for rigid conduits with plastic cover, especially designed for overhead in the diameter range 4÷60 mm

Features and benefits

- Strong interlock between the saddle and the cap highly resistant clamping
- Internal centering lids for tube alignment preventing tube sliding
- Dovetail profiles for side-by-side mounting
- Range adapted to all common diameters of rigid conduits for electrical installations
- Slotted hole allows adjusting for easy alignment Suitable for T6, UCX, E plugs

Installation

Technical data

Product material:	polyamide 6, color gray RAL 7035
Installation temperature:	-5° ÷ +40°C
Working temperature:	-30 ÷ +65°C
Flammability Rating:	HB according to UL 94
Glow wire test:	650°C according to IEC 60695-2-12
Maximum strength to release:	up to 50 daN

ECAV

S-CLIP

Light-duty, hammer-in fastening plug for simple and time-saving fixing of conduits or flexible pipes

Materials

Installation

Features & Benefits

- One piece fastening for a quick and easy one-hand installation
- Exclusive anchoring design guarantees high load-bearing capacity in different materials

Application

- Fixing conduits and pipes for both Electrician and Plumbers applications
- Apparent and temporary fastening
- Rigid pipes
- Semi-rigid electrical conduits
- Corrugated electrical conduits
- Gas, water and heating pipes

Technical Data

Material:	polyamide 6 grey colour RAL 7035
Installation temperature:	0° ÷ +40°C
Working temperature:	-20 ÷ +80°C
Flammability rating:	HB according UL 94
Glow wire test:	650°C according IEC 60695-2-12

Clamps M6

Zinc-plated steel clamps for lightweight pipeworks with screws and M6 metric threaded connector

Features and benefits

- Easy connection with M6 metric threaded stud nails or plugs, such as UCX/VM 6

Applications

- Metal or plastic pipeworks mountings, with rigid or semi-rigid pipes

Technical data

Clamp material: electrolytic zinc plated steel

E/CL

Clamping system for pipeworks in sanitary and drainage installations

Base materials

Features and benefits

- Strong galvanized steel clamp, supplied with double threaded rod and E type polyamide universal plug
- Increased width and thickness, welded nut

Applications

- Heavy weight metal pipes mounting
- Large diameter plastic pipes installation

Installation

Technical data

Clamp and screw material: electrolytic zinc plated steel

Anchor material: polyamide 6

Impact Nails

Impact nails for mounting in concrete without pre-drilling

Features and benefits

- Sturdy impact nail, makes mounting on concrete without predrilling very quick and easy
- Long-life nail holder, with ergonomic rubber grip, allows quick and safe operation

Applications

- Clips
- Textile bands
- Supportis and perimetral guides
- Perforated steel straps

MANUAL NAILING SYSTEM

EDS

Hexagonal spacers in zinc coated steel, female-female or male-female, for hangers or stand-off mountings with threaded rods

Features and benefits

- The hexagonal spacers allow reliable connection between threaded rods and metric threaded anchors
- Ideal for adjustable stand-off installation

Applications

- Industrial, HVAC, mechanical assembly
- Stand-off fixing for pipe clamps or frames
- Suspended trays

Technical data

Product material: electrolytic zinc plated steel

Technique and installation conditions

WET CONCRETE

Elematic systems are usable in dry concrete, but also wet considering the specific resistance values for this case.

INSTALLATION TEMPERATURE

Chemical anchoring systems are designed to work in a defined temperature range. The support material or the environment low temperatures can prevent the proper anchor functioning.

RESIN SUPPLY

The resin must always be dispensed using the original mixer supplied with the cartridges. Filling starts from the bottom of the hole, progressively climbing up to at least 50% of the volume available. Extension tubes are available for deep holes.

DEEP OR CEILING HOLES

To facilitate the filling results, appropriate accessory use is recommended. The accessory can be used for all hole diameters and can be inserted on all the mixers and extension tubes.

CURING TIMES AND TIGHTENING

Each system has specific curing times needed to reach 100% of the resistance and perform the bar placement. Curing times are longer at low temperature, faster at high temperature. The complete tables are available on the technical data sheets.

HOW TO CLEAN THE HOLE

	PREMIUM CLEANING	STANDARD CLEANING	WATER CLEANING
PRIMEBLOK	✓	✓ (from 8 to 16 mm)	-
STARBLOK	✓	✓	-
MULTIBLOK	✓	✓	-

DRILLING PROCEDURE

Drilling can be performed with carbide tip (widia) operated in percussion + rotation or with compressed air drills, for all chemical anchoring systems.

