

QuickFix® LED Main Connector

Predecessor: 014-419

MKI001012

Description

Product description

The elegant, transparent PVC QUICK FIX® Indoor 230 V light chains are the safest on the market. The LEDs are molded into the polycarbonate caps and sealed into place using epoxy resin. This means that the cables can no longer be pulled out of the sockets, guaranteeing permanently perfect electrical contact. This construction, in combination with the safety twist lock connector, provides quick, simple and safe installation. All QuickFix® 230V indoor light chains can be connected exclusively with one another and are ideally suited for Christmas trees, garlands, decorative wreaths and for all interior lighting concepts.
