

What's new in ION9000 series meter firmware v2.1.0

This document lists the new and updated features in the firmware version 2.1.0 (V002.001.000) for the PowerLogic™ ION9000 series meter.

Enhanced firmware upgrades

In addition to new feature support, firmware version 2.1.0 (V002.001.000) enhances meter performance through a more robust, and efficient memory architecture that significantly improves firmware upgrade speeds

Download “Upgrading devices to firmware v2.1.0” technical note at <https://www.schneider-electric.com/en/download/document/7EN72-0203/> for instructions on upgrading your meter firmware to version 2.1.0.

ION module updates

0-20 mA Analog I/O support

New meter firmware adds 0-20 mA support for the Analog I/O option module. Your PM89M0024 analog I/O option module must have firmware version 1.2.0 (V001.002.000) or later to use this feature. Refer to your meter's user manual for instructions on how to upgrade option modules.

Optional upgrade for digital I/O option modules

Firmware version 1.2.0 (V001.002.000) for the PM89M2600 improves the Digital I/O option module's performance.