HOLE CLEANING

Hole cleaning is essential to ensure the designed performances. The premium cleaning procedure is always recommended. Standard cleaning is allowed for some products, as summarized in the table below.

HOLE CLEANING PROCEDURE

E ADESIVI

PRIMEBLOK

Multimaterial bonded anchor, methacrylate resin based, approved for concrete, solid or hollow masonry structures

- Features and benefits**
- ETA Approved for three field of use: structural anchoring in non-cracked concrete (range M8÷M24); structural post-installed rebars in concrete (range Ø 8 ÷ Ø 20); anchoring in a wide range of masonry structures (range M8÷M12)
 - High bonding strength and performance
 - Suitable for installation in wet concrete
 - Odourless, styren, phtalate and vinyltoluene free, very low content of Volatile Organic Compounds (VOC, class A+), for indoor use
 - Easy dosage and delivery in the temperature range from -5°C up to +40°C
 - Immediate mix without waste
 - Impact resistant and UV proof cartridge with safety piston preventing resin leakage, for clean and safe operation
 - 18 months shelf life
 - Partly used cartridges can be reused after fitting new nozzle

- Applications**
- HVAC installations, such as steel brackets for pipings and channels
 - Balustrading, safety barriers
 - Structural anchoring for steel works
 - Metal doors and windows
 - Awnings, curtain rails, blinds
 - Satellite dishes, aerials
 - Bearing structures for photovoltaic plants
 - Post-installed rebars for concrete

STARBLOK

Complete bonded anchor kit suitable for wide range of hollow or solid masonry structures

Base materials

Features and benefits

- The system combines the new Primeblok bonded anchor with the innovative and exclusive Starblok accessory for approved fixing with threaded rods from M8 to M10 on hollow masonry substrates
- The special sponge bulb evenly distributes the resin, compensating the masonry embrittlement due to drilling, avoids waste for more reliable performance
- The system can be installed in every positions in virtually all kinds of hollow building blocks
- The threaded rod embedment can be adjusted to avoid protrusion thanks to the precut sleeve bottom
- Primeblok resin is odourless, styren, phthalate and vinyltoluene free, VOC class A+, for indoor use. It has 18 months of shelf life, partly used cartridges can be reused after fitting new nozzle

MULTIBLOK

General purpose, multimaterial bonded anchor, polyester resin based, suitable for solid or hollow masonry structures

Base materials

Features and benefits

- Suitable for non-structural applications in concrete or masonry structures in the range M6-M16
- Quick curing times for fast installation (e.g. 20 minutes at 25°C)
- Impact resistant and UV proof polymer cartridge with safety piston preventing resin leakage, for clean and safe operation
- Styren free and very low content of Volatile Organic Compounds (VOC, class A+)
- 12 months shelf life
- Partly used cartridges can be reused after fitting new nozzle

Applications

- Balustrading, handrails
- Fencing, gates, barriers
- Awnings, curtain rails, blinds
- Lightweight HVAC installation
- Temporary fixing

Tensioning Tool 5401

Automatic tensioning tool in painted steel, suitable for cable ties from 2,2 to 4,8 mm width

Features and benefits

- Manually adjustable tension force
- Automatic cutting at set tension

Item code

Description	Length (mm)	Weight (gr)	Pack (pcs.)	Code
Metal tensioning tool suitable for ties from 2,2 to 4,8	160	310	1	5401

Tensioning Tool 5400 C

Manual tensioning tool in painted steel, suitable for cable ties from 3,5 to 9 mm width

Features and benefits

- Manually adjustable tension force
- Dedicated lever cut

Item code

Description	Length (mm)	Weight (gr)	Pack (pcs.)	Code
Metal tensioning tool suitable for ties from 3,5 to 9	190	290	1	5400C

Tensioning Tool 5403

Automatic tensioning tool in plastic, suitable for cable ties from 2,2 to 4,8 mm width

Features and benefits

- Manually adjustable tension force
- Automatic cutting at set tension

Item code

Description	Length (mm)	Weight (gr)	Pack (pcs.)	Code
Plastic tensioning tool suitable for ties from 2,2 to 4,8	165	221	1	5403

Tensioning Tool 5406 C

Manual tensioning tool in painted steel, suitable for cable ties from 3,5 to 12,5 mm width

