

## PRODUCT DATASHEET

**Type:** ICE-18  
**Art. Nr.:** 40579

9120061394526

### Short description

Heating loop with thermostat for metal pipes, 18m, 180W, 230V

### Product Description

The ICESTOP heating loop protects pipes from ice and subsequently from damage. The ICESTOP is a plug-in heating cable with a constant output of approx. 10 W/m. The encapsulated thermostat is 100 % moisture-proof and switches the frost protection on at temperatures below 3 °C and off again from 9 °C. Only suitable for metal pipes. Protection class: IP X7, test mark: FIMKO, CE compliant, min. installation temperature: - 15 °C, dimensions: 5.5 x 8.5 mm, min. bending radius: 3 d, plug connection cable: 2 m, 230 V.

### ETIM characteristics

|                                  |              |                              |                    |
|----------------------------------|--------------|------------------------------|--------------------|
| <b>Cable type</b>                | Dual core    | <b>Nominal voltage</b>       | 230 Volt           |
| <b>Constant power</b>            | ✓            | <b>Max. hold temperature</b> | 90 Degrees celsius |
| <b>Self-limiting</b>             | ✗            | <b>Heating capacity</b>      | 10 Watt per metre  |
| <b>Screening</b>                 | Braiding     | <b>Diameter</b>              | 8.5 Millimetre     |
| <b>Material screening</b>        | Other        | <b>Height</b>                | 8.5 Millimetre     |
| <b>Surface coating screening</b> | Other        | <b>Width</b>                 | 5.5 Millimetre     |
| <b>Colour</b>                    | Blue         | <b>Length</b>                | 18 Metre           |
| <b>Application</b>               | Pipe heating |                              |                    |
