INFORMATION REACH REGULATIONS

Regarding the REACH regulation, our company keeps receiving requests and questionnaires on the "REACH conformity" of our products.

Our products represent "manufactured items" in the sense of the REACH regulation. The duty to inform regarding substances in manufactured items only applies to the so-called especially alarming substances which fulfill the criteria of this regulation. We are in constant contact with our suppliers regarding substances subject to registration; we have advised them of their obligation to preregistration and will immediately forward REACH relevant information to our customers, if necessary.

As per our present state of knowledge, no substances referenced in REACH regulations, are contained in manufactured items or their packaging, in a concentration higher than 0.1 mass percentage.

Matteo Anelli