Features and benefits

- Manually adjustable tension force
- Dedicated lever cut

Item code

Description	Length (mm)	Weight (gr)	Pack (pcs.)	Code
Metal tensioning tool suitable for ties from 3,5 to 12,5	190	260	1	5406 C

Tensioning Tool 5405 C

Manual tensioning tool in painted steel, suitable for cable ties from 3,5 to 13 mm width

Features and benefits

- Manually adjustable tension force
- Automatic cutting at set tension

Item code

Description	Length (mm)	Weight (gr)	Pack (pcs.)	Code
Metal tensioning tool suitable for ties from 3,5 to 13	200	320	1	5405 C

Tensioning Tool 5407

Automatic tensioning tool for stainless steel cable ties up to 7,9 mm maximum width

Features and benefits

- Manually adjustable tension force
- Automatic cutting at set tension to cut the cable tie tail without any smudge

Item code

Description	Length (mm)	Weight (gr)	Pack (pcs.)	Code
Stainless steel tensioning tool for ties 7,9 max	178	560	1	5407

EZ-CRIMP

Patented crimping tool with interchangeable crimping dies. Realised in hard steel with ergonomic handles made of anti-slip material

Features and benefits

- Manually interchangeable dies without tools ("easy change" release system)
- Stop ratchet with release option to guarantee perfect and optimal crimping
- Adjustable pressure force
- Dies manual release lever
- The interchangeable matrices make the tool extremely versatile, one tool body for different applications, with dedicated matrices
- Micro casted steel dies for coupling precision and high tear and wear resistance

Applications

- Industrial panels and switchboards

Crimping tool for copper terminals 0,5÷2,5 mm ²	145	160	0,5	2,5	1	9102

Crimping Tool 9004

Crimping tool with plastic handles and re-opening spring. Suitable for copper terminals from 0,7 to 10 mm²

Item code

Description	Length (mm)	Weight (gr)	Section min (mm ²)	Section max (mm ²)	Pack (pcs.)	Code
Crimping tool for copper terminals 0,75÷10 mm ²	180	320	0,75	10	1	9004

Crimping Tool 9039A

Steel plated crimping tool with micro casted steel dies and plastic handles. Suitable for copper terminals from 0,5 to 6 mm²

Features and benefits

- Adjustable crimping force
- Handle stop ratchet with automatic release

Item code

Description	Length (mm)	Weight (gr)	Section min (mm ²)	Section max (mm ²)	Pack (pcs.)	Code
Crimping tool for copper terminals 0,5÷6 mm ²	180	390	0,5	6	1	9039 A

Crimping Tool 9039

Steel plated crimping tool with micro casted steel dies and plastic handles. Suitable for copper terminals from 6 to 16 mm²

Features and benefits

- Adjustable crimping force
- Handle stop ratchet with automatic release

Item code

Description	Length (mm)	Weight (gr)	Section min (mm ²)	Section max (mm ²)	Pack (pcs.)	Code
Crimping tool for copper terminals 6÷16 mm ²	205	380	6	16	1	9039

Crimping Tool 9302

Steel plated crimping tool with micro casted steel dies and blackened finishing. Suitable for copper terminals from 0,08 to 10 mm²

Features and benefits

- Square crimping and terminal lateral insertion
- Ergonomic handle in two-component material
- Safety device with mechanical release for perfect crimping

Item code

Description	Length (mm)	Weight (gr)	Section min (mm ²)	Section max (mm ²)	Pack (pcs.)	Code
Crimping tool for copper terminals 0,08÷10 mm ²	180	392	0,08	180	1	9302

Crimping Tool 9007

Steel plated crimping tool with micro casted steel dies and plastic handles. Suitable for preinsulated copper lugs from 0,5 to 6 mm²

Features and benefits

- Adjustable jaw clamping device
- Handle stop ratchet with automatic release

Item code

Description	Length (mm)	Weight (gr)	Section min (mm ²)	Section max (mm ²)	Pack (pcs.)	Code
Crimping tool for copper preinsulated terminals 0,5÷6 mm ²	220	500	0,5	6	1	9007

Crimping Tool 9304

Steel plated crimping tool with micro casted steel dies and blackened finishing. Suitable for copper terminals from 0,08 to 16 mm²

