FlatFix Fusion

Complete and flexible installation on any roof

FlatFix Fusion is the modular and flexible mounting system for solar panels on medium-sized and small roofs.

Easy to install

Simplicity and flexibility are the key principles behind our FlatFix Fusion system. You can assemble the system quickly with smart click connections. The modular nature of the system makes it easy to build around obstacles such as chimneys.

Roof safety

The roof supports with movable coupling allow the system to move (expand and contract) so the roofing will not be damaged. The system has been extensively tested on fire safety, wind speed and corrosion.

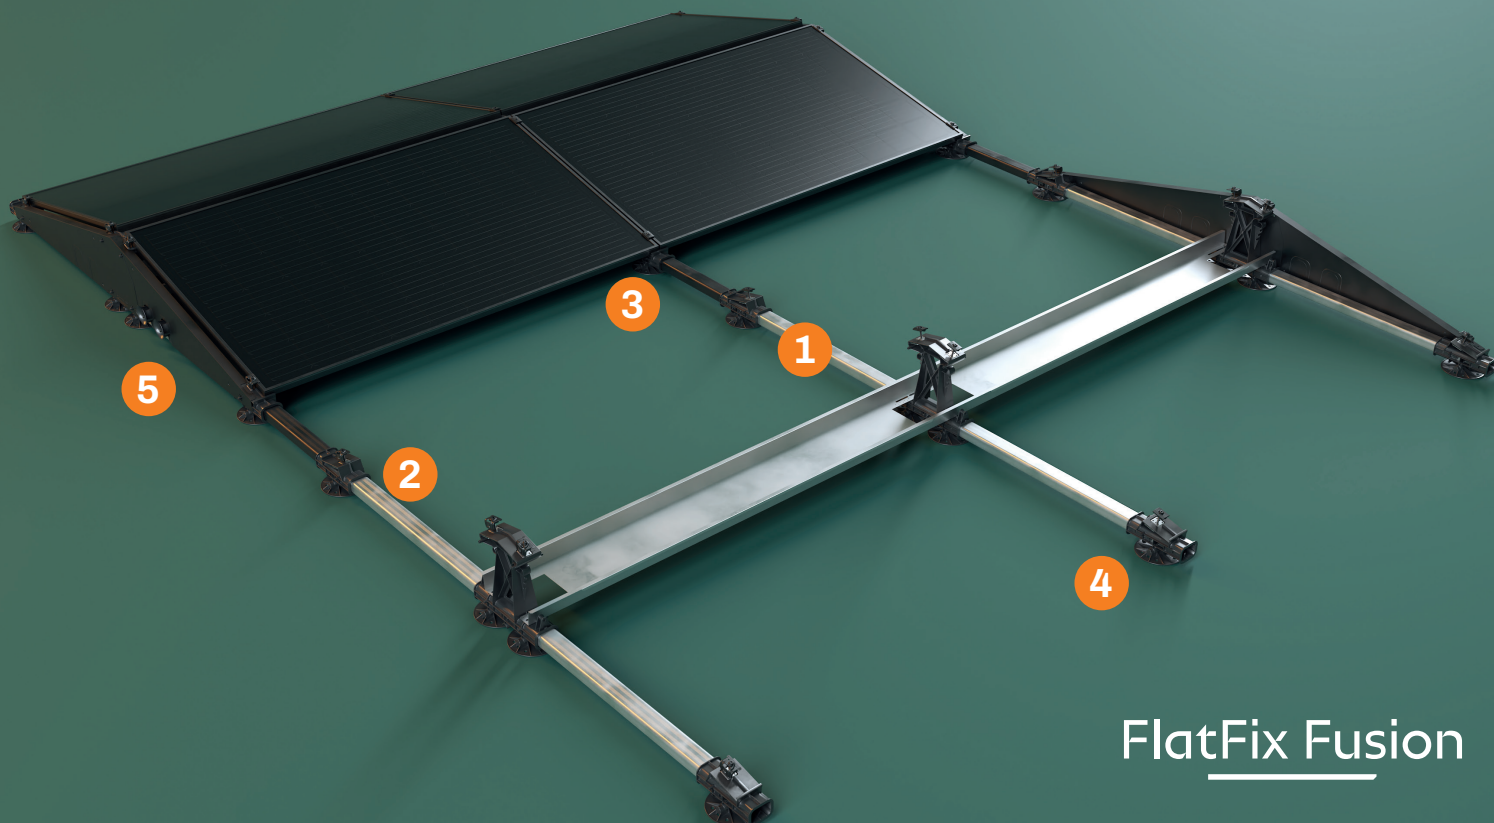

Why FlatFix Fusion?

- ✓ Modular mounting system with click connection
- ✓ In a dual or single and landscape or portrait position
- ✓ Integrated earthing and bonding
- ✓ No damage to the roofing
- ✓ Easy to install with optimiser clip and cable clip

The versatile modular click system for flat roofs

FlatFix Fusion

Flexible installation

Choose the right set-up for your project: dual or single, and landscape or portrait orientations are all possible. And you can easily build around obstacles.

User-friendly system

FlatFix Fusion is made of strong, lightweight material with optimal clamping force, even after removing and reattaching panels.

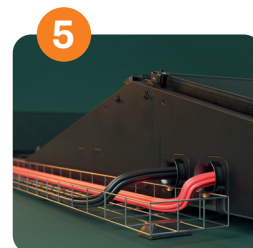

Smart click connection

FlatFix Fusion is made of strong, lightweight material. Quick and easy to install thanks to the unique click connection.

Thermal decoupling

No damage to the roofing thanks to roof supports with a movable coupling.

Integrated cable management

With cable outlets in the wind deflector and a cable transit, you can safely route cables.
