Convenient visualization of your easyE4 projects

Contents of starter sets at a glance:

easyE4 base device

The easyE4 control relay offers a solution for everyone who wants to implement control tasks with as little effort as possible. The easyE4 has powerful hardware and can be flexibly expanded by up to 11 modules to a maximum of 188 inputs/outputs.

easy Remote Touch Display (RTD)

The Remote Touch Display is the remote control for your application, which mirrors the contents of the easy base device in color and with which you can control it - and all this without programming the RTD!

XV-102 easy touch display

The XV-102 offers you all design options from diagrams to icons and images to create an individual user interface. The intuitive Galileo software supports you during conceptual design and commissioning.

easySoft V7 license code

The intuitive software easySoft provides a quick introduction to programming. Version 7 provides four different programming languages (LD, EDP, FBD, ST). In addition to clear selection menus, the possibility of simulation as well as online communication, the easySoft 7 offers new function blocks, such as the interrupt and the data logger, which ensure convenient and reliable operation.

Ethernet switch and RJ45 patch cable

With the Ethernet switch and the network cable, your easyE4 is ready to go and can be integrated into Ethernet networks.