Features and benefits

- Square crimping and terminal lateral insertion
- Safety device with mechanical release for perfect crimping
- Ergonomic handle in two-component material
- Easy to use in areas with difficult access and preselection of two different working ranges

Item code

Description	Length (mm)	Weight (gr)	Section min (mm ²)	Section max (mm ²)	Pack (pcs.)	Code
Crimping tool for copper terminals 0,08÷16 mm ²	190	475	0,08	16	1	9304

Crimping Tool 9020

Steel plated crimping tool with plastic handles. Suitable for non-insulated open barrel terminals from 0,5 to 6 mm²

Item code

Description	Length (mm)	Weight (gr)	Section min (mm ²)	Section max (mm ²)	Pack (pcs.)	Code
Crimping tool for non-insulated copper terminals 0,5÷6 mm ²	185	210	0,5	6	1	9020

Crimping Tool 9048

Steel plated crimping tool with micro casted head, metal reinforced handles and anti-slip covers. Suitable for copper lugs from 1,5 to 16 mm²

Features and benefits

- Adjustable jaw clamping device
- Handle stop ratchet with automatic release

Item code

Description	Length (mm)	Weight (gr)	Section min (mm ²)	Section max (mm ²)	Pack (pcs.)	Code
Crimping tool for copper lugs 1,5÷16 mm ²	275	520	1,5	16	1	9048

Crimping Tool 9049

Steel plated crimping tool with micro casted steel dies. Suitable for non-insulated open barrel terminals from 0,5 to 6 mm²

Features and benefits

- Adjustable jaw clamping device
- Handle stop ratchet with automatic release

Item code

Description	Length (mm)	Weight (gr)	Section min (mm ²)	Section max (mm ²)	Pack (pcs.)	Code
Crimping tool for non-insulated copper terminals 0,5÷6 mm ²	225	510	0,5	6	1	9049

Crimping Tool 9038

Crimping tool with micro casted head and handles, and pressed steel stamp and die. Suitable for copper lugs from 10 to 95 mm²

Item code

Description	Length (mm)	Weight (gr)	Section min (mm ²)	Section max (mm ²)	Pack (pcs.)	Code
Crimping tool for copper lugs 10÷95 mm ²	570	3100	10	95	1	9038

Crimping Tool

Crimping tool with casted head, reinforced metal handles, and micro casted steel stamp and die. Suitable for copper lugs up to 120 mm²

Features and benefits

- Anti-slip plastic handles

Item code

Description	Length (mm)	Weight (gr)	Section min (mm ²)	Section max (mm ²)	Pack (pcs.)	Code
Crimping tool for copper lugs 25÷120 mm ²	660	4500	25	120	1	9068
Crimping tool for copper lugs 16÷95 mm ²	655	4400	16	95	1	9069
Crimping tool for copper lugs 10÷50 mm ²	570	3280	10	50	1	9071

Crimping Tool 9075

Zinc plated crimping tool with reinforced metal handles with anti-slip covers and hexagonal crimping die. Suitable for copper lugs from 6 to 120 mm²

Features and benefits

- Manual hexagonal crimping
- Anti-slip plastic handles

Item code

Description	Length (mm)	Weight (gr)	Section min (mm ²)	Section max (mm ²)	Pack (pcs.)	Code
Crimping tool for copper lugs 6÷120 mm ²	650	3900	6	120	1	9075

Stripping-cutting Tool 9305

Automatic stripping and cutting tool with fiberglass body and bimaterial handles. Suitable for cables from 0,03 to 10mm²

Features and benefits

- Automatic adjustment for excellent stripping
- Metal clamping jaws
- Cable stripping device with adjustable stop from 5 to 20 mm
- Fiberglass body

Item code

Description	Length (mm)	Weight (gr)	Section min (mm ²)	Section max (mm ²)	Pack (pcs.)	Code
Stripping/cutting tool suitable for cables from 0,03 to 10 mm ²	195	200	0,03	10	1	9305

Stripping-cutting Tool 5415

Automatic stripping and cutting tool in plastic. Suitable for cables from 0,5 to 4 mm²

Item code

Description	Length (mm)	Weight (gr)	Section min (mm ²)	Section max (mm ²)	Pack (pcs.)	Code
Stripping/cutting tool suitable for cables from 0,5 to 4 mm ²	170	138	0,5	4	1	5415

Stripping Tool 9056

Automatic stripping tool with steel blades. Suitable for cables from 0,5 to 6 mm²

Item code

Description	Length (mm)	Weight (gr)	Section min (mm ²)	Section max (mm ²)	Pack (pcs.)	Code
Stripping tool suitable for cables from 0,5 to 6 mm ²	170	338	0,5	6	1	9056

Neoprene Sleeves Tool

Neoprene sleeves tool with 3 needles

Features and benefits

- The special opening system expands the sleeve uniformly, facilitating the installation

Item code

Description	ø min. internal (mm ²)	ø max. internal (mm ²)	Pack (pcs.)	Code
Neoprene sleeves tool 1,75÷5 mm	1,75	5	1	5416
Neoprene sleeves tool 3÷10 mm	3	10	1	5417
Neoprene sleeves tool 10÷17 mm	10	17	1	5418

Stripping-cutting Tool 11909001

Stripping and cutting tool. Suitable for crimping modular plugs with 6-8 poles

Features and benefits

- Ideal for RJ11, RJ12, RJ45 connectors

Item code

Description	Length (mm)	Weight (gr)	Pack (pcs.)	Code
Tool for modular connectors and terminals	200	320	1	11909001

Stripping Tool 9058

Stripping tool with round cable screw, plastic and metal body. Suitable for cables diameters from 4 to 28 mm

Features and benefits

- Adjustable blade in tempered steel

Item code

Description	Length (mm)	Weight (gr)	Pack (pcs.)	Code
Stripping tool suitable for cables from 4 to 28 mm ²	135	71	1	9058

Stripping Tool 9062

Hook stripping tool with round cable screw, plastic and metal body. Suitable for cables diameters from 8 to 28 mm

Features and benefits

- Adjustable blade in tempered steel with a passivated steel hook

Item code

Description	Length (mm)	Weight (gr)	Pack (pcs.)	Code
Stripping tool suitable for cables from 8 to 28 mm ²	180	90	1	9062

Cable Cutter 9033

Cable cutter for copper and alloy cables. Suitable for cables diameters up to 25 mm (~150 mm²)

Features and benefits

- Made of forged steel, with sharpened and hardened blades

Item code

Description	Length (mm)	Weight (gr)	Pack (pcs.)	Code
Cable cutter tool max 25 mm ²	200	300	1	9033

Cable Cutter 9032

Cable cutter for copper and alloy cables. Suitable for cables diameters up to 15 mm (~50 mm²)

Features and benefits

- Made of forged steel, with sharpened and hardened blades

Item code

Description	Length (mm)	Weight (gr)	Pack (pcs.)	Code
Cable cutter tool max 15 mm ²	170	210	1	9032

Cable Cutter 9051

Cable cutter for copper and alloy cables. Suitable for cables diameters up to 250 mm²

Features and benefits

- Casted metal handles with plastic covers, treated steel blades

Item code

Description	Length (mm)	Weight (gr)	Pack (pcs.)	Code
Cable cutter tool max 250 mm ²	600	1540	1	9051

Cable Cutter 9052

Cable cutter for copper and alloy cables. Suitable for cables diameters up to 500 mm²

Features and benefits

- Casted metal handles with plastic covers, treated steel blades

Item code

Description	Length (mm)	Weight (gr)	Pack (pcs.)	Code
Cable cutter tool max 500 mm ²	800	2880	1	9052

Cable Cutter 9054

Cable cutter for copper and alloy cables. Suitable for cables diameters up to 300 mm²

Features and benefits

- Painted metal handles with plastic covers

Item code

Description	Length (mm)	Weight (gr)	Pack (pcs.)	Code
Cable cutter tool max 300 mm ²	250	680	1	9054

Hot Air Gun 12200013

2-speed hot air gun, 1500W

Features and benefits

- Position 1: 1000W power, temperature 375°C, air flow 200 l/min
- Position 2: 1500W power, temperature 495°C, air flow 400 l/min

2-speed Steinel hot air gun 1600W	252	671	1	12200016

Hot Air Gun 12200011

Portable multifunctional gas tool

Features and benefits

- Butane gas capacity: 6 ml
- Average autonomy: about 30 minutes depending on the setting
- Hot air gun temperature 450°C
- Welder temperature 200°C/400°C

Instructions

- Rechargeable with gas bottle for normal lighters
- For safety reasons, the product is supplied without gas
- Suitable for intermittent use, not for continuous use

SALE CONDITIONS

Product features

Product features, illustrations and brands referred in this catalogue are approximate and subject to modification without any obligation of notice from ITW Construction Products Italy S.r.l. to the client. The sale of products is reserved for Dealers and professional users in possession of a VAT number.

Liability

In any case, the responsibility of ITW Construction Products Italy S.r.l. is limited to the amount of the prices displayed on the invoice. In no case our society can be held liable for loss of profits, contracts, turnover, financial losses and/or consequential damages caused by our company to the buyer and/or third parties.

Orders confirmation

Orders are accepted without obligation by ITW Construction Products Italy S.r.l., which is responsible for any fulfilment decision. If any client solvency or commercial correctness loss occur ITW Construction Products Italy S.r.l. will have the faculty to suspend or cancel, at its sole discretion, ongoing orders even if confirmed. The execution of the supply can be suspended following changes to the assets of the client, under art. 1461 C.C. Within 24 hours from ITW order confirmation dispatch, the commercial conditions are considered accepted.

Prices

Prices are for goods ex-works (Incoterms 2000) - packaging, VAT, transport are excluded and not binding. Prices in effect are those applicable on the day the order is received and are considered valid only if confirmed by our society.

Packs

On orders, please follow the quantities or multiples of the packages shown in the catalogue. We do not accept orders smaller than minimum pack quantity.

Delivery

Terms of delivery, even if confirmed, are purely indicative and not binding for our company. Any delay does not affect the validity of the order, nor does it authorize the request for damages and/or penalties for delayed delivery.

Shipments

Unless otherwise expressly agreed in writing with the client, shipment will be arranged by ITW Construction Products Italy S.r.l. in such manner as it considers appropriate and without any responsibility. Goods always travel at the risk and peril of the customer, even if ITW Construction Products Italy S.r.l. will agree to cover the specific transport costs. In case of shortfall, damage, delay during transport, damages must be requested to the carrier, the only responsible subject.

Major force

In case of any "force majeure" event, whether this is of a productive nature or deriving from an accident that directly or indirectly affects the shipment of goods, the company reserves the right to suspend commitments without notice and/or recognition of compensation. The following events are considered "force majeure": natural disaster, strike or delayed deliveries, explosions, fires, acts of war and/or sabotage, embargo, public unrest, interruptions or delays in transport. This list is to be considered indicative, but not exhaustive.

Payments / Retention of ownership

All payments must be made exclusively to ITW Construction Products Italy S.r.l. Complaints of any kind do not suspend the obligation to make payments according to the agreed form. Rounding and arbitrary restraints are not accepted for any reason. Any discounts granted or previously agreed must be calculated on the amount of the goods excluding VAT, packaging and any transport costs. Payments that do not comply with the agreed conditions will be rejected. If the client does not provide timely payment at the due dates and within the agreed terms, ITW Construction Products Italy S.r.l. will

have the right to suspend the execution of the order immediately, without any prejudice or damaging action may be imputed to the company. The customer will also have the obligation to immediately pay all the goods supplied, as well as default interest at the statutory applicable rate.

Insolvency

In the event of protest of routes with discount for ready cash benefit, the aforementioned discount will be recovered, and the invoice must be paid for whole plus protest costs.

Complaints

Goods shipment must be examined upon delivery by the client or by one of its staff responsible to receive it. The client shall promptly notify the company and the carrier where relevant, of any damage, defect or shortage reasonably apparent to the client on reasonable examination of the Goods. After 48 hours from the delivery no complaints are accepted. No compensation for expenses or damages of any kind will be recognized.

Returns and Substitutions

Any return or product replacement will be accepted no later than 15 days from the date of receipt of the goods.

The return must be previously authorized by ITW Construction Products Italy S.r.l., to which a sampling of the disputed material to carry out quality checks. Only if the disputed material proves to be non-compliant with the intended characteristics, ITW Construction Products Italy S.r.l. will authorize the return.

The return must be sent via carriage to the location indicated by the company and accompanied by the transport document, specifying the reason for made and indicating the details of the invoice with which the goods were previously supplied.

If the goods checked will result tradable (unopened packaging), a credit note will follow.

For goods returned due to client's error, the credit will be made only after the goods have been taken over by the company warehouse and subsequently the packaging quality and integrity check. If from the control the goods will comply to the company quality standards, a credit note will follow, the value of which will be agreed beforehand between the parties.

Disputes

For any dispute and/or complaint, the arbitration chamber established at the Chamber of Commerce of Padua is competent.
